*An Examination of the Possibility of Setting Up a University College in Mauritius*

**A common approach to understanding the functional repertoire of a genome is through functional genomics. With systems biology burgeoning, bioinformatics has grown to a larger extent for plant genomes where several applications in the form of protein-protein interactions (PPI) are used to predict the function of proteins. With plant genes evolutionarily conserved, the science of bioinformatics in agriculture has caught interest with myriad of applications taken from bench side to in silico studies. A multitude of technologies in the form of gene analysis, biochemical pathways and molecular techniques have been exploited to an extent that they consume less time and have been cost-effective to use. As genomes are being sequenced, there is an increased amount of expression data being generated from time to time matching the need to link the expression profiles and phenotypic variation to the underlying genomic variation. This would allow us to identify candidate genes and understand the molecular basis/phenotypic variation of traits. While many bioinformatics methods like expression and whole genome sequence data of organisms in biological databases have been used in plants, we felt a common reference showcasing the reviews for such analysis is wanting. We envisage that this dearth would be facilitated in the form of this Springer book on Agricultural Bioinformatics. We thank all the authors and the publishers Springer, Germany for providing us an opportunity to review the bioinformatics works that the authors have carried in the recent past and hope the readers would find this book attention grabbing.**

**Agriculture and Trade Liberalisation Extending the Uruguay Round Agreement**

**The Derivation of the Estimates**

**Annual Report, Secretary of the State Board of Agriculture, State of Michigan and ... Annual Report, Agricultural Experiment Station**

**Agricultural Bioinformatics**

**Changing Childhoods in the Cape Colony**

**Gross National Product, Canada, 1870-1926: The Derivation of the Estimates sets out in detail the sources of data and methods employed to obtain annual estimates of the gross national product of Canada between 1870 and 1926. Many other data used in compilation of the estimates or as a basis for assessing the accuracy of the estimates are also provided. This information is an important contribution to Canadian economic history, revealing growth and fluctuations in the Canadian economy and providing research material for other scholars.**

Hearings, Reports and Prints of the Senate Committee on Agriculture, Nutrition, and Forestry

General Farm Bill of 1985: Domestic hunger, food stamp program, and temporary emergency food assistance program

Bulletin - Kentucky Agricultural Experiment Station, University of Kentucky

This book opens up histories of childhood and youth in South African historiography. It looks at how childhoods changed during South Africa's industrialisation, and traces the ways in which institutions, first the Dutch Reformed Church and then the Cape government, attempted to shape white childhood to the future benefit of the colony.
