The 1st International Conference on 'Applied Cryptography and Network Security' (ACNS 2003) was sponsored and organized by ICISA (International Communications and Information Security Association), in cooperation with MIA n Pte. Ltd. and the Kunming government. It was held in Kunming, China in October 2003. The conference proceedings was published as Volume 2846 of the Lecture Notes in Computer Science (LNCS) series of Springer-Verlag. The conference received 191 submissions, from 24 countries and regions: 32 of these papers were accepted, representing a rate of 16.75%. In this volume you will find the revised versions of the accepted papers that were presented at the conference. In addition to the main track of presentations of accepted papers, an additional track was held in the conference where presentations of an industrial and technical nature were given. These presentations were also carefully selected from a large set of presentation proposals. This new international conference series is the result of the vision of Dr. Yongfei Han. The conference concentrates on current developments that advance the systems and network security. The goal is to represent both academic research works and developments in industrial and technical frontiers. We thank Dr. Han for initiating this conference and for serving as its General Chair.

**The Case of Malta**  
This book provides a detailed examination of public service reforms in Malta. Focusing on both the trajectory and substance of the reforms, the volume provides a holistic treatment of the public sector in the European Union's smallest member state. The book is divided into four parts. Part I covers the historical background of public service administration and management in Malta from the 1500s to the 2010s. Part II focuses on recent reforms, begun in 2013, after the election of Prime Minister Joseph Muscat. Each chapter in this part addresses a particular reform theme: transparency and accountability; civil service systems and HR management; service delivery and digitalisation; organisation and management of government reforms; policy making, coordination, and implementation. Part III investigates the internal and external impact of the reforms, reporting and analyzing the results of a survey carried out among government employees and the Maltese population. The book concludes with a chapter on global reform trends that are likely to impact public service delivery in the future. Providing an in-depth view of public service in a small island state, this volume will be useful to researchers and students interested in public sector management, administration, and public policy as well as practitioners, consultants, and government employees.
