*The Romance languages offer a particularly fertile ground for the exploration of the relationship between language and society in different social contexts and communities. Focusing on a wide range of Romance languages - from national languages to minoritised varieties - this volume explores questions concerning linguistic diversity and multilingualism, language contact, medium and genre, variation and change. It will interest researchers and policy-makers alike.*

*Geographers is an annual collection of studies on individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world, and include famous names as well as those less well known, including explorers, independent thinkers and scholars. Each paper describes the geographer's education, life and work and discusses their influence and spread of academic ideas. Each study includes a select bibliography and a brief chronology. The work includes a general index, and a cumulative index of geographers listed in volumes published to date.*

*Published under the auspices of the International Geographical Union.*
