Information Systems for Sustainable Development provides a survey on approaches to information systems supporting sustainable development in the private or public sector. It also documents and encourages the first steps of environmental information processing towards this more comprehensive goal.

This book addresses the issue of climate change risks and hazards holistically. Climate change adaptation aims at managing climate risks and hazards to an acceptable level, taking advantage of any positive opportunities that may arise. At the same time, developing suitable responses to hazards for communities and users of climate services is important in ensuring the success of adaptation measures. But despite this, knowledge about adaptation options, including possible actions that can be implemented to improve adaptation and reduce the impacts of climate change hazards, is still limited. Addressing this need, the book presents studies and research findings and offers a catalogue of potential adaptation options that can be explored. It also includes case studies providing illustrative and inspiring examples of how we can adapt to a changing climate.

Natural swimming pools are kept clean by plants, not chemicals and are healthy environments for both people and wildlife. David Pagan Butler takes you through two projects step by step. The first one is how to build a plunge pool, an ideal nature reserve that you can swim in too ... The second part shows you how to make a much larger natural swimming pool--Container.

Natural Disasters in Latin America and the Caribbean Coping with Calamity explores the relationship between natural disasters and civil society, immigration and diaspora communities and the long-term impact on emotional health. Natural disasters shape history and society and, in turn, their long-range impact is determined by history and society. This is especially true in Latin America and the Caribbean, where climate change is increasing the frequency and intensity of these extreme events. Ranging from pre-Columbian flooding in the Andes to the devastation of Hurricane Maria in Puerto Rico, this book focuses on long-range recovery and recuperation, rather than short-term disaster relief. Written in the time of the coronavirus pandemic, the author shows how lessons learned about civil society, governance, climate change, inequality and trauma from natural disasters have their echoes in the challenges of today's uncertain world. This book is well-suited to the classroom and will be an asset to students of Latin American history, environmental history and historical memory.

*THE SUNDAY TIMES AND NEW YORK TIMES BESTSELLER, AND RICHARD & JUDY BOOK CLUB PICK 'If you liked GONE GIRL and THE GIRL ON THE TRAIN, you might want to pick up THE WIDOW by Fiona Barton. Engrossing. Suspenseful' Stephen King We've all seen him: the man – the monster – staring from the front page of every newspaper, accused of a terrible crime. But what about her: the woman who grips his arm on the courtroom stairs – the witness who stands by him? Jean Taylor's life was blissfully ordinary. Nice house, nice husband, Glen was all she'd ever wanted: her Prince Charming. Until he became that man accused, that monster on the front page. Jean was married to a man everyone thought capable of unimaginable evil. But now Glen is dead and she's alone for the first time, free to tell her story on her own terms. Jean Taylor is going to tell us what she knows.' \*\*\*\*\* 'The book really got under my skin and had me turning pages at a rate of knots, unable to tear myself away.' \*\*\*\*\* 'An utterly addictive read that I couldn't put down.' \*\*\*\*\* 'Clever twists and turns . . . kept me on my toes until the end.' *NEW YORK TIMES BESTSELLER • A former Wall Street quant sounds the alarm on Big Data and the mathematical models that threaten to rip apart our social fabric—with a new afterword “A manual for the twenty-first-century citizen . . . relevant and urgent.”—Financial Times NATIONAL BOOK AWARD LONGLIST • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • The Boston Globe • Wired • Fortune • Kirkus Reviews • The Guardian • Nature • On Point We live in the age of the algorithm. Increasingly, the decisions that affect our lives—where we go to school, whether we can get a job or a loan, how much we pay for health insurance—are being made not by humans, but by machines. In theory, this should lead to greater fairness: Everyone is judged according to the same rules. But as mathematician and data scientist Cathy O’Neil reveals, the mathematical models being used today are unregulated and uncontestable, even when they’re wrong. Most troubling, they reinforce discrimination—propping up the lucky, punishing the downtrodden, and undermining our democracy in the process. Welcome to the dark side of Big Data.*

*When a group of mining executives bring their wives to the South Pacific paradise of Paui, vacation is not on their minds. Having found rare minerals on the island, they are determined to strike a swift deal for mining rights. While their husbands visit a copper mine, the women explore the beautiful coast by luxury yacht. On the return trip, the yacht breaks down and they are forced to finish the journey on foot. But as they near the hotel, their pleasure trip becomes a nightmare. The panic-stricken women tear back to the jungle, where they learn survival tricks from the ship’s captain. The once-shy Annie is nominated leader of the rest; Silvana, a wealthy, distant matron; the athletic, high-strung Patty; outspoken Carey; and Suzy, a sensuous, spoiled child. As misfortune rains down on the group, opportunity also has a way of magically appearing as the castaways battle jungle, cannibalistic natives and their own frightening desires with a gritty determination that belies their pampered pasts. And only Harry, tough Australian mining executive, refuses to believe the lost women are dead and, driven by his love for one of the women, starts a search . . .*

*A fiercely authentic, critically acclaimed and award-winning modern classic. 'Speak up for yourself – we want to know what you have to say.' From my first day at Merryweather High, I know this is a lie. Nobody will even talk to me, let alone listen – all because I called the cops on an end-of-summer party. But if I could only tell everyone why I called the police that night... If I could explain what happened to me... If I could speak... Then everything might change. 'With the rise of women finding their voices and speaking out about sexual assault in the media, this should be on everyone's radar... Powerful, necessary, and essential.' – Kirkus*

*NEW YORK TIMES BESTSELLER • This instant classic explores how we can change our lives by changing our habits. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Wall Street Journal • Financial Times In The Power of Habit, award-winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. Distilling vast amounts of information into engrossing narratives that take us from the boardrooms of Procter & Gamble to the sidelines of the NFL to the front lines of the civil rights movement, Duhigg presents a whole new understanding of human nature and its potential. At its core, The Power of Habit contains an exhilarating argument: The key to exercising regularly, losing weight, being more productive, and achieving success is understanding how habits work. As Duhigg shows, by harnessing this new science, we can transform our businesses, our communities, and our lives. With a new Afterword by the author “Sharp, provocative, and useful.”—Jim Collins “Few [books] become essential manuals for business and living. The Power of Habit is an exception. Charles Duhigg not only explains how habits are formed but how to kick bad ones and hang on to the good.”—Financial Times “A flat-out great read.”—David Allen, bestselling author of Getting Things Done: The Art of Stress-Free Productivity “You’ll never look at yourself, your organization, or your world quite the same way.”—Daniel H. Pink, bestselling author of Drive and A Whole New Mind “Entertaining . . . enjoyable . . . fascinating . . . a serious look at the science of habit formation and change.”—The New York Times Book Review*

*The Curious Case of Benjamin Button, now available in ebook, is a heart-pounding thriller in the NUMA adventure series. Kurt Austin navigates the Amazon jungle in search of a legend that could change the path of science—but secretive powers will do anything to stop him. From deep within the Venezuelan rain forest emanates the legend of a white goddess and a mysterious tribe with startling technical accomplishments. Few believe the tribe exists—and even fewer suspect its deity may hold knowledge that can change the course of history. For National Underwater & Marine Agency crew leader Kurt Austin, an investigation into the sudden deaths of rare whales leads him to the Mexican coast, where someone tries to put him and his mini-sub permanently out of commission. Meanwhile, in South America's lush hills, a specially assigned NUMA crew turns up the white-goddess legend—and a murderous cadre of bio-pirates intent on stealing medicinal secrets worth millions. Soon Austin and his crew realize they're working the opposite ends of the same grand scheme. A billionaire California tycoon is poised to rise to power by monopolizing the earth's vastly depleted freshwater reserves and ultimately dominate the world. Austin has a hunch Venezuela's mythical tribal goddess has some real roots in science, and may be the key to locating a secret formula that could turn vast amounts of seawater into fresh. But with each step into the bush, he and his NUMA team feel like fish out of water—and must fight a deadly, twisting trail of enemies through a dense jungle of treachery, blackmail, and murder.*

With the continued implementation of new equipment and new concepts and methods, such as hydroponics and soilless practices, crop growth has improved and become more efficient. Focusing on the basic principles and practical growth requirements, the Complete Guide for Growing Plants Hydroponically offers valuable information for the commercial grower, the researcher, the hobbyist, and the student interested in hydroponics. It provides details on methods of growing that are applicable to a range of environmental growing systems. The author begins with an introduction that covers the past, present, and future of hydroponics. He also describes the basic concepts behind how plants grow, followed by several chapters that present in-depth practical details for hydroponic growing systems: The essential plant nutrient elements The nutrient solution Rooting media Systems of hydroponic culture Hydroponic application factors These chapters cover the nutritional requirements of plants and how to best prepare and use nutrient solutions to satisfy plant requirements, with different growing systems and rooting media, under a variety of conditions. The book gives many nutrient solution formulas and discusses the advantages and disadvantages of various hydroponic systems. It also contains a chapter that describes a school project, which students can follow to generate nutrient element deficiency symptoms and monitor their effects on plant growth.

The ROV Manual: A User Guide for Observation-Class Remotely Operated Vehicles is the first manual to provide a basic “How To” for using small observation-class ROVs for surveying, inspection and research procedures. It serves as a user guide that offers complete training and information about ROV operations for technicians, underwater activities enthusiasts, and engineers working offshore. The book focuses on the observation-class ROV and underwater uses for industrial, recreational, commercial, and scientific studies. It provides information about marine robotics and navigation tools used to obtain mission results and data faster and more efficiently. This manual also covers two common denominators: the technology and its application. It introduces the basic technologies needed and their relationship to specific requirements; and it helps identify the equipment essential for a cost-effective and efficient operation. This user guide can be invaluable in marine research and surveying, crime investigations, harbor security, military and coast guarding, commercial boating, diving and fishing, nuclear energy and hydroelectric inspection, and ROV courses in marine and petroleum engineering. \* The first book to focus on observation class ROV (Remotely Operated Vehicle) underwater deployment in real conditions for industrial, commercial, scientific and recreational tasks \* A complete user guide to ROV operation with basic information on underwater robotics and navigation equipment to obtain mission results quickly and efficiently \* Ideal for anyone involved with ROVs complete with self-learning questions and answers

Aquaponics is the integration of aquaculture and soilless culture in a closed production system. This manual details aquaponics for small-scale production—predominantly for home use. It is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponics. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental organizations, community organizers, government ministers, companies and singles worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.

A rising young economist at Berkeley makes correlations between success and geography, explaining how such rising centers of innovation as San Francisco, Boston and Austin are likely to offer influential opportunities and shape the national and global economies in positive or detrimental ways.

Urban horticulture is a means of utilizing every little space available in cities amidst buildings and other constructions for growing plants. It utilizes this space to raise gardens that can be economically productive while contributing to environmental greening. It can boost food and ornamental plants production, provide job opportunities, promote green space development, waste recycling, and urban landscaping, and result in improved environment. This book covers a wide array of topics on this subject and constitutes a valuable reference guide for students, professors, researchers, builders, and horticulturists concerned with urban horticulture, city planning, biodiversity, and the sustainable development of horticultural resources.

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

All these people had their lives transformed by the remarkable discovery that our brains can repair themselves through the power of positive thinking. Here bestselling author, psychiatrist and psychoanalyst Norman Doidge reveals the secrets of the cutting-edge science of 'neuroplasticity'. He introduces incredible case histories – blind people helped to see, Iqs raised and memories sharpened – and tells the stories of the maverick scientists who are overturning centuries of assumptions about the brain. This inspiring book will leave you with a sense of wonder at the capabilities of the mind, and the self-healing power that lies within all of us.*

*BROKEN BUT NOT LOST The dark shadow cast by an ancient prophecy shatters an innocent family, but all that is broken is not lost and will rise again. Half-blood sorceress, Talia, had a unique childhood. Instructed in combat skills and trained to escape detection, she was schooled to face an unknown menace. Yet, when her family's worst nightmare comes to pass, Talia finds her protected life spinning out of control. Everything she believes in, and everyone she loves, is cruelly snatched away. Talia is forced to flee the attentions of a mad king and denied her supernatural legacy. She chooses the path of retribution, devoid of love and friendship, but learns that sometimes love is received even if not sought. Broken is a tale about Talia's coming of age, reuniting with her family and seeking vengeance. Most of all it chronicles Talia's rise from the ashes and her journey into finding herself again. Read Talia's epic saga of love, sacrifice, friendship, and discovering the hero within set against a background of time travel and supernatural forces.*

*An instant #1 New York Times Bestseller One of the most revered voices in literature today gives us a story of love, friendship, and heartbreak for the ages. Colorless Tsukuru Tazaki and His Years of Pilgrimage is the remarkable story of a young man haunted by a great loss; of dreams and nightmares that have unintended consequences for the world around us; and of a journey into the past that is necessary to mend the present. *Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.*

*Have you ever . . . Invested time in something that, in hindsight, just wasn't worth it? Paid too much in an eBay auction? Continued to do something you knew was bad for you? Sold stocks too late, or too early? Taken credit for success, but blamed failure on external circumstances? Backed the wrong horse? These are examples of what the author calls cognitive biases, simple errors all of us make in day-to-day thinking. But by knowing what they are and how to identify them, we can avoid them and make better choices: whether in dealing with personal problems or business negotiations, trying to save money or earn profits, or merely working out what we really want in life—and strategizing the best way to get it. Already an international bestseller, The Art of Thinking Clearly distills cutting-edge research from behavioral economics, psychology, and neuroscience into a clever, practical guide for anyone who's ever wanted to be wiser and make better decisions. A novelist, thinker, and entrepreneur, Rolf Dobelli deftly shows that in order to lead happier, more prosperous lives, we don't need extra cunning, new ideas, shiny gadgets, or more frantic hyperactivity—all we need is less irrationality. Simple, clear, and always surprising, this indispensable book will change the way you think and transform your decision making—at work, at home, every day. From why you shouldn't accept a free drink to why you should walk out of a movie you don't like, from why it's so hard to predict the future to why you shouldn't watch the news, The Art of Thinking Clearly helps solve the puzzle of human reasoning.*
