A year's worth of ideas and activities at your fingertips Since its debut four years ago, The Teacher's Calendar has become a fixture in classrooms and school libraries across the country, thanks to its fresh ideas and limitless teaching opportunities. Covering events from August 1, 2003, through July 31, 2004, this unique reference helps educators in grades K-8 enhance their lesson plans in ways they never thought of before. Teachers will find a wealth of innovative ideas for lessons, bulletin boards, and school calendars on every page. The more than 4,800 entries include such topics as children's events, toy introduction anniversaries, teachers' conferences, and much, much more. Info-packed sidebars highlight specific dates and provide curriculum ideas and lists of appropriate books and websites. New additions to The Teacher's Calendar include: All new "Curriculum Connections"--with more hands-on projects Information on the Lewis and Clark Expedition bicentennial and invention of powered flight centennial events Contact information for governors and senators for all 50 states With its extensive listings and seemingly inexhaustible treasure of classroom ideas, The Teacher's Calendar will take the guesswork out of lesson planning and put back fun and creativity into the classroom.

Life, liberty, and the pursuit of happiness are prescribed ideals in America of 2050. The Moral Authority, the nation's newest branch of government, has virtually eliminated crime, poverty, and most social ills, but it also rules the land with a tyrannical fist, championing ignorance and brandishing fear. Mark Bryan is a gay man whose existence brands him an outlaw; Isaac Montoya is a charming stranger, who entices Mark to defy moral law; and Samuel Pleasant runs the Moral Authority and plans to punish moral offenders and a rebellious uprising-no matter the cost. Will liberty and justice return for all? Twelve-year-old Ryan Edwards wants desperately to win his club's go-kart championship, and work his way up to win the Indianapolis 500 someday so he can earn his own "Baby Borg" Trophy - but apparently, someone has other ideas for him! Who is deliberately messing with his go-kart? Also why? and how? -- when it's carefully locked up every time? Ryan feels that it's nasty, mean Kyle Sampson, who is fastest on the track, and always puts Ryan down... With his father's great help, Ryan races hard, with exciting karting action, but each new mystery leads to another - the go-kart tampering, the mysterious go-kart champion Joe Yoshida -- and more. New questions lurk around each and every corner... Ryan's dog, Sparkplug, suspects trouble from the very beginning, and later discovers a vital clue. And what would Ryan do without his neighbor, Maria, who often jumps in to help? With the unique "snooping" skills of his nine-year-old neighbor, Timmy, who wants to be a de-tek-tiv someday, all the mysteries are finally solved. From the first chapter, Chasing The Checkered Flag - an intense blend of high-speed racing facts and fiction - will keep each reader reading, and guessing, until the very end.

YOU DON'T HAVE TO Live in an ashram in India for years to learn to meditate. Christopher "Chase" Carey, MBA, will teach you how easy it can be right here, right now. Chasin' Meditation begins with a solid, yet concise, introduction to meditation'what it is and isn't, what to do and not do, and a walk-through of an actual meditation.Part two deals with meditation for stress reduction, detailing Carey's systematic process for identifying hidden stressors and permanently removing them through guided meditation.In part three, the reader learns about Inner Essence Meditation, an advanced form of meditation developed by the author to accelerate desired changes in your life.Additionally, the appendix offers step-by-step instructions for different kinds of meditation, including body awareness, forgiveness, and gratitude meditations. Chasin' Meditation is designed to make meditation accessible to everyone, from busy professionals who want to improve their work performance, to individuals who are seeking inner peace.

"A wondrous, sparkling fusion of wisdom and insight." - Patricia Santhuff What do the wonderful myths of ancient Greece, the beautiful stories in the Bible and Qur'an, and all the sacred stories from traditions around the world, have in common? They open our hearts to wonder, mystery, passion, and joy. I know, on the outside these stories seem very different, confusing, conflicting, and often violent and divisive. But when read symbolically and internally, they are all telling the same story. They show us the path of spiritual awakening and enlightenment. Sometimes the story is called "Returning to the Promised Land." Sometimes it's called "Seeking the Holy Grail." Sometimes it's called "Persephone's Return to Olympus." But whatever it's called, the inner meaning and purpose is always the same. The stories are all a call to awaken, to live passionately and consciously, and to enter the door that leads to enlightenment and communion with the divine. The door is always open. The light is always ready to receive us. But we have to learn how to tread the path! Fortunately, that's what all the sacred stories are really about. THE DOOR IS OPEN uncovers the 7 Universal Steps that are found within the symbols and allegories of all great mythology and scripture. Each chapter ends with a series of practical and enjoyable spiritual exercises and activities. You can do this work on your own, or together with a group. It could be a church or synagogue group, a book club, a classroom, or any group of friends who want to get together and expand their spiritual horizons.

An indispensable guide for sports fans of all kinds includes information about every sporting and recreational event of the year 2000, presented in an easy to follow, day-by-day format. Original. In this engaging - and disturbing - book, a leading historian of the Court reveals the close fit between its decisions and the nation's politics. Drawing on more than four decades of thinking about the Supreme Court and its role in the American political system, this book offers a new, clear, and troubling perspective on American jurisprudence, politics, and history.

Huge, towering clouds build up in the sky--it's a super cell. The Doppler radar indicates that the system is rotating. But is there a funnel? Is it touching the ground? Only a storm chaser can confirm when a tornado is present--and help meteorologists warn nearby towns.Whenever severe weather threatens, storm chasers hit the road to hunt for tornadoes, hurricanes, or violent storms. Some drive thousands of miles in just a few days as they follow a storm system from Iowa to Texas. Others serve their cities and towns by taking photos from their backyards and phoning in storm details to local weather stations. Specially trained Hurricane Hunters hop into aircraft packed with scientific instruments to fly deep into powerful hurricanes, hoping to reach the eye of the storm.Are storm chasers a bunch of foolish daredevils? Not at all. Many are scientists while others are professional photographers and videographers. Storm chasers arm themselves with training about severe weather, use sophisticated instruments, and follow safety guidelines.In Chasing the Storm, you'll meet real storm chasers and meteorologists, hear their stories, and discover how they do their work. You'll learn tornado basics, get a great window into the science of meteorology, and learn how to pursue a career in the field. You might even decide to become a storm chaser yourself!

This workbook contains a variety of exercises and activities designed to help young learners advance the fine motor skills that are essential to the handwriting process, beginning by tracing lines and curves, and then gently introducing some letter-writing practice. Several mazes are also included in the book as a fun way to promote visual motor skills, eye-hand coordination, and problem-solving skills. Young students are introduced to the letters of the alphabet in exercises that have them trace Lowercase Alphabet and then practice writing them on their own. Numbers are also presented in an engaging way, with a lesson in phonetics as well as exercises for tracing and writing numerals. A section of connect-the-dot games provides more motor skills development along with helping children learn the order of alphabet, while fill-in-the-blank games reinforce alphabet learning in a different way and provide more practice in writing the missing letters. My BIG Book of Writing! is a versatile tool that can help children who are struggling with writing skills to work at a comfortable level, as well as assisting those for whom writing comes more easily to experience the multitrack learning their developing minds are hungry to absorb. Whatever level a child is at, the activities and exercises in this workbook will stimulate the learning process and prepare him or her for reading and other learning challenges ahead.

"Say Not What If" is a nearly 10,000 word story written as a long rhyming poem. It is about a man on death row, and has as its theme the concept that time is our most valuable commodity. As someone once said, "waste anything but time, because we really are promised no tomorrows." This theme is explored through the life of a man who sacrifices his marriage and everything else for his career. He realizes much too late the terrible consequences of this decision, and then desperately tries to regain those lost years by making a much worse choice. The resolution of this latter choice involves an additional examination of the concepts of accountability and responsibility, redemption, and the morality of the death penalty.The story has a better than average rating of 4/5 stars on Goodreads and Amazon. There are currently fifty-six ratings and forty-one written reviews on Goodreads at http://www.goodreads.com/book/show/12788920-say-not-what-if. Another thirteen ratings and reviews are on Amazon. Reviewers have described the story as "exceptional," "amazing," "incredibly special," "borderline genius," "a lyrical masterpiece," "gripping and compelling," "thought provoking," and a "beautifully written piece of literature." Many enjoyed the story so much that they intend to share it with their family and friends.I have never seen a story written in this format. It has characters and dialogue just like a regular story, and is extremely easy to read and understand, regardless of whether you have a GED or a PHD. You should therefore not be concerned that the format makes the story hard to understand. Many reviewers had the same initial concern, but then pleasantly discovered that the story is very easy to follow. But you can further allay any such fears by reading the first few pages of the story on my website, www.ascensionenterprise.com. This story will tear at your soul. As many of the reviewers said, it only requires an hour or so to read, but will keep you thinking about its message long after you are finished. Time is quintessentially important and valuable. Who knows how much time anyone has? Would you trade ten or even five years of your life for a million dollars?The story can be purchased from many booksellers, including Amazon and Barnes & Noble. It can also be purchased for only 0.99 as an ebook for Kindle.Best wishes and good luck in all your reading endeavors.

Book 2 in the Full Moon series Declan Hall has got everything covered this time around. He is going to make sure that being Alpha is easy; with or without help from anyone. No one's going to tell this guy how to handle anything; not Gabriel, or anybody else, for that matter. This time he is in charge. No arguments, ifs or buts. That's certain! That is until... he meets a woman werewolf who wants to have her own way. Headstrong about absolutely, positively everything. She's the alpha type and she leads by full coercion. A no-holds-barred kind of feminine... a persuasive, narcissistic force to be reckoned with. Declan definitely did not see her coming. So, why isn't Noelle talking to him? Everything was sweet as... before. Relationships should never be this damn hard. Werewolves are pack animals, aren't they? Let's go hunting... it's anyone's game...

On October 28th 1890 the great wall of the Barsdon Dam gave way, and the Eagle Star reservoir buried the small Arizona town of Jackson Hope under forty feet of water. Men, women and children perished in the devastating flood, nobody survived. For over a hundred years the town lay forgotten at the bottom of a vast lake, but it has been a particularly harsh summer in Arizona, and the town is starting to emerge. Experts will come and survey the land, hoping to prospect for a bright and lucrative new project, but they will get more than they bargained for. Bit by bit they will uncover the truth behind the disaster which wiped a small farming community off the map, and as they do they will learn with devastating consequences that some secrets should stay buried forever.

*"Men are haunted by the vastness of eternity" The opening line of the film Troy captures the tragic essence of personal mortality: ones' passing into oblivion and fading from all memory. Since the prehistoric dawn of humanity death has shadowed everyone's footsteps. Even into the current scientific era religion has long been the only defense. The sole comfort against oblivion offering a promise of new life or even immortality. The Geologic Model of Religion is a sympathetic study of this defense from its ancient beginnings, drawing upon archaeology, anthropology and comparative religion to clearly explain one of the most complex subjects known. From the study a new model emerges which: * Decomposes religion into its distinct worldview and afterlife paradigms * Categorizes evidence of belief systems held by prehistoric hunter-gatherers, culminating in the Temples of Rebirth such as Gobekli Tepe * Concludes that spirituality began in the Fertile Crescent 11,000 years ago, spreading with the Neolithic revolution throughout the world * Shows why judgment in afterlife was the keystone in the emerging edifice of civilization, and how it enabled hierarchies overcoming Dunbar's number which limited village sizes * Overviews the interaction between science and religion and projects the ultimate fate of religion itself There might be 100,000 books written about religion but the Geologic Model of Religion is unlike any other. Drawing upon evidence from anthropology, archaeology and scripture religion is divided into worldviews and afterlife paradigms. This new model evidences several long lost prehistoric religious belief systems and explains the origin of spirituality in settled societies.*

*Synoptic and Dynamic Climatology provides the first comprehensive account of the dynamical behaviour and mechanisms of the global climate system and its components, together with a modern survey of synoptic-scale weather systems in the tropics and extratropics, and of the methods and applications of synoptic climate classification. It is unrivalled in the scope and detail of its contents. The work is thoroughly up to date, with extensive bibliographies by chapter. It is illustrated with nearly 300 figures and plates. *Part 1 provides an introduction to the global climate system and the space-time scales of weather and climate processes, followed by a chapter on climate data and their analysis *Part 2 describes and explains the characteristics of the general circulation of the global atmosphere and includes the nature and causes of global teleconnection patterns *Part 3 discusses synoptic weather systems in the extratropics and tropics and satellite-based climatologies of synoptic features. It also describes the applications of synoptic climatology and summarises current climatic research and its directions.*

Franklyn was born into a gritty north of England town. His expected path through life would have him live out his years in the manner of that town's baseline existence. But it wasn't to be. Perhaps he was pre-selected to break rank so that bigger dreams could be fulfilled. Whatever the prime force may have been, he was to know a different life. Perhaps, too, the corridors of our own reality are flimsier than we believe! On the other side of the wall may lie another path. As Franklyn himself discovers, a perceived reality can be as real as reality itself.

By modeling pedagogical scenarios as directed geometrical graphs and proposing an associated modeling language, this book describes how rich learning activities, often designed for small classes, can be scaled up for use with thousands of participants. With the vertices of these graphs representing learning activities and the edges capturing the pedagogical relationship between activities, individual, team, and class-wide activities are integrated into a consistent whole. The workflow mechanisms modeled in the graphs enable the construction of scenarios that are richer than those currently implemented in MOOCs. The cognitive states of learners in two consecutive activities feed a transition matrix, which encapsulates the probability of succeeding in the second activity, based on success in the former. This transition matrix is summarized by a numerical value, which is used as the weight of the edge. This pedagogical framework is connected to stochastic models, with the goal of making learning analytics more appealing for data scientists. However, the proposed modeling language is not only useful in learning technologies, it also allows researchers in learning sciences to formally describe the structure of any lesson, from an elementary school lesson with 20 students to an online course with 20,000 participants.

Let your imagination and creativity soar with these cute do-it-yourself Basenji dog Valentine's Day paper cards. A fun Valentine's Day activity for all ages, sure to create lasting memories. Kids and animals just go together, especially if it's their favorite pet. Each book has 12 paper cards to color - 2 different designs. The pictures are hand drawn and the child is encouraged to draw more items on each card, along with any special markings that they like, truly making them one-of-a-kind. The inside of six of the cards reads "Be Mine, Valentine" and the other six cards read " You're Special." There are 12 envelopes to color, address, cut out and fold, adding to the fun. You'll find a Valentine's Day List to keep track of who you have given a Valentine card to. Fun for all ages.

Drawing comes with several benefits. One of these is the development of fine motor skills that will aid in the completion of tasks involving object manipulation by hand. As your child draws, he/she begins to express what he/she imagines. Objects are given careful details so features are learned. This way, you can understand what your child creates. How are your child's drawing skills now?
