Pucker or Puckering is the most used (abused?) term in the garment manufacturing industry. Pick up any quality controllers report, and the first thing that will strike your eye will be "...Puckering in armhole, ...Puckering in neckline binding, ...control Puckering in bottom hem..." the list is endless. Buying office quality controllers are as enamoured of this term as much as manufacturers abhor it. What is it that makes it so distasteful? Why does it occur? How can it be controlled? While there are numerous leaflets, documents and articles available on pucker, we have found that the majority of them lay great stress on "inherent pucker" (only material parameters). In this booklet have tried to include process parameters as well as sewing of lightweight fabrics. All said and done, the problem is so intricately interdependent that exhaustive compilation is well nigh impossible. We are sure this booklet will help manufacturers to understand the rationale behind this publication and we will consider our effort successful if enthusiastic readers regularly inform us about newer methods to tackle the problem.

An all-level skill book to make sure you get the most out of your serging machine. Photographs and step-by-step instructions take you through the essential techniques, showing you how to set up your machine, how to adjust settings to get best results on a range of different fabrics, and how to edge your fabrics with perfect results.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

First published in 1974, this book is a collection of nine essays written by Victor Ehrenberg between 1925 and 1967, five of which had not been published before. They deal with a number of aspects of Greek and Roman history, and with the nature of ancient history in the East and West. The first essay is a broad survey of interactions between opposing forces and ideas in the world as seen from the most ancient Near Eastern civilizations to the beginning of the western Middle Ages and the era of Byzantium; this is followed by discussions of topics from Classical and Hellenistic Greece and Republican and Imperial Rome, with the accent on the history of ideas and institutions —freedom, the Greek city-state, and Roman concepts of state and empire. The final chapter consists of personal reflections on the meaning of history from the writer's own characteristic viewpoint, and is, as he admits, more in the way of a confession than pure scholarship.

Do it yourself Serger machine repair!!! Sound like a far fetched idea? Not so, according to Reuben O. Doyle, a sewing machine repairman of 25 years and author of "Serger Repair for the Home Sewer." "In over 75% of the repair jobs I get, the home sewer/crafter could easily have handled the job if only they'd known what to look for. In about 25% of the repair jobs I go out on, the problem is such a minor one that anyone with a checklist of what to look for could fix it in seconds, but I have to charge them the same service fee as on any repair job. Of course any broken parts need to be taken to an authorized service repairman for repair or replacement, but those types of service calls are by far the minority!" Written in step by step instructional style, this book takes the serger machine owner through problem/solution scenarios allowing them to fix problems that can cause a lot of frustration for those who sew. Whether you have an older model machine, or one of the newer models, this book will help keep your general repair costs to a minimum. The home sewer can now just look up the problem in this handy guide book and follow the instructions on how to fix it. YES, it's now as easy to fix your serger machine as picking up a book!

Since 1958 the Maritime Administration has continuously conducted

instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Johnny Texas has more to fear from greedy, dishonest men than from wild animals during a six-hundred-mile trip to Mexico and back over the Old San Antonio Road.

These beautiful watercolor images of Texas wild flowers were created in the 1840s and 1850s by Eliza Griffin Johnston, bound into a book, and given to her husband, General Albert Sidney Johnston for his birthday. In 1862, during the Civil War, General Johnston was killed at the Battle of Shiloh. In 1894, Eliza's friend, Rebecca Jane Fisher, of The Daughters of the Republic of Texas, began acquiring artifacts from the Republic of Texas era for a museum and asked Eliza for something that had belonged to the General. It was through those efforts that the chapter received the book, which remained in an Austin bank vault for many years. In 2008, the images were digitalized and the members wanted the beauty of the book to be shared with others. With more than 100 watercolor paintings and a description of each flower, this book is a treasure from Texas's past and an artistic gem.

Eugene C. Barker, one of the most influential historians to teach at the University of Texas, has been described as "a granite monolith," "half sabre-toothed tiger and half St. Francis of Assisi," with "a mind like a surgeon's scalpel." The late William C. Pool, Barker's former student, presents a vivid portrait of Barker from knowledge-hungry youth to administrator, professor, leader, author, and historian.

No one knows much about him, other than he is extremely reclusive, never ventures outside, and apparently speaks only to his chief of staff and a handful of church leaders. At the White House Prayer Breakfast, in early March, Blake invited a young preacher, whose method of address caused everyone in the room to drop into an odd trance; that is, everyone but Vice President Stilman Lind and Secret Service agent Harry Wagener. These two men team up to solve the mystery of the reverend, and in the process, find they possess unique special abilities. They find it necessary to utilize those abilities to stop a previously unknown, secretive group's attempt to change America into a religious state. And they'd better act fast, before the damage is irreversible!

In this easy-to-follow guide, Pat Holly and Sue Nickels share a host of striking designs inspired by antique Amish quilts. Their simple, step-by-step instructions show you how to use a sewing machine to quilt these elaborate patterns in just a fraction of the time it takes to sew them by hand. You'll find a treasury of stunning designs, including flowers, feathers, cables, baskets, stars,

and more. Even those hard-to-fill spaces in between blocks and along quilt edges can be transformed with elegant sashing designs and attractive border decorations such as a grapevine and a running vine. You can use the patterns exactly as they are or easily adapt their sizes and shapes to fit your quilt perfectly. In addition, some of the patterns can be used for appliqué design. A short history of the Amish precedes a section on how to use the designs and a brief explanation of machine quilting. Most patterns are accompanied by simple directions for needlecrafters who enjoy the convenience and speed of quilting by machine but who can, if they wish, also create these heirloom-quality designs by hand.
