

Actualizacion Nuevo Baremo De Trafico

Since its first publication, Accidents, Compensation and the Law has been recognised as the leading treatment of the law of personal injuries compensation and the social, political and economic issues surrounding it. The seventh edition of this classic work explores recent momentous changes in personal injury law and practice and puts them into broad perspective. Most significantly, it examines developments affecting the financing and conduct of personal injury claiming: the abolition of legal aid for most personal injury claims; the increasing use of conditional fee agreements and after-the-event insurance; the meteoric rise and impending regulation of the claims management industry. Complaints that Britain is a 'compensation culture' suffering an 'insurance crisis' are investigated. New statistics on tort claims are discussed, providing fresh insights into the evolution of the tort system which, despite recent reforms, remains deeply flawed and ripe for radical reform.

The foundations of tort law in European legal systems differ considerably. A group of tort law experts, the "European Group on Tort Law", systematically researches the most fundamental questions underlying the various tort law systems. Their work is contained in this series of books, which seeks a common law of Europe without the need to lay these principles down in formal legal texts, such as a European civil code.

The resource of choice for pediatric residencies, clerkships, and exams, Nelson Essentials of Pediatrics continues to provide a focused overview of the core knowledge in pediatrics. Succinct, targeted coverage of normal childhood growth and development, as well as the diagnosis, management, and prevention of common pediatric diseases and disorders, make this an ideal medical reference book for students, pediatric residents, nurse practitioners, and physician assistants. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Get an effective overview of pediatrics with help from concise text, a full-color design, high-yield tables, and numerous images. Take advantage of a wealth of images that capture the clinical manifestations and findings associated with Kawasaki disease, lupus, lymphoma, stroke, and many other disorders seen in children. Efficiently review essential, concise pediatric content with this popular extension of the Nelson Textbook of Pediatrics (ISBN: 978-1-4377-0755-7). Focus on the core knowledge needed for your pediatric clerkship or rotation with coverage that follows the COMSEP curriculum guidelines. Easily visualize complex aspects with a full-color layout and images, as well as numerous tables throughout the text. The study will consist of reports from different countries and will focus on the compensation of occupational diseases and accidents. Issues like discrimination, moral or sexual harassment and other damages claims of employees will be dealt with in the reports for some countries. Major aspects of the reports will be a description of different existing compensation schemes, interactions between Employers' Liability and Workers' Compensation, a comparison of both systems and their respective efficiency.

Pocket Nephrology is a practical, high-yield reference offering current, evidence-based practices and expert guidance from physicians at the world-renowned Columbia University Medical Center. Featuring an easy-to-use loose-leaf format, it can be used as a portable diagnosis and treatment reference, as a quick dosage check, as a review for complex glomerular diseases and acid-base physiology, and for board preparation. Mirrors the thought process of nephrologists in day-to-day practice. Contains the latest clinical guidelines and new therapeutic recommendations. Follows the popular Pocket Notebook format, featuring bulleted lists, tables, diagrams, and algorithms that make essential facts easy to find and retain. Covers all topics encountered in nephrology practice, categorized by subspecialties, making it ideal for trainees in nephrology as well as practicing nephrology consultants with years of experience. Written by current and former faculty members and fellows from Columbia University Medical Center.

Compensation for loss of housekeeping capacity is one of the main heads of damages awarded for personal injury, and therefore of great practical importance to both accident victims and liability insurers. But it has received little scholarly attention from a comparative perspective. This study examines national approaches to the award of such damages and draws comparative conclusions, addressing both the concepts employed in different national systems and, through practical case studies, the quantum of compensation in individual cases.

El tratamiento penal de los hechos que se derivan de la circulación de vehículos a motor ha sufrido una significativa evolución en las distintas etapas históricas de nuestro Derecho: desde el lejano Código Penal de 1928 (en tiempos de Primo de Rivera, cuando la circulación de automóviles aún era incipiente) hasta la profunda reforma que ha llevado a cabo la Ley Orgánica 15/2007, de 30 de noviembre, y que, hasta el momento, pone fin a la evolución normativa en los delitos relacionados con la circulación viaria. Lógicamente, toda esta evolución tuvo su correspondiente reflejo en las resoluciones de los tribunales y juzgados, muchas de las cuales han propiciado algunos de aquellos cambios legislativos{ pero la dispersión de los criterios utilizados por los Tribunales de Justicia -incrementada por los escasos pronunciamientos de la sala segunda del Tribunal Supremo- ha dificultado sobremanera la aplicación diaria del Derecho en esta materia. Por ese motivo, esta obra es especialmente útil y práctica y facilitará enormemente el trabajo de todos los operadores jurídicos interesados en conocer las decisiones judiciales referidas a los delitos de tráfico. Las autoras -dos juristas de gran preparación y dilatada experiencia- analizan las numerosas resoluciones que han tratado la gran variedad de problemas surgidos en torno a las infracciones cometidas con motivo de la circulación de vehículos de motor, las abundantes controversias doctrinales plasmadas en ellas y su recopilación, organización y síntesis para poder ser contrastadas con vista a la utilización en la actividad profesional de cualquier jurista. Un exhaustivo y minucioso trabajo de las resoluciones de todo tipo de tribunales -Constitucional, Supremo y Audiencias Provinciales, fundamentalmente- que se completa con los criterios del fiscal de sala de Seguridad Vial.

The story of Operation Ottawa, the cold case detection of John Cooper for two Pembrokeshire double killings: the Scoveston

Manor murder of Richard and Helen Thomas in 1985 and the Pembrokeshire Coastal Path murder of Peter and Gwenda Dixon in 1989. Detective Chief Superintendent Steve Wilkins tells how he gathered a specialist team to review the murders, used cutting edge forensic techniques to prove Cooper's involvement in the crimes, and how the tv programme Bullseye led to a crucial identification. The dramatic timeline involves psychological profiling, intimidation by Cooper, the relationship between police and media in the arrest and the predicament of the victims' families during the long years when the cases remained unsolved. The combination of painstaking evidence gathering, new forensics, psychological profiling, and careful detection made Operation Ottawa the template for subsequent murder enquiries. Now, for the first time, the lead detective tells the story of how a vicious killer was brought to justice.

The heart-wrenchingly honest and fascinating new book from forensic pathologist and bestselling author of UNNATURAL CAUSES, Dr Richard Shepherd 'Enlightening, strangely uplifting . . . Shepherd's final chapter on death itself is a meditation of great beauty and light which puts all the darkness of the previous pages into perspective' DAILY MAIL 'Life-enhancing' DAILY TELEGRAPH 'Deeply insightful. Unflinching' THE TIMES 'Fascinating' DAILY EXPRESS 'This book is about death, but in it I will take readers on a journey through life . . .' _____ Dr Richard Shepherd, Britain's top forensic pathologist, has spent a lifetime close to the dead. As a medical detective, each autopsy he carries out is its own unique investigation, uncovering the secrets not only of how a person died, but also of how they lived. Through twenty-four of his most intriguing, enlightening and never-before-told cases, Dr Shepherd shares autopsies that span the seven ages of human existence, and have taught him as much about the marvels of life as the inevitability of death. From old to young, from murder to misadventure, and from illness to accidental death, each of these bodies has something to reveal: about human development, about mortality, about its owner's life story, about justice and even about Shepherd himself. From the bestselling author of Unnatural Causes comes a powerful, moving and above all reassuring book about death as it touches our own lives - how to understand it, and, when our time comes (as it must), how to embrace it as the last great adventure. _____ 'He has the ability to examine himself and other people with the same forensic eye that he applies to corpses - one of the reasons why his books feel so life-enhancing' Daily Telegraph Praise for Dr Richard Shepherd 'Gripping, grimly fascinating, and I suspect I'll read it at least twice' Evening Standard 'A deeply mesmerising memoir of forensic pathology. Human and fascinating' Nigella Lawson 'An absolutely brilliant book. I really recommend it, I don't often say that but it's fascinating' Jeremy Vine, BBC Radio 2 'Puts the reader at his elbow as he wields the scalpel' Guardian 'Fascinating, gruesome yet engrossing' Richard and Judy, Daily Express 'Fascinating, insightful, candid, compassionate' Observer

With its unique combination of classic Netter artwork, exam photos and videos, and rigorous evidence-based approach, Netter's Orthopaedic Clinical Examination, 3rd Edition, helps you get the most clinically significant information from every orthopaedic examination. This new edition, by Drs. Joshua Cleland, Shane Koppenhaver, and Jonathan Su, allows you to quickly review the reliability and diagnostic utility of musculoskeletal physical exams and make it easier to incorporate evidence into your clinical decision making. Extremely user-friendly and well organized, this unique text walks you through the anatomy and clinical exam, then critically reviews all literature for given diagnostic tests. A tabular format provides quick access to test reliability and diagnostic utility, study quality, anatomy and biomechanics, and summary recommendations for applying evidence in practice. Quality ratings for 269 studies, investigating a test's reliability using the 11-item Quality Appraisal of Diagnostic Reliability Checklist. Evidence-based approach helps you focus on the effectiveness of the clinical tests available and review recent studies quickly to determine which test will best predict a specific diagnosis. 84 new studies, 34 new photos and 25 new videos on Student Consult. QAREL (Quality Appraisal for Reliability Studies) checklists included for each reliability study.

Este manual se realiza con el objetivo de recoger toda la información relativa a la actualización del nuevo baremo para la valoración de los daños y perjuicios causados a las personas en accidentes de circulación que vio la luz a finales de 2015, haciéndose efectivo a comienzos de 2016. Su autor, el profesor César Borobia, especialista en Medicina legal y forense, recoge en este nuevo título un tema de gran interés y actualidad que hasta ahora no ha sido analizado en otros manuales. El contenido se divide en tres partes que abordan, además de las novedades legislativas y su interpretación, cuestiones relacionadas con la historia de los baremos de valoración del daño corporal. El interior del manual, presentado a dos colores, facilita la localización de la información y se utiliza para resaltar la comparación entre el baremo de tráfico anterior y el recientemente aprobado en 2016, siendo de gran utilidad para que el lector detecte rápidamente las novedades incluidas en este último texto legislativo. Se recogen en este título todas las novedades legislativas surgidas entorno a esta cuestión, convirtiéndose en un contenido de gran interés tanto para médicos forenses como para todas aquellas personas vinculadas a la tramitación de seguros. Obra que recoge la actualización del nuevo baremo de tráfico, que se hizo efectivo a comienzos de 2016 para la valoración de los daños y perjuicios causados a las personas en accidentes de circulación. se recogen en este título todas las novedades legislativas surgidas entorno a esta cuestión, así como su interpretación u otros aspectos históricos relacionados con este tipo de legislación. Diseñado a dos colores, facilita la localización de la información y la comparación entre el nuevo baremo y el antiguo, ofreciendo así al lector la posibilidad de que detecte de manera rápida las novedades incluidas en el último texto legislativo. La obra va dirigida a los peritos y a todos aquellos profesionales que trabajen en la valoración del daño corporal derivado de los accidentes de tráfico, como son los médicos forenses o todas aquellas personas vinculadas a la tramitación de seguros.

The privatization of security understood as both the top-down decision to outsource military and security-related tasks to private firms and the bottom-up activities of armed non-state actors such as rebel opposition groups, insurgents, militias, and warlord factions has implications for the state's monopoly on the legitimate use of force. Both top-down and bottom-up privatization have

significant consequences for effective, democratically accountable security sector governance as well as on opportunities for security sector reform across a range of different reform contexts. This volume situates security privatization within a broader policy framework, considers several relevant national and regional contexts, and analyzes different modes of regulation and control relating to a phenomenon with deep historical roots but also strong links to more recent trends of globalization and transnationalization. Alan Bryden is deputy head of research at the Geneva Centre for the Democratic Control of Armed Forces (DCAF). Marina Caparini is senior research fellow at the Geneva Centre for the Democratic Control of Armed Forces (DCAF).

This expert volume in the Diagnostic Pathology series is an excellent point-of-care resource for practitioners at all levels of experience and training. Specifically designed to assist hospital pathologists and assistants, forensic pathology fellows, pathology residents, and medical examiners, it provides a comprehensive, authoritative discussion of key topics in forensic autopsy. Richly illustrated and easy to use, Diagnostic Pathology: Forensic Autopsy is a one-stop reference on the performance of procedures in this challenging field, ideal as a day-to-day reference or as a reliable training resource. Provides expert guidance on accurate diagnoses of the findings and patterns encountered in the forensic autopsy, as well as cause of death procedures Covers key topics such as opioid and drug deaths, including new drugs and their toxicology; deaths and investigations in custody; infant and child deaths, including SIDS and overlaying; and infant and child neck trauma, including shaken baby syndrome Contains the necessary information to aid in the performance of both routine and complicated forensic autopsies Features hundreds of high-quality images throughout, including full-color illustrations and clinical and gross pathology photographs—all carefully annotated to highlight the most diagnostically significant factors Features a templated, highly formatted design; concise, bulleted text; key facts in each chapter; and an extensive index for easy reference Offers authoritative, readable coverage for those who need to learn and understand important aspects of forensic autopsy, including coroners, medico-legal death investigators, and legal investigators

From the author of Future Shock, a striking way out of today's despair . . . a bracing, optimistic look at our new potentials. The Third Wave makes startling sense of the violent changes now battering our world. Its sweeping synthesis casts fresh light on our new forms of marriage and family, on today's dramatic changes in business and economics. It explains the role of cults, the new definitions of work, play, love, and success. It points toward new forms of twenty-first-century democracy. Praise for The Third Wave

Toffler has proven again that he is a master.”United Press International “Toffler has imagination and an ability to think of various future possibilities by transcending prevailing values, assumptions and myths.”Associated Press “Once you have walked into his version of the future, you may decide never again to whitewash some of the built-in frailties of the real present.”Financial Post “Rich, stimulating and basically optimistic . . . will unquestionably aid many to a greater understanding of [today's] puzzling social changes.”The Globe & Mail “A detailed breathtakingly bold projection of the social changes required if we are to survive. . . . Toffler's vision of a democratic, self-sustaining utopia is a brave alternative to recent grim warnings.”Cosmopolitan

Dealing with some of the most heinous crimes imaginable, forensic neuropsychologist and psychoanalyst Dr. Richard Lettieri gives a behind-the-scenes look at criminal psychology through case studies from his over 30 years of experience as a court-appointed and privately retained psychologist. With cases like Michael, who stabbed his mother in the back believing she was the evil force causing the sun to descend upon the earth and gobble him up, and Tina, who seriously injured her boyfriend and stabbed his son to death, Decoding Madness is filled with gripping stories and forensic analysis. Through psychological examination, it is the author's job to conclude whether these individuals are truly guilty and understand their actions are wrong, or if these individuals are not guilty by reason of insanity and instead require treatment. Decoding Madness offers a nuanced psychological understanding of defendants and their personal complexities beyond the usual clinical accounts. The book introduces the novel idea of the daimonic as a basic force of human nature that is the source of our constructive and destructive capacities and argues for an update to the criminal justice system's perspective on rationality and conscious thinking. Featuring new findings and personal insights, Dr. Lettieri presents an engrossing view of the psychology of defendants accused of committing heinous crimes and the insight that they provide towards the human mind.

A comprehensive treatment of linear mixed models, focusing on examples from designed experiments and longitudinal studies. Aimed at applied statisticians and biomedical researchers in industry, public health organisations, contract research organisations, and academia, this book is explanatory rather than mathematical rigorous. Although most analyses were done with the MIXED procedure of the SAS software package, and many of its features are clearly elucidated, considerable effort was put into presenting the data analyses in a software-independent fashion.

En pocos seguros como en este se alcanza tamaño grado de socialización del daño sufrido y a la vez una mayor interrelación entre responsabilidad civil y seguro. Interrelación que lo abarca, que lo toca, que alcanza todo. Y que desde un plano práctico llega a cualquier fenómeno, actividad de la vida humana. Desde lo puramente contractual hasta lo extracontractual. Desde actos normales y cotidianos de la vida o del desarrollo de la vida humana a actividades de riesgo y de exposición. Desde la propia responsabilidad civil de la vida privada o familiar hasta la responsabilidad civil nuclear, pasando por la de vehículos, explotación, profesionales liberales y un larguísimo etc. Un grado de socialización que también lleva, nos lleva, a preguntarnos por cuáles son los límites de la asegurabilidad de la responsabilidad, -límites de la aseguración- del riesgo de responsabilidad. Límites jurídicos sin duda, desde la ley al orden público y la moral, hasta la actuación ilícita, intencional del asegurado. Pero también límites técnicos de asegurabilidad. Sin ir más lejos, la intencionalidad, los errores, la imprudencia y los comportamientos volitivos dolosos e intencionados del asegurado respecto al riesgo y su hacer o no hacer. Esta obra completa el catálogo de Thomson-Reuters Aranzadi.

Review of previous edition: "Trevor Kletz's book makes an invaluable contribution to the systematic, professional and scientific approach to accident investigation". The Chemical Engineer Fully revised and updated, the third edition of Learning from Accidents provides more information on accident investigation, including coverage of accidents involving liquefied gases, building collapse and other incidents that have occurred because faults were invisible (e.g. underground pipelines). By analysing accidents that have occurred Trevor Kletz shows how we can learn and thus be better able to prevent accidents happening again. Looking at a wide range of incidents, covering the process industries, nuclear industry and transportation, he analyses each accident in a practical and non-theoretical fashion and summarises each with a chain of events showing the prevention and mitigation which could have occurred at every stage. At all times Learning from Accidents, 3rd Edition emphasises cause and prevention

rather than human interest or cleaning up the mess. Anyone involved in accident investigation and reporting of whatever sort and all those who work in industry, whether in design, operations or loss prevention will find this book full of invaluable guidance and advice.

El libro es fruto del trabajo realizado durante varios años por un grupo de investigadores. Delitos contra la seguridad del tráfico: un análisis dogmático, criminológico y político criminal. El libro está dividido en capítulos que corresponden a unidades temáticas: introducción y parte general, delitos imprudentes de homicidio o lesiones relacionados con la seguridad vial, omisión del deber de socorro, delitos contra la seguridad del tráfico, valoración político-criminal, contenidos criminológicos, responsabilidad civil, procedimiento.

The Seven Ages of Death

Tratado del Contrato de Seguro (Tomo III)

A Comparative Outline

The New European Criminology gathers together leading criminologists from all over Europe to consider crime and responses to crime within and across national borders. For the first time it allows students to experience the most exciting work in European criminology and to compare approaches to crime in different parts of Europe. The five sections of the book look at: * the effects of European harmonisation on crime * criminal justice, law enforcement and penal reform * organised crime, from the Mafia in Italy to drug running in the Balkans * local crime in international contexts * possible future directions for criminology and some suggestions for a new criminology of war.

Las lesiones es uno de los fenómenos criminales más frecuentes en nuestro país. En muchas ocasiones el agresor se adelanta a denunciar los hechos, simulando ser el agredido, siendo relativamente frecuentes la acusación y denuncias falsas, así como el falso testimonio de testigos que comparecen en el procedimiento. En la presente obra, su autora no se limita al estudio de los tipos más graves de lesiones, abordando cuestiones generales, tales como las dificultades que se presentan para delimitar el delito de la falta de lesiones. Por lo que respecta a la causalidad, se ocupa de las dificultades con las que se enfrentan tanto la doctrina como la jurisprudencia. No es fácil conocer si la verdadera intención del autor era lesionar o matar.

The emphasis of this book is on those aspects of medical genetics most useful in a modern clinical practice.

Clinical aspects of molecular genetics research have been incorporated throughout the spectrum of genetically

determined diseases.

A people's writings can play a dramatic role in nation building, as the development of modern Hebrew literature powerfully illustrates. Since the end of the nineteenth century, Hebrew writers in Europe and Palestine/Israel have produced texts and consolidated moments in the shaping of national identity. Yet, this process has not always been a unified and continuous one. The processes of canon formation and the suppression of heterodox discourses have been played out publicly and vociferously. Producing the Modern Hebrew Canon offers a sweeping view of the entirety of modern Hebrew literature, from Berdichevski and Agnon to Shammass and Habiby, shedding light on the moments of rupture and reversal which have undermined efforts to construct a hegemonic Zionist narrative. It provides a model for understanding the relations between minority and majority voices in postcolonial situations, showing these processes working and changing over time, from the earliest days of the creation of a labor Zionist sensibility for literature to Israeli state culture and the discourses of Arab otherness. By illuminating both the process of canon formation as well as the voices excluded from the canon, Producing the Modern Hebrew Canon offers a powerful alternative reading of twentieth century Hebrew fiction.

Linear Mixed Models in Practice

Cross-border claims for personal injuries are becoming more common. Furthermore, European nationals increasingly join class actions in the USA. These tendencies have created a need to know more about the law of damages in Europe and America. Despite the growing importance of this subject, there is a dearth of material available to practitioners to assist them in advising their clients as to the heads of damage recoverable in other countries. This book aims to fill that gap by looking at the law in England, Germany and Italy. It sets out the raw data in the wider context of tort law, then provides a closer synthesis, largely concerned with methodological issues, and draws some comparative conclusions.

La Ley 35/2015, de 22 de septiembre, de reforma del sistema para la valoración de los daños y perjuicios causados a las personas en accidentes de circulación ha supuesto una profunda modificación, en muchos aspectos, del anterior régimen legal indemnizatorio en automóviles, que estuvo en vigor hasta el 1 de enero de 2016. El objetivo de este libro se centra en abordar, de una manera asequible, el estudio individualizado de cada uno de los artículos que componen el actual Sistema de Valoración. La voluntad didáctica de este trabajo se aprecia, entre otros aspectos, por los numerosos cuadros y esquemas que incorpora, dirigiéndose hacia el amplio colectivo de tramitadores, jefes de siniestros, abogados, jueces, mediadores y profesionales en

general cuya actividad se desarrolla en el ámbito del derecho de la circulación. La complejidad del denominado "nuevo baremo", que aglutina conceptos jurídicos, médicos y actuariales en una Ley de 507 páginas, más otras casi 300 de bases técnicas actuariales, demanda la publicación de estudios que aclaren conceptos, faciliten su comprensión, ayuden a la formación y ofrezcan las diversas pautas interpretativas que en esta fase inicial de su vigencia puedan darse. Para ello, tomando como referencia el anterior Sistema, se explican los antecedentes de lo que se ha conservado y se resaltan aquellos aspectos novedosos, en los cuales se acentúa su estudio. El libro incorpora una síntesis de la doctrina consolidada de los Tribunales en aquellos aspectos que la reforma no ha alterado; así como los criterios básicos que, acordes con la nueva regulación, se han impartido desde la Fiscalía en aras de conseguir su unidad de actuación en la materia.

This book presents the results of the most wide-ranging survey ever conducted by an independent body or government agency into the experiences of ordinary citizens as they grapple with the kinds of problems that could ultimately end in the civil courts. The survey identifies how often people experience problems for which there might be a legal solution and how they set about solving them.

Wissenschaftler und Praktiker aus mehreren europäischen Ländern befassen sich in dem Band mit Grundfragen der Haftung für die Herstellung und Verwendung künstlicher Intelligenz. Sie entwickeln vor dem Hintergrund der Gesetzgebungsinitiativen auf nationaler und europäischer Ebene (wie der Resolution des Europäischen Parlaments über "Civil Law Rules on Robotics") Analysen und Lösungsvorschläge zur Fortentwicklung der Produkthaftung, zur Anpassung traditioneller Konzepte des Deliktsrechts und zur Funktion von Gefährdungshaftungstatbeständen. Die Reihe der "Münster Colloquia on EU Law and the Digital Economy" wendet sich damit einer vordringlichen Herausforderung für Rechtswissenschaft und Praxis zu. Mit Beiträgen von Cristina Amato, Georg Borges, Jean-Sébastien Borghetti, Giovanni Comandé, Ernst Karner, Bernhard Koch, Sebastian Lohsse, Eva Lux, Miquel Martí-Casals, Reiner Schulze, Gerald Spindler, Dirk Staudenmayer, Gerhard Wagner, Herbert Zech Dimensiones y desafíos del seguro de responsabilidad civil

The field of artificial intelligence (AI) has made tremendous advances in the last two decades, but as smart as AI is now, it is getting smarter and becoming more autonomous. This raises a host of challenges to current legal doctrine, including whether AI/algorithms should count as 'speech', whether AI should be regulated under antitrust and criminal law statutes, and whether AI should be considered as an agent under agency law or be held responsible for injuries under tort law. This book contains chapters from US and international law scholars on the role of law in an age of increasingly smart AI,

addressing these and other issues that are critical to the evolution of the field.

Este tomo, el tercero del Tratado de Contrato de Seguro, aborda el análisis y estudio de la categoría y naturaleza de los seguros de personas, para abordar minuciosa y detalladamente los principales tipos de seguros que cubren los riesgos de la vida, la salud, la enfermedad, accidentes, dependencia, decesos y un largo etcétera para pasar además a abordar los seguros marítimos y aéreos, entre ellos los más modernos sobre aseguramiento de drones. Una obra rigurosa, extensa y única en nuestro ordenamiento que acerca, desmenuza, cuestiona, sugiere, replantea desde múltiples ópticas, tanto jurídica, como económica, pero también ontológica filosófica los principios y elementos del seguro y su funcionalidad.

The WTO Annual Report 2013 provides a brief summary of the organization, an overview of 2012 and a detailed review of the WTO's main areas of activity: trade negotiations; implementation of WTO agreements and trade monitoring; dispute settlement; building trade capacity; and outreach. It also includes a personal message from the Director-General, who reflects on the events of 2012 and the challenges that lie ahead.
