

Accidental Information Discovery Cultivating Sere

Set against the backdrop of Redwood forests and shimmering vineyards, Seré Prince Halverson's compelling debut tells the story of two women, bound by an unspeakable loss, who each claims to be the mother of the same two children. To Ella Beene, happiness means living in the northern California river town of Elbow with her husband, Joe, and his two young children. Yet one summer day Joe breaks his own rule-never turn your back on the ocean-and a sleeper wave strikes him down, drowning not only the man but his many secrets. For three years, Ella has been the only mother the kids have known and has believed that their biological mother, Paige, abandoned them. But when Paige shows up at the funeral, intent on reclaiming the children, Ella soon realizes there may be more to Paige and Joe's story. "Ella's the best thing that's happened to this family," say her close-knit Italian-American in-laws, for generations the proprietors of a local market. But their devotion quickly falters when the custody fight between mother and stepmother urgently and powerfully collides with Ella's quest for truth. The Underside of Joy is not a fairy-tale version of stepmotherhood pitting good Ella against evil Paige, but an exploration of the complex relationship of two mothers. Their conflict uncovers a map of scars-both physical and emotional-to the families' deeply buried tragedies, including Italian internment camps during World War II and postpartum psychosis. Weaving a rich fictional tapestry abundantly alive with the glorious natural beauty of the novel's setting, Halverson is a captivating guide through the flora and fauna of human emotion-grief and anger, shame and forgiveness, happiness and its shadow complement . . . the underside of joy.

Twenty-one days. In a world ravaged by fire and descending into madness, Cavalo has been given an ultimatum by the dark man known as Patrick: return Lucas to him and the cannibalistic Dead Rabbits, or the town of Cottonwood and its inhabitants will be destroyed. But Lucas has a secret embedded into his skin that promises to forever alter the shape of things to come-a secret that Cavalo must decide if it's worth dying over, even as he wrestles with his own growing attraction to the muted psychopath. Twenty-one days. Cavalo has twenty-one days to prepare for war. Twenty-one days to hold what is left of his shredded sanity together. Twenty-one days to convince the people of Cottonwood to rise up and fight back. Twenty-one days to unravel the meaning behind the marks that cover Lucas. A meaning that leads to a single word and a place of unimaginable power: Dworshak.

The Ecological Basis of Revolutionary Change

"This book highlights state-of-the-art research concerning the key issues surrounding current and future challenges associated with the software engineering of mobile systems and related emergent applications"--

Our day-to-day experiences over the past decade have taught us that there must be limits to our tremendous appetite for energy, natural resources, and consumer goods. Even utility and oil companies now promote conservation in the face of demands for dwindling energy reserves. And for years some biologists have warned us of the direct correlation between scarcity and population growth. These scientists see an appalling future riding the tidal wave of a worldwide growth of population and technology. A calm but unflinching realist, Catton suggests that we cannot stop this wave - for we have already overshot the Earth's capacity to support so huge a load. He contradicts those scientists, engineers, and technocrats who continue to write optimistically about energy alternatives. Catton asserts that the technological panaceas proposed by those who would harvest from the seas, harness the winds, and farm the deserts are ignoring the fundamental premise that "the principals of ecology apply to all living things." These principles tell us that, within a finite system, economic expansion is not irreversible and population growth cannot continue indefinitely. If we disregard these facts, our sagging American Dream will soon shatter completely.

The Air Force requires technical skills and expertise across the entire range of activities and processes associated with the development, fielding, and employment of air, space, and cyber operational capabilities. The growing complexity of both traditional and emerging missions is

placing new demands on education, training, career development, system acquisition, platform sustainment, and development of operational systems. While in the past the Air Force's technologically intensive mission has been highly attractive to individuals educated in science, technology, engineering, and mathematics (STEM) disciplines, force reductions, ongoing military operations, and budget pressures are creating new challenges for attracting and managing personnel with the needed technical skills. Assessments of recent development and acquisition process failures have identified a loss of technical competence within the Air Force (that is, in house or organic competence, as opposed to contractor support) as an underlying problem. These challenges come at a time of increased competition for technical graduates who are U.S. citizens, an aging industry and government workforce, and consolidations of the industrial base that supports military systems. In response to a request from the Deputy Assistant Secretary of the Air Force for Science, Technology, and Engineering, the National Research Council conducted five fact-finding meetings at which senior Air Force commanders in the science and engineering, acquisition, test, operations, and logistics domains provided assessments of the adequacy of the current workforce in terms of quality and quantity.

From a Pulitzer Prize finalist, "the single most compelling, lucid, and lyrical contemporary account of the absurdity of U.S. border policy" (The Atlantic). In May 2001, a group of men attempted to cross the Mexican border into the desert of southern Arizona, through the deadliest region of the continent, the "Devil's Highway." Three years later, Luis Alberto Urrea wrote about what happened to them. The result was a national bestseller, a Pulitzer Prize finalist, a "book of the year" in multiple newspapers, and a work proclaimed as a modern American classic. In a world where magic thrives in secret city corners, a group of magicians embark on a road trip-and it's the "no-love-interest", found family adventure you've been searching for. Sixteen-year-old Blythe is one of seven Guardians: magicians powerful enough to cause worldwide panic with a snap of their fingers. But Blythe spends her days pouring latte art at her family's coffee shop, so why should she care about having apocalyptic abilities? She's given a reason when magician anarchists crash into said coffee shop and kidnap her family. Heartbroken but determined, Blythe knows she can't save them alone. A war is brewing between two magician governments and tensions are too high. So, she packs up her family's bright yellow Volkswagen, puts on a playlist, and embarks on a road trip across the United States to enlist the help of six strangers whose abilities are unparalleled-the other Guardians. *The Black Veins 2020 Anniversary Edition, with cover by Shazleen Khan

Dominant cultural narratives about later life dismiss the value senior citizens hold for society. In her cultural-philosophical critique, Hanne Laceulle outlines counter narratives that acknowledge both potentials and vulnerabilities of later life. She draws on the rich philosophical tradition of thought about self-realization and explores the significance of ethical concepts essential to the process of growing old such as autonomy, authenticity and virtue. These counter narratives aim to support older individuals in their search for a meaningful age identity, while they make society recognize its senior members as valued participants and moral agents of their own lives.

This work describes riverine combat during the Vietnam War, emphasizing the operations of the U.S. Navy's River Patrol Force, which conducted Operation Game Warden; the U.S. Army-Navy Mobile Riverine Force, the formation that General William Westmoreland said "saved the Mekong Delta" during the Tet Offensive of 1968; and the Vietnam Navy. An important section details the SEALORDS combined campaign, a determined effort by U.S. Navy, South Vietnamese Navy, and allied ground forces to cut enemy supply lines from Cambodia and disrupt operations at base areas deep in the delta. The author also covers details on the combat vessels, helicopters, weapons, and equipment employed in the Mekong Delta as well as the Vietnamese combatants (on both sides) and American troops who fought to secure Vietnam's waterways. Special features focus on the ubiquitous river patrol boats (PBRs) and the Swift boats (PCFs), river warfare training, Vice Admiral Elmo R. Zumwalt Jr., the Black Ponies aircraft squadron, and Navy SEALs. This publication may be of interest to history scholars, veterans, students in advanced placement history classes, and military enthusiasts given the continuing impact of riverine warfare on U.S. naval and military operations in the 21st century. Once upon a time, humanity could no longer contain the rage that swelled within, and the world ended in a wave of fire. One hundred years later, in the wasteland formerly known as America, a broken man who goes only by the name of Cavalo survives. Purposefully cutting himself off from what remains of civilization, Cavalo resides in the crumbling ruins of the North Idaho Correctional Institution. A mutt called Bad Dog and a robot on the verge of insanity comprise his only companions. Cavalo himself is deteriorating, his memories rising like ghosts and haunting the prison cells. It's not until he makes the dangerous choice of crossing into the irradiated Deadlands that Cavalo comes into contact with a mute psychopath, one who belongs to the murderous group of people known as the Dead Rabbits. Taking the man prisoner, Cavalo is forced not only to face the horrors of his past, but the ramifications of the choices made for his stark present. And it is in the prisoner that he will find a possible future where redemption is but a glimmer that darkly shines. The world has died. This is the story of its remains.

With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice "Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash." —Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue.

Air Force Handbook 10-644 Survival Evasion Resistance Escape (SERE) Operations 27 March 2017 This handbook describes the various environmental conditions affecting human survival, and describes isolated personnel (IP) activities necessary to survive during successful evasion or isolating events leading to successful recovery. It is the fundamental reference document providing guidance for any USAF service member who has the potential to become isolated; deviations require sound judgment and careful consideration. This publication provides considerations to be used in planning and execution for effective mission accomplishment of formal USAF Survival, Evasion, Resistance, and Escape (SERE) training, environmentally specific SERE training, and combat survival continuation training programs. The tactics, techniques, and procedures in this publication are recognized best practices presenting a solid foundation to assist USAF service members to maintain life and return with honor from isolating events.

This publication is a testament to the potential of integrating traditional and scientific knowledge of both local communities and academic and development professionals alike. It also serves as a reminder to the scientific community that science should be shared with local people and not confined to journals and closed circles of technical experts. Scientists and forest-reliant communities are geographically and conceptually distant. Scientific findings are rarely shared with local people and locals are infrequently consulted regarding the species and landscapes they have known for generations. To bridge this divide, this book weaves together the voices of farmers and scientists; hunters and policy makers; midwives and musicians. From Brazil nuts and Cat's claw to Copaiba and Titica, this book shares a wealth of information on a wide range of plant species that comes only from the close collaboration between local peoples and researchers.

The Professor's House

Sport, Adventure, Travel Fiction

This bittersweet tale about a professor's desire to stay in his old study and cling to what used to be on the eve of moving into a new house sparks deep introspection in a story that explores a mid-life crisis and family life in a 1920s Midwestern college town.

Fifteen-year-old Ari Mendoza is an angry loner with a brother in prison, but when he meets Dante and they become friends, Ari starts to ask questions about himself, his parents and his family that he has never asked before.

Many of the things discovered by accident are important in our everyday lives: Teflon, Velcro, nylon, x-rays, penicillin, safety glass, sugar substitutes, and polyethylene and other plastics. And we owe a debt to accident for some of our deepest scientific knowledge, including Newton's theory of gravitation, the Big Bang theory of Creation, and the discovery of DNA. Even the Rosetta Stone, the Dead Sea Scrolls, and the ruins of Pompeii came to light through chance. This book tells the fascinating stories of these and other discoveries and reveals how the inquisitive human mind turns accident into discovery. Written for the layman, yet scientifically accurate, this illuminating collection of anecdotes portrays invention and discovery as quintessentially human acts, due in part to curiosity, perserverance, and luck.

*From the International bestselling author of *The Underside of Joy* comes an atmospheric novel about a man who returns to his Alaskan hometown after twenty years Alaska doesn't forgive mistakes. That's what Kachemak Winkel's mother used to tell him. A lot of mistakes were made that awful day twenty years ago, when she died in a plane crash with Kache's father and brother—and Kache still feels responsible. He fled Alaska for good, but now his aunt Snag insists on his return. She admits she*

couldn't bring herself to check on his family's house in the woods—not even once since he's been gone. Kache is sure the cabin has decayed into a pile of logs, but he finds smoke rising from the chimney and a mysterious Russian woman hiding from her own troubled past. Nadia has kept the house exactly the same—a haunting museum of life before the crash. And she's stayed there, afraid and utterly isolated, for ten years. Set in the majestic, dangerous beauty of Alaska, All the Winters After is the story of two bound souls trying to free themselves, searching for family and forgiveness.

New Monthly Magazine

Vols. 1-26 include a supplement: The University pulpit, vols. [1]-26, no. 1-661, which has separate pagination but is indexed in the main volume. Enidina Current and Mary Morrow live on neighboring farms in the flat, hard country of the upper Midwest during the early 1900s. For Eddie, a hardscrabble life comes easily to some, like Eddie, who has never wanted more than the land she works and the animals she raises on her husband, Frank. But for the deeply religious Mary, farming is an awkward living and at odds with her more cosmopolitan inclinations. Mary creates a clean and orderly home life for her stormy husband, Jack, and her sons, while she adapts to the isolation of a rural town through the inspiration of a local preacher. She is the first to befriend Eddie in a relationship that will prove as rugged as the ground they walk on. Having little in common, Eddie and Mary need one another for survival and companionship. But as the Great Depression threatens, the balance of their reliance on one another tips, pitting neighbor against neighbor, exposing the dark secrets they hide from one another, triggering a series of disquieting events that threaten to unravel not only their friendship but their families as well. In this luminous and unforgettable debut, Michelle Hoover explores the polarization of the human soul in times of hardship and the instinctual drive for self-preservation by whatever means necessary. The Quickening stands as a novel of lyrical precision and historical consequence, reflecting the resilience and sacrifices required even now in our modern troubled times.
