

Carrier Remote Controller Manuals German

This book constitutes the thoroughly refereed proceedings of the 5th International Conference on Mobile Wireless Middleware, Operating Systems, and Applications, Mobilware 2012, held in Berlin, Germany, in November 2012. The 18 revised full papers presented were carefully reviewed and selected from numerous contributions. The papers are organized in topical sections on Internet of things and mobile sensing, mobile middleware platforms, mobile networks, systems support for mobile applications, and context awareness.

Increasingly, European and other Western states have sought to control the movement of refugees outside their borders. To do this, states have adopted a variety of measures - including carrier sanctions, interception of migrants at sea, posting of immigration officers in foreign countries and external processing of asylum-seekers. This book focuses on the legal implications of external mechanisms of migration control for the protection of refugees and irregular migrants. The book explores how refugee and human rights law has responded to the new measures adopted by states, and how states have sought cooperation with other actors in the context of migration control. The book defends the thesis that when European states attempt to control the movement of migrants outside their territories, they remain responsible under international law for protecting the rights of refugees as well as their general human rights. It also identifies how EU law governs and constrains the various types of pre-border migration enforcement employed by EU Member States, and examines how unfolding practices of external migration control conform with international law. This is a work which will be essential reading for scholars and practitioners of asylum and refugee law throughout Europe and the wider world. The book received 'The Max van der Stoep Human Rights Award 2011' (first prize category dissertations); and the 'Erasmianum Study Prize 2011'.
