Transferee Liability

This book is set against the background of the 'justice gap' in sexual assault cases - the dramatic gap between the number of offences recorded by the police and the number of convictions. It seeks to examine the attitudinal problems which bedevil this area of law and possible strategies for addressing them. Written by a professor of law and a professor

Online Library 1 362 Time Plr Articles

of psychology, it reviews evidence from socio-legal and social cognition research and presents new data drawn both from interviews with judges and barristers and from studies with prospective lawyers and members of the public. In the final part, it considers different ways in which rape trials could be improved and suggests steps that could be taken to change public attitudes about sexual assault.

This publication contains a presentation of case laws rendered in jurisdictions having enacted the UNCITRAL Model Law on International Commercial Arbitration. In light of the large number of cases collected, the Commission requested a tool specifically designed to present selected information on the interpretation and application of the Model Law in a clear, concise and objective manner. This request originated the UNCITRAL Digest of Case Law on the UNCITRAL Model Law on International Commercial Arbitration. The

Online Library 1 362 Time Plr Articles

purpose of the digest is to assist in the dissemination of information on the Model Law and further promote its adoption as well as its uniform interpretation and application. In addition, the digest is meant to help judges, government officials, arbitrators, practitioners and academics use more efficiently the case law relating to the UNCITRAL text.

When George Shoobridge Carr (1837-1914) wrote his Synopsis of Elementary Results he intended it as an aid to students preparing for degree-level examinations such as the Cambridge Mathematical Tripos, for which he provided private tuition. He would have been startled to see the two volumes, first published in 1880 and

Online Library 1 362 Time Plr Articles

1886 respectively, reissued more than a century later. Notably, in 1903 the work fell into the hands of the Indian prodigy Srinivasa Ramanujan (1887-1920) and greatly influenced his mathematical education. It is the interaction between a methodical teaching aid and the soaring spirit of a self-taught genius which gives this reissue its interest. Volume 1, presented here in its 1886 printing, contains sections on mathematical tables, algebra, the theory of equations, plane trigonometry, spherical trigonometry, elementary geometry and geometrical conics.

An Introduction to Stochastic Modeling provides information pertinent to the standard concepts and methods of stochastic modeling. This book presents the rich diversity of applications of stochastic processes in the sciences. Organized into nine chapters, this book begins with an overview of diverse types of stochastic models, which predicts a set of possible outcomes weighed by their likelihoods or probabilities. This text then provides exercises in the applications of simple stochastic analysis to appropriate problems. Other chapters consider the study of general functions of independent, identically

distributed, nonnegative random variables representing the successive intervals between renewals. This book discusses as well the numerous examples of Markov branching processes that arise naturally in various scientific disciplines. The final chapter deals with queueing models, which aid the design process by predicting system performance. This book is a valuable resource for students of engineering and management science. Engineers will also find this book useful.

" ... analyzes the rules of [section] 6901 and related judicial interpretations. Beginning with a general discussion of transferee liability and its development from the so-called trust fund doctrine, the Portfolio

Online Library 1 362 Time Plr Articles

distinguishes between transferee liability in equity and liability at law. The liability of a transferee at law or equity for the tax of the transferor is governed by state law and in some cases by federal statutes. The liability of the transferor is determined under the Internal Revenue Code. Section 6901 does not create a separate liability for the transferee; instead, it provides a regime to facilitate collection by the IRS from a third party of the tax due from the transferor and to permit the third party/transferee to contest the IRS determination in the U.S. Tax Court. The Portfolio also discusses the liability of a fiduciary under 31 U.S.C. [section] 3713(b) and the application of [section] 6901 to this type of liability"--P. (iii).

Recently Geometric Programming has been applied to study a variety of problems in the analysis and design of communication systems from information theory and queuing theory to signal processing and network protocols.

Geometric Programming for Communication Systems begins its comprehensive treatment of the subject by providing an in-depth tutorial on the theory, algorithms, and modeling methods of Geometric Programming. It then gives a systematic survey of the applications of Geometric Programming to the study of communication systems. It collects in one place

various published results in this area, which are currently scattered in several books and many research papers, as well as to date unpublished results. Geometric Programming for Communication Systems is intended for researchers and students who wish to have a comprehensive starting point for understanding the theory and applications of geometric programming in communication systems.

First published in 1936, *One Thousand Ways to Make \$1000* is the long out-of-print book that Warren Buffett's biographers credit with shaping the legendary investor's business acumen and giving him his trademark appreciation of compound interest. After pulling a copy of *One Thousand Ways* off a library shelf at age eleven and devouring F.C. Minaker's plucky and practical business advice, Buffett declared that he would be a millionaire by the time he was 35. Written in the immediate, conversational style of Dale Carnegie's *How to Win Friends and Influence People*, this book is full of inventive ideas on how to make money through excellent salesmanship, hard

Online Library 1 362 Time Plr Articles

work, and resourcefulness. While some of the ideas may seem quaint today-goat dairying, manufacturing motor-driven chairs, and renting out billiard tables to local establishments are among the money-making ideas presented- the underlying fundamentals of business explained in these pages remain as solid as they were over seventy years ago. Covering a wide spectrum of topics including investing, marketing, merchandising, sales, customer relations, and raising money for charity, *One Thousand Ways to Make \$1000* is both a durable, classic business book and a fascinating portrait of determined entrepreneurship in Depression-era America. Every effort has been made to reproduce the content exactly as it was originally presented.

Reproduction of the original: A Start in Life by Honore de Balzac

Back in the days of the wild, Wild West, when easterners traveled across this vast country looking for opportunity in the newly opened territories, they were often referred to as a 'tenderfoot'. This wasn't a complimentary term but it was a rather apt one. The easterners wore 'city' shoes that weren't designed to withstand the rigors of the western terrain. Their hats didn't have wide brims to protect them from the sun and their clothing wasn't made of tough material like denim. These new westerners didn't know how to take care of themselves and because they didn't know where and what the dangers were they didn't have any idea how to avoid them. If you are just

Online Library 1 362 Time Plr Articles

beginning to consider the idea of investing in real estate you are a tenderfoot and you do need some instruction to avoid losing your shirt...and probably your pants, hat and boots, as well.

First you will need to determine what your strategy will be in real estate investing. Do you want to buy a property, fix it up and sell it quickly or do you want to buy a property, hold it and wait for the market to increase? Do you want to deal with renters? All of these questions is ones that you need to answer before you invest in any piece of real estate.
