An introduction to the power, majesty, and destruction of hurricanes contains eyewitness accounts of the storms, scientific facts about all types of hurricanes, and full-color photographs. Contents of audiocassette: Quieting reflex (12 min.) -- The brief quieting reflex (5 min.) -- The anger ladder (10 min.).

A rollicking, rhyming Halloween romp—in every color! What color is Halloween? Why, it’s as green as an “eerie glow, evil grin, vile brew, clammy skin,” as white as “cobwebs clinging, a misty trail, a skull, a spook, a face gone pale . . .” Children will learn their colors as they follow a cute little creature on his adventure through haunted halls, moonlit forests . . . perhaps even a Halloween party! Jimmy Pickering’s stylized settings and adorable monsters add a blast of colorful creepy-crawliness that will make kids giggle. Who knew that learning colors could be such spooky fun?

*Raised with limited peer interaction, Ernestine St Bennett has difficulty interpreting social cues. At twenty-five she's become a loner; a shy nerd immersed in her scientific studies, whose best friend is her pet fish, Waldo. Then Ernestine meets Simon Prime, who's obviously a nerd, too! Sympathizing with his social dysfunction, Ernie decides to help poor Simon increase his self-esteem and thus enhance his social standing. Using principles learned in her fish studies, she'll simply turn Simon from meek to macho. What Ernestine doesn't know (but Waldo suspects) is that Simon Prime is really ex-cop, private investigator Sam Pierce in disguise. A man who definitely doesn't need his masculinity enhanced!*

To teach his daughter the value of books, a father leads a growing crowd in search of the tree where the bees keep all their honey.

The first historically and internationally comprehensive collection of its kind, *Essayists on the Essay* is a path-breaking work that is nothing less than a richly varied sourcebook for anyone interested in the theory, practice, and art of the essay. This unique work includes a selection of fifty distinctive pieces by American, Canadian, English, European, and South American essayists from Montaigne to the present—many of which have not previously been anthologized or translated—as well as a detailed

bibliographical and thematic guide to hundreds of additional works about the essay. From a buoyant introduction that provides a sweeping historical and analytic overview of essayists' thinking about their genre—a collective poetics of the essay—to the detailed headnotes offering pointed information about both the essayists themselves and the anthologized selections, to the richly detailed bibliographic sections, *Essayists on the Essay* is essential to anyone who cares about the form. This collection provides teachers, scholars, essayists, and readers with the materials they need to take a fresh look at this important but often overlooked form that has for too long been relegated to the role of service genre—used primarily to write about other more “literary” genres or to teach young people how to write. Here, in a single celebratory volume, are four centuries of commentary and theory reminding us of the essay’s storied history, its international appeal, and its relationship not just with poetry and fiction but also with radio, film, video, and new media.

Take a positive approach to behavior intervention for results that work—and last! Indian, European, and African women of seventeenth and eighteenth-century America were defenders of their native land, pioneers on the frontier, willing immigrants, and courageous slaves. They were also - as traditional scholarship tends to omit - as important as men in shaping American culture and history. This remarkable work is a gripping portrait that gives early-American women their proper place in history.

Set in northwestern Ontario in the 1960s, Silent Words tells the story of a young Native boy and his journey of self discovery.

What is missing in most curricula - from elementary school all the way through to university education - is coursework focused on the development of problem-solving skills. Most students never learn how to think about solving problems. Besides being a lot of fun, a puzzle-based learning approach also does a remarkable job of convincing students that (a) science is useful and interesting, (b) the basic courses they take are relevant, (c) mathematics is not that scary (no need to hate it!), and (d) it is worthwhile to stay in school, get a degree, and move into the real world which is loaded with interesting problems (problems perceived
