This is the history of an unprecedented deception operation - the biggest KGB deception of all time. It has never been told in full until now. There are almost certainly people who would like it never to be told. It is the story of General Alexander Orlov. Stalin's most loyal and trusted henchman during the Spanish Civil War, Orlov was also the Soviet handler controlling Kim Philby,

the British spy, defector, and member of the notorious 'Cambridge Five'. Escaping Stalin's purges, Orlov fled to America in the late 1930s and lived underground. He only dared reveal his identity to the world after Stalin's death, in his 1953 best-seller *The Secret History of Stalin's Crimes*, after which he became perhaps the best known of all Soviet defectors, much written about, highly praised, and commemorated by the US Congress on his death in 1973. But there is a twist in the Orlov story beyond the dreams of even the most ingenious spy novelist: 'General Alexander Orlov' never actually existed. The man known as 'Orlov' was in fact born Leiba Feldbin. And while he was a loyal servant of Stalin and the controller of Philby, he was never a General in the KGB, never truly

defected to the West after his 'flight' from the USSR, and remained a loyal Soviet agent until his death. The 'Orlov' story as it has been accepted until now was largely the invention of the KGB - and one perpetuated long after the end of the Cold War. In this meticulous new biography, Boris Volodarsky, himself a former Soviet intelligence officer, now tells the true story behind 'Orlov' for the first time. An intriguing tale of Russian espionage and deception, stretching from the time of Lenin to the Putin era, it is a story that many people in the world's intelligence agencies would almost definitely prefer you not to know about.

**This Code of Practice for Victims of Crime forms a key part of the wider Government strategy to transform the criminal justice system by putting victims first, making the system more responsive and easier to navigate. Victims of crime should be treated in a respectful, sensitive and professional manner without discrimination of any kind. They should receive appropriate support to help them, as far as possible, to cope and recover and be protected from re-victimisation. It is important that victims of crime know**

**what information and support is available to them from reporting a crime onwards and who to request help from if they are not getting it. This Code sets out the services to be provided to victims of criminal conduct by criminal justice organisations in England and Wales. **This book describes an astounding feat of constitutional writing and publication. For a number of decades, officials working across different branches of the United Kingdom (UK)**

**constitution have been engaged in a series of separate projects. Taken in their totality, they amount to a vast enterprise. Yet, until now, no-one has fully recognised or critically analysed what has taken place. There has been a proliferation in the UK of publicly available codes, normally lacking a basis in statute, providing official accounts of a variety of different features of UK constitutional rules and principles. They cover institutions ranging from the Cabinet to the Civil Service to the judiciary, and relationships between entities such as**

**central government and the devolved executives; and between the UK executive and the Westminster Parliament. Among them are prominent texts such as the Ministerial Code, the Cabinet Manual, the Guide to Judicial Conduct and the devolution Memorandum of Understanding - as well as more obscure documents that nonetheless contain important stipulations regarding the operation of the system. Similar developments have taken place in countries including Australia, Canada and New Zealand. The author explores the history of this phenomenon in the UK, how it**

**functions today here and elsewhere in the Commonwealth, and its implications for the UK constitution.**

**This prize-winning book, first published in 1991, provides a detailed legal account of the development of the UK Official Secrets Acts 1911-1989. In particular, the Espionage section (s.1) of this criminal law is analysed carefully, illustrated by leading cases of UK spies prosecuted under this section, particularly during the 1980's – including MI5 officer Michael Bettaney and Geoffrey Prime who worked at GCHQ. The author also examines**

**problems of evidence in espionage prosecutions, and the consent of the Attorney-General in cases under the Official Secrets Acts. This book remains the definitive treatise on the UK Official Secrets Acts, especially concerning the espionage provisions.**

**The treatment of victims and complainants by the police is examined in this pioneering new work. Case studies, based on interviews carried out at the University of Portsmouth's Institute of Criminal Justice Studies, in the United Kingdom, reveal that victims and complainants are routinely discredited by police agencies.**

**Whilst in the United States, victims may include anyone subjected to police interrogation, particularly those of African-American origin, complainants across the globe may include victims of rape, bereaved families, and individual officers. The reason why certain victims and complainants are targeted by policing agencies is complex and leads to an investigation into police bias, covert practices, and one of the most common areas of policing: road death investigations. Consequently, other members of the criminal justice system, such as prosecutors, coroners,**

**and hospital pathologists (medical examiners) are shown to often corroborate the police's version of events compromising victims' rights and the very nature of justice. Given recent miscarriages of justice and public relation campaigns on behalf of the police, Eccy de Jonge argues that never before has a greater openness on the inner workings of the police been needed to fully support the interests of those the criminal justice system is meant to serve.**
