

*Air Force Nco Course 15  
Study Guides*

The USAir Force human capital management (HCM) system is not easily defined or mapped. It affects virtually every part of the Air Force because workforce policies, procedures, and processes impact all offices and organizations that include Airmen and responsibilities and relationships change regularly. To ensure the readiness of Airmen to fulfill the mission of the Air Force, strategic approaches are developed and issued through guidance and actions of the Office of the Deputy Chief of Staff for Manpower, Personnel and Services and the Office of the Assistant Secretary of the Air Force for Manpower and Reserve Affairs. Strengthening US Air Force Human Capital Management assesses and strengthens the various U.S. Air Force initiatives and programs working to improve person-job match and human capital management in coordinated support of optimal mission capability. This report considers the opportunities and challenges associated with related interests and needs across the USAF HCM system as a whole, and makes recommendations to inform improvements to USAF personnel selection and classification and other critical system components across career trajectories. Strengthening US Air Force Human Capital Management offers the Air Force a strategic approach, across a connected HCM system, to develop 21st century human capital capabilities essential for the success of 21st century Airmen.

The old NCOA Course 15 has been phased out and replaced with NCO DLC. Everyone still calls it Course 15 across several mediums online. There was a gap in the way people are studying for this course and I dug around trying to figure it out. I put this guide and notebook together based on my findings. If you did not know yet all the quiz and flashcard resources you have been using online are considered against the policy. But even beyond that, they simply do not help you on your quest to get NCO DLC done. Tips and Tricks

Rules and Regulations Clear Cut Study Method

Organized Notetaking by Module This is the best answer to what's out there currently. This is the first edition and we will keep improving with user feedback within the rules of Academic Integrity and Test Compromise. While some of this might seem basic, you would be shocked to find out when asked, how many people will just 'wing it' with testing and not really read the content and just test to gauge where they are with their knowledge. This course is made to be a challenge with a purpose. We created a note-taking section simply broken down by the module so that you can easily go back through and take important notes as you go through the course material. The 3 Course Modules Are: Course Foundation Leadership and Management Operational Airman Did you know the Air Force has said: "The contact time required to complete NCO DLC is 78 hours. Given that Air University recommends students devote 2 hours of additional study time for each course contact hour, the total

time required to master the materials and effectively prepare for course exams is 234 hours. This should not be confused with a 'How To Study' book. You should study the content based on what kind of learner you are. This is an organized method of breaking down the content in the most simple way possible using the information and specific instructions given. Get your copy today and get the most out of your next tier of professional military education.

The Enlisted Experience

Offers a vivid, candid, and highly personal account of military life by four of the first five Chief Master Sergeants of the Air Force -- Paul W. Airey, Donald L. Harlow, Thomas N. Barnes, and Robert D. Gaylor. Their recollections, captured in a 1987 interview, cover a period over thirty years -- from the early 1940s to the late 1970s and illuminate much of the history and heritage surrounding the ranks from the perspective of the highest position available to an enlisted member of the Air Force. They came to fight for freedom and their country, they came to fight Germans. Men of the Polish Air Force, who had escaped first to France and then to Britain, to fly alongside the Royal Air Force just as Fighter Command faced its greatest challenge the Battle of Britain. Many of the Polish airmen joined existing RAF squadrons. The Poles also formed their own squadrons, but only four became operational during the Battle of Britain: Nos. 300 and 301, were bomber squadrons, with another two, Nos. 302 and 303, being fighter squadrons. Flying Hawker Hurricanes, both 302 and 303 squadrons were active by the middle of August 1940, just when they were most needed, at the height of the Battle of Britain, with Fighter Command stretched to its limit. The Polish squadrons, battle-hardened from their encounters with the Luftwaffe during the invasion of Poland and Battle of France, soon made their mark. In particular, 303 Squadron became the highest-scoring unit of Fighter Command. In total, 145 Polish pilots, the largest non-British contingent in Fighter Command at the time, fought in the Battle of Britain. While Winston Churchill praised the contribution of the Few, the pilots of many nationalities who had defended Britain, Air Chief Marshal Sir Hugh Dowding was more specific: Had it not been for the magnificent material contributed by the Polish squadrons and their unsurpassed gallantry, I hesitate to say that the outcome of the Battle would have been the same.

This handbook implements AFD 36-22, Air Force Military Training. Information in this handbook is

primarily from Air Force publications and contains a compilation of policies, procedures, and standards that guide Airmen's actions within the Profession of Arms.

This handbook applies to the Regular Air Force, Air Force Reserve and Air National Guard. This handbook contains the basic information Airmen need to

understand the professionalism required within the Profession of Arms. Attachment 1 contains references and supporting information used in this publication. This

handbook is the sole source reference for the development of study guides to support the enlisted promotion system. Enlisted Airmen will use these study guide to prepare for their Promotion Fitness Examination (PFE) or United States Air Force Supervisory Examination (USAFSE).

Message of the President of the United States

Transmitting the Budget for the Service of the Fiscal Year Ending ...

**Eagle pilot Rick “Kluso” Tollini’s life has embodied childhood dreams and the reality of what the American experience could produce. In his memoir, Call Sign KLUSO, Rick puts the fraught minutes above the Iraqi desert that made him an ace into the context of a full life; exploring how he came to be flying a F-15C in Desert Storm, and how that day became a pivotal moment in his life. Rick’s first experience of flying was in a Piper PA-18 over 1960s’ California as a small boy, and his love of flying through his teenage years was fostered by his pilot father, eventually blossoming into a decision to join the Air Force as a pilot in his late twenties. Having trained to fly jets he was assigned to fly the F-15 Eagle with the “Dirty Dozen,” the 12th Tactical Fighter Squadron, at Kadena AB, Japan before returning Stateside to the 58th Tactical Fighter Squadron “The Gorillas.” Throughout training, Reagan’s fighter pilots expected to face the Soviet Union, but Rick’s first combat deployment was Desert Storm. He recounts the planning, the preparation,**

**and the missions, the life of a fighter pilot in a combat zone and the reality of combat. Rick's aerial victory was one of 16 accumulated by the Gorillas, the most by any squadron during Desert Storm.**

**Returning from the combat skies of Iraq, Rick continued a successful fulfilling Air Force career until, struggling to make sense of his life, he turned to Buddhism. His practice led him to leave the Air Force, to find a new vocation, and to finally come to terms with shooting down that MiG-25 Foxbat in the desert all those years before. Most importantly, he came to a deeper understanding of the importance of our shared humanity.**
