*Setting dance within a cultural context that is both understandable and interesting, this insightful reference captures the true art form of dance and traces the activity of dance as it existed down through the ages and all over the world. Beginning with the origins of dance and moving on to what takes place on Western dance stages today, this volume offers a sweeping overview of primitive, ethnic, and folk dance forms ... examines the major branches of Western dance art including ballet from its inception in 16th century Europe, modern dance, jazz, avant-garde, and the international eclectic contemporary scene ... tracks the repertory, technical training of performers, and creative theory of the many traditions that unify this art form ... includes discussions of significant dancers, their contributions, and the performers that inspired them; the background of period styles; pertinent ideas of major choreographers; capsule biographies of outstanding dance artists; effects of music and design on choreography; national characteristics of dance; the psychology of performers; and coverage on such concepts as Classic,*

*Romantic, and Avant-garde to clarify trends and invoke thought on the Dance Art and society ... and makes many comparisons to current day events. Suitable for anyone involved or interested in dance history. Please note this is a Gay Fiction title. After the untimely death of a former lover, Casey Bennet receives a letter from Julie's lawyer, begging Casey to help Julie's partner, Liz Kennedy, and their adorable, yet precocious three-year old, Skye, who are now alone. An avowed bachelorette, Casey has no idea what's in store when she grudgingly agrees to help Liz, who, by the way, is also pregnant and due in four months. Casey, Liz, and little Skye find themselves in for a hilarious, tender ride that will change their lives forever.*

*Aircraft Instrumentation and Systems has the adequate coverage to deal generally the topics for undergraduate course on Aircraft Instrumentation. It covers: An introduction to aircraft instruments and systems, Air data systems and air data computers, Navigation systems, Gyroscopic flight instruments, Engine instruments, Electronics flight instrument systems, Safety and warning systems. Every effort has been done to update the contents of the book to the present-day technology*

used in modern transport category aircraft manufactured by Boeing and Airbus industry. The text is profusely illustrated with block diagrams, schematic diagrams and a number of tables and glossary. Review questions have been included at the end of the each chapter for practice and self-study. The book is intended for teaching and study the topic for students of B.E., M.E. and students in Instrumentation Technology and Aircraft Engineering. It also introduces the subject to practising engineers and readers interested in aircraft instrumentation and to the flight crew. This book presents, in an innovative and effective way, a detailed coverage of Greek history from the period of colonisation through to the death of Alexander the Great. A prologue introduces the reader to the various types of source material used by historians, and wherever possible the most relevant examples of this - both written and archaeological - have been provided or referred to, giving the benefit of firsthand contact with the sources. The text would be used most effectively in conjunction with the most recent publication of the written sources. The book contains many photographs, maps and diagrams, and includes time lines,

*summaries, mapping exercises and study questions through which the reader comes to grip with the major issues. This is not only an excellent preparation for examinations in Ancient History, but also a very readable and entertaining account of the main periods in the history of ancient Greece.*

One year after the tsunami, this benefit fiction anthology helps teens learn about Japan and contribute to long-term relief efforts.

She fled Ireland because her life was in danger, now her troubles are worse... To escape a murderous stalker, Caitlin Fitzgerald flees her home in Ireland and takes a governess job in the top end of Australia, determined to guard her heart against further hurt. In her chosen safe haven, she has poisonous snakes, wild boar and crocodiles to contend with. She learns to deal with those. But there are two men at Tall Trees cattle station who test her resolve. The very handsome and moody station owner, Jake Monterey, who has issues of his own, and Harry Phillips, the big, easy-going station hand. Jake has two adorable children, and Caitlin loves her job, but when danger follows, must she flee again?

Spiritual warfare is real, and we are all involved whether we like it or not. The Bible plainly tells us that Satan schemes against humanity and that he wants to devour us. Daily we

struggle against Satan's strategies and desire to take over God's kingdom. This battle will not go away, and ignoring it could be disastrous. But don't be afraid. The victory is already won by Christ. No enemy is powerful enough to overcome the risen savior. In these pages, Mark Bubeck exposes the reality of the conflict and the hope believers have. He answers such questions as: What is Satan's strategy in spiritual warfare? Can a Christian be oppressed by demons? Can demonic affliction be passed down through family lines? What are the symptoms of demonic activity in a person's life? Having sold more than 350,000 copies worldwide, this bestseller will help the reader triumph in the battle against demonic activity by relying on the almighty and powerful Son of God.

Enjoyable World Literature anthology designed to stimulate literary, critical thinking, comprehension, and language-arts skills using a variety of literary genres, including short stories, poetry, biography, essays, speeches, drama, a novel, and Handbooks that reinforce writing and language-arts skills.

***To ensure product reliability, an organization must follow specific practices during the product development process that impact reliability. The second edition of the bestselling Product Reliability, Maintainability, and Supportability Handbook helps professionals identify***

*the shortcomings in the reliability practices of their organizations and empowers them to take actions to overcome them. The book begins by discussing product effectiveness and its related functions, presents the mathematical theory for reliability, and introduces statistical inference concepts as ways to analyze probabilistic models from observational data. Later chapters introduce basic types of probability distributions; present the concepts of confidence interval; focus on reliability assessment; and examine software reliability, quality, and safety. Use FMMEA to identify failure mechanisms Reflecting the latest developments in the field, the book introduces a new methodology known as failure modes, mechanisms, and effects analysis (FMMEA) to identify potential failure mechanisms. Shifting to a practical stance, the book delineates steps that must be taken to develop a product that meets reliability objectives. It describes how to combine reliability information from parts and subsystems to compute system level reliability,*

*presents methods for evaluating reliability in fault-tolerant conditions, and describes methods for modeling and analyzing failures of repairable products. The text discusses reliability growth, accelerated testing, and management of a continuous improvement program; analyzes the influence of reliability on logistics support requirements; shows how to assess overall product effectiveness; and introduces the concepts of process capability and statistical process control techniques. New Topics in the Second Edition Include: Failure Modes, Mechanisms, and Effects Analysis Confidence Interval on Reliability Metrics and their Relationships with Measures of Product Quality Process Control and Process Capability and their Relationship with Product Reliability System Reliability, including Redundancy*

*disturbing to sensitive readers. Hearts break. Souls shatter. Love lies in The Space Beyond. As members of the Phoenix, Jeric and Leni are thrust into their new lives, expected to lead Earth's Guardians. But Leni struggles with trusting her own soul, and Jeric is more concerned about keeping Leni safe than meeting others' demands. When Darkness swarms Lake Haven, they embark on their first mission with little preparation and no idea which soul the Dark hunts. Born and raised in Lake Haven, Bex hopes to escape her small-town life, ideally in the arms of her soul mate. She knows he exists, and her heart aches with the need to find him. When her long-lost mama calls to announce she's knockin' on death's door, Bex reluctantly makes the trip to see the uncaring bitch (bless her heart), only to be knocked off her feet by the sexy and charming Dr. Mason Hayes. Is he really The One? Leni's soul felt an instant connection to Bex, but if Bex found her soul mate, she isn't their mission. So who is, and why does Leni instinctively feel drawn to her? Can Leni even trust her intuition?*

**And will Jeric step up and lead when the time comes or continue to hold them back? If they don't learn to trust themselves and each other quickly, Darkness will claim them all...along with the rest of Earth's souls.**

**She had a fortune to her name. And it made her an irresistible target. A famous beauty, Marie de Rossan married the Marquis de Ganges in 1658. It appeared to be a happy match, but trouble began over the issue of Marie's will, and who stood to inherit her money. The Marquis' two brothers hounded her relentlessly, pressuring her to make revisions. And then, after months of threats, their campaign took a violent turn. A sordid tale of murder and greed, it's perfect subject matter for Alexandre Dumas' "Celebrated Crimes" series. The case also peeked the interest of the Marquis de Sade (who inspired behind the term 'sadism'), who wrote his own novel on the subject. Alexandre Dumas (1802 - 1870) was a hugely popular 19th century French writer. Born of mixed French and Haitian heritage, Dumas first rose to prominence in Paris as a playwright,**

*but later gained international fame with his historical fiction. Often co-authored with other writers, these stories wove together swashbuckling adventure, romance, and real events from France's past. Among the best known are "The Three Musketeers", and its sequels "Twenty Years After", and "Le Vicomte de Bragelonne: Ten Years Later". Set across four decades, this trilogy follows the rise of the dashing D'Artagnan—from hot-headed soldier to trusted captain under Louis XIV. Dumas' other novels include "The Count of Monte Cristo" and "The Black Tulip". His works have been adapted into more than 200 movies, including The Man in the Iron Mask starring Leonardo DiCaprio.*

*We spend most of our lives skating across surfaces, seldom stopping to think about the underpinnings and background stories that brought us to the current moment and place. Readers gain a solid understanding of Newtonian dynamics and its application to real-world problems with

Pytel/Kiusalaas' ENGINEERING MECHANICS:

DYNAMICS, 4E. This edition clearly introduces critical concepts using learning features that connect real problems and examples with the fundamentals of engineering mechanics. Readers learn how to effectively analyze problems before substituting numbers into formulas. This skill prepares readers to encounter real life problems that do not always fit into standard formulas. The book begins with the analysis of particle dynamics, before considering the motion of rigid-bodies. The book discusses in detail the three fundamental methods of problem solution: force-mass-acceleration, work-energy, and impulse-momentum, including the use of numerical methods. *My book is divided into twenty short poetic stories about a child's imagination. All the everyday normal days of a child are full of wonderful magic moments for him. His dog is green and walks across a log. His cat is going up a tree and coming down with a key. It's fun to hear a child tell about his imagined day. He talks excitedly about the ape he saw at the zoo. He knows it had a red cape. The sun shining on top of a mountain becomes a place to dream all day. The child sees planes, birds of every color, and soft feathery clouds that would fly up high. There's the apple tree that stole a kite. Where did it go? The kite was never seen again. The tree ate the kite. A child's imagination is a wonderful thing. By stories such as these, a child becomes aware of the magic in every day. It's waiting*
