Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity --- or usefulness --- of tests and test scores. This edited volume develops a theoretical framework for validating tests of second language speaking ability. The framework is then applied through an examination of the tasks in Cambridge ESOL speaking tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The chapter authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The volume is a rich source of information on all aspects of examining speaking ability. As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent manner, as well as to academic researchers and graduate students in the field of language assessment more generally. This is a companion volume to the previously published titles Examining Writing and Examining Reading.

Objective PET offers students complete preparation for the Cambridge Preliminary English Test.
