Following in the tracks of the author's well-known Alfa DOHC tuning manual, Jim Kartalamakis describes all kinds of useful information and techniques to increase power, performance and reliability of V6 Alfas and their engines. This book is the result of much research and firsthand experience gained through many projects concerning Alfa V6 rear-wheel drive models, from the GTV6 series to the last of the 75 3.0 models. A wealth of completely new information can be found here regarding cylinder head mods, big brake mods, LSD adjustment procedure, suspension modifications for road and track, electrical system improvements, flowbench diagrams, dyno plots, and much more!

The Autodelta story, Alfa Romeo's more or less official racing department between 1963 and 1983. A tale of unforgettable victories, of two titles conquered in the World Championship for Marques, but also one of scalding defeats. Great names in the history of motorsport raced in the colours of the team born in the province of Udine and nurtured at Settimo Milanese including Ignazio Giunti, Nino Vaccarella, Andrea de Adamich and Toine Hezemans. All drivers who competed – under the aegis of the incomparable Carlo Chiti – at the wheel of unforgettable cars such as the Giulia TZ, the GTA, the 33 in its various guises, the Alfetta GT rally cars and

naturally the less successful Formula 1 machines. All this is revived in a book constructed around painstaking research and illustrated with hundreds of photographs, many of which previously unpublished

Compiled from 9 different previous official manuals, this massive book is packed with repair and maintenance information. Also covers Mk VII, VIII, and IX models. Includes wiring diagrams, drawings, and photos.

**There was nothing wrong with the 'old' Corvette but the 1967 Camaro and Chevy sedans were making it look dated. Styling chief, Bill Mitchell, settled for sweeping body lines. There were two extremes to the Corvette world, the shatteringly fast L88 models and the emissions-controlled cars of the mid-1970s. Yet through it all the Corvette name retained its magic. In 1969 there were no less than eight engine variations. This book is a compilation of road and comparisons tests, technical and specifications data, model introductions and buying used. Models covered include: coupT, convertible,**

*For Aston Martin the period 1981 to 1993 was a time of transition progressing from the DB body to the new Virage plus the takeover of the Company by Ford in the early 1990s. The fourth book in this series deals with the Gauntlet and Livanos period. These two rekindled the link with Zagato, who brought to life the V8 Zagato. The Lagonda V8 continued to keep their heads above water and they also gave support to a number of private racing teams. On the production front 1988 saw the brand new Virage, powered by a new 5.3 litre V8 and at the same time on the racing side there was the V8 AMR1 series of Group "C" racers. Money, however, was a problem, so when Ford made an offer Gauntlet and Martin wisely accepted. With Ford behind them, the V8 cars continued to increase in luxury and power and the AMR1 entered its first season of international racing. 1993 saw the establishment of Aston Martin based at the TWR works at Bloxham, near Banbury and it was from here that, in a year's time, an exciting new model would emerge.*

***A century of history constitutes an important goal and is even more significant if a prestigious marque like Alfa Romeo is celebrating it. To pay due tribute to such a significant event - and not only in automobile history - is a unique and exclusive book of which only 999 copies have been printed, all numbered and enclosed in an elegant slipcase that carries the famous metal emblem of the centenarian on its front. Apart from its format (the volume measures ....), the refined binding and the paper on which it is printed, this official book prepared in collaboration with Alfa Romeo and destined to celebrate this historic event, is an ambitious project especially due to its contents and illustrations, all unpublished and which come from the priceless Arese archives.***

Transform an average car or truck into a turbocharged high performance street machine. A handbook on theory and application of turbocharging for street and high-performance use, this book covers high performance cars and trucks. This comprehensive guide features sections on theory, indepth coverage of turbocharging components, fabricating systems, engine building and testing, aftermarket options and project vehicles. When you think of Alfa Romeo, it is the Italian ' s company ' s sports cars, above all, that fire the imagination, since they encapsulate everything

that is great about the brand. In successive dynasties of fixed-roof coupés and convertible spiders, Alfa Romeo has built one of the greatest canons of work of any car maker in the world. The appeal of Alfa Romeo's sports cars is, of course, partly down to their aesthetic eminence. A host of talented designers created their best work for Alfa – Giorgetto Giugiaro's Giulia Sprint GT, Franco Scaglione's 33 Stradale and Pininfarina's Duetto Spider, to name but a few – but style was only ever a part of the story. Drivers love Alfa Romeo coupés and spiders, too, because technically speaking, these cars were in a class of their own. Alfa Romeo consistently employed elements from much more expensive machinery, democratising them into its sports cars. One can cite gearboxes with multiple ratios, all-round disc brakes, lightweight aluminium engines, perfectly balanced weight distribution and many more. Alfa Romeo Coupes and Spider In Detail since 1945 celebrates Alfa Romeo's most iconic sporting machinery. From the earliest sports cars of its formative years right up to the present day, every Alfa coupé and spider is described in detail. Included are exotics like the 6C 2500 Freccia d'Oro, Montreal and 8C Competizione; focused enthusiast cars like the Giulietta Sprint Veloce, Giulia GTA and 4C; comfortable touring

machines such as the 2600 Spider and Giulia GTC; iconic “everyman” sports cars like the Giulia Spider, Alfetta GTV and Alfasud Sprint; and genuinely unique projects such as the ES-30 SZ. Also included are many coachbuilt cars, official concepts and show cars.

Exactly 100 years ago in 1910 at Portello on the outskirts of Milan, a new company was established in the still young world of motoring of the period: Alfa Romeo. A name which, in those 100 years, has become synonymous

with cars, so important has its presence been both on the industrial and sports fronts as well as culturally. In this long period of time, the celebrated Italian marque brought to life cars that have entered by right into the history of the automobile and not only that of Italy, like the 1900, the Giulietta and the Giulia. Yet at the same time the company was able to write its own unrepeatable pages in the annuals of motor sport, winning all the most important races: from the Mille Miglia to Le Mans, from the Tourist Trophy to the World Sports Car Championship. An epic about which just almost everything has been written; but this volume by a great authority on the subject in Maurizio Tabucchi aims to be a tribute to this tremendous story, told above all by pictures, many of them previously unpublished, and supported by brief but exhaustive texts.

Head gasket repairs, valve adjustments, camshaft timing, carb and SPICA fuel injection tuning, and driveshaft donut replacement are all explained.

Experienced, hands-on guidance that'll keep you in the drivers seat.

A SPEEDPRO manual providing information and advice about Weber DCOE and Dellorto DHLA high-performance sidedraught carburettors, covering stripping and rebuilding, tuning, jetting, choke sizes, and application formula.
