*approaches rooted in differing cultural, social, political and philosophical backgrounds do remain, and that these differences are not necessarily negative elements in the contemporary legal order. By examining different levels of the legal order, including domestic, regional and multilateral, it goes on to argue that identifying these diversities and addressing the interactions and mutual influences between different regimes is a worthwhile undertaking, not only in terms of mutual enrichment, but also with regard to intensifying the degree of desirable coordination*

Industry and commerce use vast amounts of water and in some parts of the world water is becoming a scarce commodity. We need to take more care in our future use of water, and this book is a 'best practice' manual for industrial and commercial users world-wide. It offers a practical account of the measures which can be taken to re-educate industrial and commercial users in the techniques of water saving and re-use anywhere in the world. The principles are covered in detail and supported by examples from specific industries and commercial operations. Author Mohan Seneviratne is Manager of Sydney Water's 'Every

approach to clinical reasoning, assessment, diagnosis and treatment of musculoskeletal conditions. Renamed A Practical Approach to Musculoskeletal Medicine, to reflect globally understood terminology, it focuses on the principles and practice of musculoskeletal medicine, providing practical guidance and tips for clinical practice based on extensive clinical experience and evidence. The book is split into three sections. Section 1 presents the theory underpinning musculoskeletal medicine. The histology and behaviour of the soft tissues follow, with a review of the healing process, to enhance understanding of the effects of injury on the soft tissues. The first section ends with the principles of treatment as applied in musculoskeletal medicine and discusses the techniques of mobilization and injection, aims and application, and indications for use. Section 2 adopts a

A Practical Approach to Musculoskeletal Medicine comprehensively and critically discusses current literature. This book provides a comprehensive commentary and guidance to readers on the current edition (1999 Edition) of General Conditions of Contract for Civil Engineering Works (the "General Conditions"), which the Hong Kong Government uses for all its civil engineering contracts. The book describes 46 out of 90 clauses in the General Conditions and their practical application, with explanations in plain and simple language under such headings as Commentary, Analysis and

Application. The listing of equivalent clauses of the more user-friendly English ICE Conditions and the international FIDIC Conditions together enables the readers to understand the meaning of the General Conditions from a different context. For those readers who find it easier to read in Chinese, the translation will help them to compare with and understand the original English text. The book is therefore useful to students, consulting engineers, surveyors and lawyers who want to understand more about the Hong Kong construction practice. Despite repeated attempts in recent years to simplify the planning system, planning law has continued

to be so complex that practitioners and students alike have found it difficult to disentangle the issues and principles involved. The twelfth edition of this popular and accessible book aims to remove the mystery which planning law has for so many people. A Practical Approach to Planning Law continues to provide a comprehensive and systematic account of the principles and practice of planning law, guiding the reader through each stage of the planning process, from permission applications through to disputes and appeals. Containing coverage of all recent cases as well as important developments since the publication of the previous edition,
