Modular
construction A
modern
construction
method whereby
the building is
constructed using

prefabricated or pre-assembled building sections or modules. The three-dimensional building sections are typically fabricated and assembled in an enclosed factory environment and then delivered to site, ready for

Modular construction is aimed at minimising construction time by standardising design components, providing consistent quality and allowing site preparation and

its introduction. Students and practitioners, both in the UK and elsewhere in the world where Eurocode 2 has been adopted, will find it a concise guide both to the basic theory and to appropriate design

procedures.

Design charts, tables and formulae are included as design aids and, for ease of reference, an appendix contains a summary of important design information.

Features of the seventh edition

are:

- Completely revised to reflect recent experience of the usage of Eurocode 2 since its introduction in 2004 and its adoption in the UK as a design standard in 2010
- Further examples of the theory put into practice
- A
