Chemistry definitions, formulas, and structures are presented in question form on 500 separate flash cards, with explanations and chemical reactions indicated on the reverse side. This boxed set of 4 1/2" x 2 3/4" flash cards is designed with a punch hole in one corner of each card. The hole will accommodate a metal key-ring-style card holder enclosed with the cards. Using the holder, students can arrange the flash cards for their Q and A sessions in any sequence that suits their needs--perhaps by general topic, or alternately by leaving out cards with questions and answers that test takers already know well.

Updated to reflect the most recent Advanced Placement exams, this new edition presents a diagnostic test and two full-length Physics C practice tests with questions answered and explained. Physics C problems, as designed by the Educational Testing Service, are those that require use of calculus for their solutions. In addition to practice exams, this manual presents a detailed review of AP physics topics, which include Newtonian mechanics, electricity and magnetism, and all other related AP test topics. Additional aids for test takers include a general overview of the AP exam, study advice, test-taking tips, and an Appendix of Physics C equations.
