Ascension: Part Two

In her acclaimed novels, Susan Vreeland has given us portraits of painting and life that are as dazzling as their artistic subjects. Now, in The Forest Lover, she traces the courageous life and career of Emily Carr, who—more than Georgia O'Keeffe or Frida Kahlo—blazed a path for modern women artists. Overcoming the confines of Victorian culture, Carr became a major force in modern art by capturing an untamed British Columbia and its indigenous peoples just before industrialization changed them forever. From illegal potlatches in tribal communities to artists' studios in pre-World War I Paris, Vreeland tells her story with gusto and suspense, giving us a glorious novel that will appeal to lovers of art, native cultures, and lush historical fiction.

Some of the Praise for No Sense of Obligation . . . fascinating analysis of religious belief -- Steve Allen, author, composer, entertainer [A] tour de force of science and religion, reason and faith, denoting in clear and unmistakable language and rhetoric what science really reveals about the cosmos, the world, and ourselves.

Michael Shermer, Publisher, Skeptic Magazine; Author, How We Believe: The Search for God in an Age of Science About the Book Rejecting belief without evidence, a scientist searches the scientific, theological, and

philosophical literature for a sign from God--and finds him to be an allegory. This remarkable book, written in the layperson's language, leaves no room for unproven ideas and instead seeks hard evidence for the existence of God. The author, a sympathetic critic and observer of religion, finds instead a physical universe that exists reasonlessly. He attributes good and evil to biology, not to God. In place of theism, the author gives us the knowledge that the universe is intelligible and that we are grownups, responsible for ourselves. He finds salvation in the here and now, and no ultimate purpose in life, except as we define it.

Layla With her family whole once more, Layla yearns for a break from the battles so she can spend time with her coven, but danger pursues her around every turn, stalking her with new and terrifying magic. She doesn't know how to fight it, and she has more on the line than ever before. Quin Despite the stress and sleepless nights, having a family with Layla is Quin's dream come true, and he'd do anything to extend their time at home. But even though loving an angel is easy, avoiding her perilous fate is impossible. The Enemy While the Dark Guild embarks on a ruthless campaign to replace their slain soldiers, they've hired Vortigern — the vile master of the world's most powerful mind meddlers— to hunt down the earth angel and destroy her. Spurred by the promise of unimaginable wealth and power, Vortigern will stop at nothing to get the job done. A scientist known for unraveling the complexities of the universe over millions of years, Sir Martin Rees now warns that humankind is potentially the maker of its own demise -- and that of the cosmos. Though the twenty-first century could be the critical era in which life on Earth spreads beyond our solar system, it is just as likely that we have endangered the future of the entire universe. With clarity and precision, Rees maps out the ways technology could destroy our species and thereby foreclose the potential of a living universe whose evolution has just begun. Rees boldly forecasts the startling risks that stem from our accelerating rate of technological advances. We could be wiped out by lethal "engineered" airborne viruses, or by rogue nano-machines that replicate catastrophically. Experiments that crash together atomic nuclei could start a chain reaction that erodes all atoms of Earth, or could even tear the fabric of space itself. Through malign intent or by mistake, a single event could trigger global disaster. Though we can never completely safeguard our future, increased regulation and inspection can help us to prevent catastrophe. Rees's vision of the infinite future that we have put at risk -- a cosmos more vast and

diverse than any of us has ever imagined -- is both a work of stunning scientific originality and a humanistic clarion call on behalf of the future of life.

Layla Callaway has found comfort in her new role as a coven member, and she's declared her love for the heartthrob who led her home, but as beautiful as her life appears, it's shadowed by the evil threatening to rip it away.

Ready or not, the battle had begun. Layla Despite the battles fought and the lives lost, the past year has been the most magical of Layla's life. Quin's love has carried her through the toughest trials while familial bonds fueled her with hope for a brighter tomorrow. But she vows to leave it all behind as she charges into the final fight, because this time, she has no intention of surviving. Quin More than anything in the world, Quin wants to save Layla's life, and should she fall, he plans to follow her into death's mysterious abyss. But the angel has placed her trust in an enemy, and Quin fears the secrets she's keeping will tear them apart in the final hour. The Enemy Dreagan's power now rivals the gods and goddesses, his new body sturdy and strong, and his undead army swells with countless souls ready to slay every witch in the world for him, but he is concerned with only one. Willa's angel is coming for him. Should she manage to maneuver through his traps and carve through his soldiers, Dreagan is ready to destroy her, just as he did her creator.

Ascension: Part One

The Assist

The conflicts between love and hate, good and evil, and life and art are explored in a portrait of Alaric Darconville, a twenty-nine-year-old professor at Quinsy College--a women's college in Virginia--who falls in love with and is jilted by one of his students

"Pollan keeps you turning the pages . . . cleareyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what

was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

On 20th May the Indian summer monsoon will begin to envelop the country in two great wet arms, one coming from the east, the other from the west. They are united over central India around 10th July, a date that can be calculated within seven or eight days. Alexander Frater aims to follow the monsoon, staying sometimes behind it, sometimes in front of it, and everywhere watching the impact of this extraordinary phenomenon. During the anxious period of waiting, the weather forecaster is king, consulted by pie-crested cockatoos, and a joyful period ensues: there is a period of promiscuity, and scandals proliferate. Frater's journey takes him to Bangkok and the cowboy town on the Thai-Malaysian border to Rangoon and Akyab in Burma (where the front funnels up between the mountains and the sea). His fascinating narrative reveals the exotic, often startling, discoveries of an ambitious and irresistibly romantic adventurer.

Some prophecies are downright deadly... Amelie Bennett. . . . Ending the world, one prophecy at a time. I was born to slay Crossworld demons. Big black flappy ones, little green squirmy ones. Unfortunately, the only thing getting slain these days is my social life. With my high school under attack, combat classes intensifying, and Academy instructors dropping right and left, I can barely get my homework done, let alone score a bondmate before prom. Then he shows up. Jackson Smith-Hailey. Unspeakably hot, hopelessly unattainable, and dangerous in all the right ways. Sure, he's my trainer. And okay, maybe he hates me. Doesn't mean I'll ignore the wicked Guardian chemistry between us. It's crazy! Every time I'm with him, my powers explode. Awesome, right? Wrong. Now my teachers think I'm the murderous Graymason destined to bring down our whole race of angelbloods. Everyone in New Orleans is hunting me. The people I trusted want me dead. Jack and I have five days to solve the murders, prevent a vampire uprising, and thwart the pesky prophecy foretelling his death by my hand.

Shouldn't be too difficult. Getting it done without falling in love. . . that might take a miracle. Each book in the Angel Academy series is a standalone, full-length story that can be enjoyed out of order. Series Order: Book 1: Prophecy Girl Book 2: Conspiracy Boy
