

## By Jain R

The Routledge Handbook of Yoga and Meditation Studies is a comprehensive and interdisciplinary resource, which frames and contextualises the rapidly expanding fields that explore yoga and meditative techniques. The book analyses yoga and meditation studies in a variety of religious, historical and geographical settings. The chapters, authored by an international set of experts, are laid out across five sections: Introduction to yoga and meditation studies History of yoga and meditation in South Asia Doctrinal perspectives and disciplinary framings In addition to up-to-date explorations of the history of yoga and meditation in the Indian subcontinent, new contexts include a case study of yoga and meditation in the contemporary Tibetan diaspora, and unique summaries of historical developments in Japan and Latin America as well as an introduction to the growing academic study of yoga in Korea. Underpinned by critical and theoretical engagement, the volume provides an in-depth guide to the history of yoga and meditation studies and com directions for future investigation. This handbook will be of interest to multidisciplinary academic audiences from across the humanities, social sciences and sciences.

Taking a comparative approach which considers characters that are shared across the narrative traditions of early Indian religions (Brahmanical Hinduism, Jainism and Buddhism) Shared Characters in Jain, Buddhist and Hindu Narrative explores key religious and social ideals, as well as points of contact, dialogue and contention between different worldviews. The book focuses on three types of character - gods, heroes and kings - that are of particular importance to early South Asian narrative traditions because of the qualities of a true hero or good ruler and the tension between worldly responsibilities and the pursuit of liberation. Characters (including character roles and lineages of characters) that are shared between traditions reveal both a common narrative heritage and important differences in worldview and ideology that are developed in interaction with other worldviews and ideologies of the day. As such, this study sheds light on an important period of Indian religious history, and will be essential reading for scholars of the narrative traditions (Jain, Buddhist and Hindu) as well as being of interest more widely in the fields of Religious Studies, Classical Indology, Asian Studies and Literary Studies.

""Throughout his long academic career, P.S. Jaini has focused his research on the religious, philosophical and literary achievements of the Buddhists and the Jains. His papers on Jaina Studies, scattered in many learned publications, are brought together here for the first time. They cover a wide range of topics including the Jaina view of the nature of reality, the doctrine of karma, the problem of rebirth, the idea of omniscience, the aptitude for salvation, and the assimilation of Hindu myths and rituals."--Publisher description.

The JAINA-RUPA-MANDANA Volume I is an authentic work on Jaina iconography from the pen of a well-known authority on the subject, Dr. Umakant P.Shah, an eminent Indologist and art-historian with specialization in Jaina art and literature. Illustrated profusely with over two hundred monochrome plates, the work is a standard textbook and a very useful guide to all students in Indian art and archaeology and to Museum Curators. The work is supplemented with a large number of iconographic tables for images of all important Jaina gods and goddesses. Dr. Shah, the author, has for the first time given solutions to various basis problems of Jaina iconography supported with ample evidence from both archaeology and literature including unpublished original texts still in manuscripts.

Examining the history and intellectual activity of the medieval Svetambara Jain renunciant order, the Tapa Gaccha, this book focuses on the consolidation by the Tapa Gaccha from the thirteenth century of its identity as the leading Svetambara order. The author argues that this was variously effected by negotiating the primacy of lineage, the posthumous divinity of one of its leaders, the validity of styles of scriptural exegesis and customary practice and the status of non-Jains through the medium of chronicles and poetry and polemical engagement with other Jain orders and dissident elements within its own ranks. Drawing on largely unstudied primary sources, the author demonstrates how Tapa Gaccha writers created a sophisticated intellectual culture which was a vehicle for the maintenance of sectarian identity in the early modern period. The book explores issues which have been central to our understanding of many of the questions currently being asked about the development not just of Jainism but of South Asian religions in general, such as the manner in which authority is established in relation to texts, the relationship between scripture, commentary and tradition and tensions both between and within sects.

Managing Multimedia Semantics

*This book constitutes the thoroughly refereed joint post-proceedings of nine workshops held as part of the 10th International Conference on Extending Database Technology, EDBT 2006, held in Munich, Germany in March 2006. The 70 revised full papers presented were selected from numerous submissions during two rounds of reviewing and revision.*

**Biometrics: Personal Identification in Networked Society is a comprehensive and accessible source of state-of-the-art information on all existing and emerging biometrics: the science of automatically identifying individuals based on their physiological or behavior characteristics. In particular, the book covers: \*General principles and ideas of designing biometric-based systems and their underlying tradeoffs \*Identification of important issues in the evaluation of biometrics-based systems \*Integration of biometric cues, and the integration of biometrics with other existing technologies \*Assessment of the capabilities and limitations of different biometrics \*The comprehensive examination of biometric methods in commercial use and in research development \*Exploration of some of the numerous privacy and security implications of biometrics. Also included are chapters on face and eye identification, speaker recognition, networking, and other timely technology-related issues. All chapters are written by leading internationally recognized experts from academia and industry. Biometrics: Personal Identification in Networked Society is an invaluable work for scientists, engineers, application developers, systems integrators, and others working in biometrics.**

*Web Semantics strengthen the description of web resources to exploit them better and make them more meaningful for both humans and machines, thereby contributing to the development of a knowledgeintensive data web. The world is experiencing the movement of concept from data to knowledge and the movement of web from document model to data model. The underlying idea is making the data machine understandable and processable. In the light of these trends, conciliation of Semantic and the Web is of paramount importance for further progress in the area. Web Semantics: Cutting Edge and Future Directions in Healthcare describes tthe three major components of the study of Semantic Web, namely Representation, Reasoning, and Security with a special focus on the healthcare domain. This book summarizes the trends and current research advances in web semantics, emphasizing the existing tools and techniques, methodologies, and research solutions. It provides easily comprehensible information on Web Semantics including semantics for data and semantics for services. Presents a comprehensive examination of the emerging research in areas of the semantic web, including ontological engineering, semantic annotation, reasoning and intelligent processing, semantic search paradigms, semantic web mining, and semantic sentiment analysis Helps readers understand key concepts in semantic web applications for biomedical engineering and healthcare, including mapping disparate knowledge bases, security issues, multilingual semantic web, and integrating databases with knowledge bases Includes coverage of key application areas of the semantic web, including clinical decision-making, biodiversity science, interactive healthcare, intelligent agent systems, decision support systems, and clinical natural language processing*

"In Peace Love Yoga, Jain analyses growing spiritual industries and their coherence with neoliberal capitalism. "Personal growth," "self-care," and "transformation" are just some of the generative tropes in the narrative of these industries. Jain illuminates the power dynamics underlying what she calls neoliberal spirituality, illustrating how spiritual commodities are rooted in concerns about deviancy, not only in the form of low productivity but also forms of social deviancy. Jain, however, does not just offer one more voice bemoaning the commodification of spirituality as a numbing device through which consumers ignore the problems of neoliberal capitalism or as the corruption or loss of "authentic" religious forms. Instead, she asks what we should make of subversive spiritual discourses that call on adherents to think beyond the individual and even out into the environment, claims to counter the problems of unbridled capitalism with charitable giving or "conscious capitalism," challenges to the imperialism behind the appropriation and commodification of products from yoga to mindfulness, calls for women's empowerment, and efforts to greenwash commodities, making them more environmentally "friendly" or "sustainable." Rather than a mode through which consumers ignore, escape, or are numbed to the problems of neoliberal capitalism, many spiritual commodities, corporations, and entrepreneurs, Jain suggests, do actually acknowledge those problems and, in fact, subvert them, but they subvert them through mere gestures. From provocative taglines printed across t-shirts or packaging to calls for "conscious capitalism," commodification serves as a strategy through which subversion itself is contained".

The Book has been written completely as per AICTE recommended syllabus on "Data Science". SALIENT FEATURES OF THE BOOK: Explains how data is collected, managed and stored for data science. With complete coursework for understand the key concepts in data science including their real-world applications and the toolkit used by data scientists. Implement data collection and management. Provided with state of the arts subjective. With all required tutorials on R, Python and Bokeh, Anaconda, IBM SPSS-21 and Maplotlib.

This book constitutes the proceedings of the 13th International Computer Science Symposium in Russia, CSR 2018, held in Moscow, Russia, in May 2018. The 24 full papers presented together with 7 invited lectures were carefully reviewed and selected from 42 submissions. The papers cover a wide range of topics such as algorithms and data structures; combinatorial optimization; constraint solving; computational complexity; cryptography; combinatorics in computer science; formal languages and automata; algorithms for concurrent and distributed systems; networks; and proof theory and applications of logic to computer science.

Jainism and Prakrit in Ancient and Medieval India

Jaina Community

Interest for Jain studies has increased considerably in the last decades. Scholars will be thankful to the organizers of the 12th World Sanskrit Conference who, for the first time in such a conference, planned a special panel on this field. The ten papers collected in this volume show the importance, abundance and variety of topics that can be considered. Philological analysis still proves useful, whether it concentrates on one particular work or on clusters of texts. A study of the st narrative and predication needs a historical approach, kavya literature lends itself to renewed and indepth interpretations. Finally the reader will observe the constant renewal of Jainism, as some new literary genre or a new sect are seen to have gained momentum in modern times.

Focuses On Some Of The Celebrated Jaina Mahakavyas Of All Hues. Presents For The First Time An Indepth Evaluation Of Some Notable Literary Historical And Sanskrit Poems. Should Prompt The Reader To Study The Original Poems In Details.

The Lives of the Jain Elders is the standard synthesis of source material for the early history of Jainism by the great twelfth-century Jain scholar-monk, Hemaandra, also a key figure in the wider context of Sanskrit literature. Abounding in memorable characters, and providing a rich compendium of Indian folk-tale, The Lives of the Jain Elders offers fascinating insight into the social life of medieval India. This new translation makes the complete work available for the first time in a

European language and is complemented by a full introduction illuminating Jain belief and history.

All-India Oriental Conference, Twentyseventh Session, 1974

*Dharma is central to all the major religious traditions which originated on the Indian subcontinent. Such is its importance that these traditions cannot adequately be understood apart from it. Often translated as "ethics," "religion," "law," or "social order," dharma possesses elements of each of these but is not confined to any single category familiar to Western thought. Neither is it the straightforward equivalent of what many in the West might usually consider to be "a philosophy". This much-needed analysis of the history and heritage of dharma shows that it is instead a multi-faceted religious force, or paradigm, that has defined and that continues to shape the different cultures and civilizations of South Asia in a whole multitude of forms, organizing many aspects of life. Experts in the fields of Hindu, Jain, Buddhist and Sikh studies here bring fresh insights to dharma in terms both of its distinctiveness and its commonality as these are expressed across, and between, the several religions of the subcontinent. Exploring ethics, practice, history and social and gender issues, the contributors engage critically with some prevalent and often problematic interpretations of dharma, and point to new ways of appreciating these traditions in a manner that is appropriate to and thoroughly consistent with their varied internal debates, practices and self-representations.*

*The last ten years have seen interest in Jainism increasing, with this previously little-known Indian religion assuming a significant place in religious studies. Studies in Jaina History and Culture breaks new ground by investigating the doctrinal differences and debates amongst the Jains rather than presenting Jainism as a seamless whole whose doctrinal core has remained virtually unchanged throughout its long history. The focus of the book is the discourse concerning orthodoxy and heresy in the Jaina tradition, the question of omniscience and Jaina logic, role models for women and female identity, Jaina schools and sects, religious property, law and ethics. The internal diversity of the Jaina tradition and Jain techniques of living with diversity are explored from an interdisciplinary point of view by fifteen leading scholars in Jaina studies. The contributors focus on the principal social units of the tradition: the schools, movements, sects and orders, rather than Jain religious culture in abstract. Peter Flügel provides a representative snapshot of the current state of Jaina studies that will interest students and academics involved in the study of religion or South Asian cultures.*

*This Om journal offers a perfect place for you record your daily meditations. 6x9 format, lined pages, each with an orange Om symbol, to remind you of the oneness of all things.*
