Basal aspect.--One of the distinctive characters of the Mammoth, upon which Cuvier laid much stress, is the parallelism of the molars in the upper jaw. In *E. meridionalis*, young and old, they invariably converge, more or less, in front. In young specimens this convergence is very pronounced; in the worn-out molars of very old crania it is less obvious. It is distinctively shown in the palate-specimen, fig. 1 of Plate VI. of Cortesi's cranium, from Monte Pulgnasco. The materials for comparative description of the*

*crania of the Elephants have been largely increased since the time of Cuvier, and chiefly with the skulls of Indian fossil species. The points here indicated clearly show that the cranium of E. meridionalis differs more from that of the Mammoth than does the latter from the existing Indian Elephant. The Italian form, in this respect, resembles most the cranium of E. The magnetic Australian has joined countrymen Mel Gibson and Russell Crowe as an international superstar and is loved by fans worldwide for his varied career in film and theatre. When a young Jackman turned down a role in Neighbours to study at Perth's prestigious WAAPA, his gamble would pay off hand-somely. He has since reprised the role in box office hits The Last Stand, Origins and The Wolverine. Premium offers including 2006 animation Happy Feet, Baz Lurhmann's epic Australia " and even a rumoured shortlist spot for James Bond " soon followed. With a 2013 Academy Award nomination for his tour de force performance as Jean Valjean in the epic Les Miserables, and a star turn as Wolverine in X-Men: Days of Future Past on the horizon, Hugh is set
