This detailed, full color Topographic Atlas represents the full area of the famous Torres del Paine National Park in Chilean Patagonia. Access to trails, availability of camping areas and special requirements such as obligatory walking direction on some sections, all have been updated for this edition according to the official regulations for the 2019/2020 hiking season. The atlas maps show the full area of the park with access roads and adjacent areas, with alternative paths, camp sites (color-coded according to the managing company), location of bus stops & park rangers' posts, all in large scale detail. Terrain relief elevation contours are drawn every 20 meters. The map scale of 1:50000 (1 cm = 500 meters) provides a wealth of detail while keeping low the weight of the atlas itself. The large page format of 8.5x11in minimizes page count and along with the overlapping map design allows for comfortable navigation. The details included in the topographic maps of this Atlas were specifically selected to be useful for trekkers, hikers and walkers of all interests, and make it easy to plan and enjoy both short excursions and hikes as well as long multi-day adventures along the main marked routes and/or adjacent trails and paths, which are also shown on the maps. Fold this ultralight atlas in half, stuff it in the side pocket of your backpack, and you will always have a detailed, reliable, information-rich, battery-independent, shatter-proof map for your adventure. Mercator projection SAD69 with both UTM and WGS84 coordinate grids.

Maps have been a part of human culture since the days of scratching on cave walls, and a richly illustrated history chronicles the road from simple diagrams used to avoid danger to complex, navigational charts used today. Displaying an array of historic atlases and a variety of cartography styles, this book allows young readers to test their map-reading skills while discovering the intricate beauty and the wealth of information held within. Geographic concepts are spotlighted through an assortment of guided activities--including finding the elevation of hills, plotting a course with a magnetic compass, creating three-dimensional models using a contour map, and performing a plot survey. Drawing the conclusion that the study of geography and maps is crucial to understanding an ever-changing planet, this handbook discloses the ways in which technological advances in cartography can further our discussions on climate change, warfare, environmental conservation, population growth, and other timely topics.

Colin O'Brady's awe-inspiring, New York Times bestselling memoir recounting his recovery from a tragic accident and his record-setting 932-mile solo crossing of Antarctica is a "jaw-dropping tale of passion and perseverance" (Angela Duckworth, New York Times bestselling author of *Grit*). Prior to December 2018, no individual had ever crossed the landmass of Antarctica alone, without support and completely human powered. Yet, Colin O'Brady was determined to do just that, even if, ten years earlier, there was doubt that he'd ever walk again normally. From the depths of a tragic accident, he fought his way back. In a quest to unlock his potential and discover what was possible, he went on to set three mountaineering world records before turning to this historic Antarctic challenge. O'Brady's pursuit of a goal that had eluded many others was made even more intense by a head-to-head battle that emerged with British polar explorer Captain Louis Rudd—also striving to be "the first." Enduring Antarctica's sub-zero temperatures and pulling a sled that initially weighed 375 pounds—in complete isolation and through a succession of whiteouts, storms, and a series of near disasters—O'Brady persevered. Alone with his thoughts for nearly two months in the vastness of the frozen continent—gripped by fear and doubt—he reflected on his past, seeking courage and inspiration in the relationships and experiences that had shaped his life. "Incredibly engaging and well-written" (*The Wall Street Journal*)—and set against the backdrop of some of the most extreme environments on earth, from Mt. Everest to Antarctica—this is "an unforgettable memoir of perseverance, survival, daring to dream big, and showing the world how to make the impossible possible" (Booklist, starred review).

In this exciting adventure mixed with amazing scientific study, a young, exuberant explorer and geoscientist journeys deep into the Amazon—where rivers boil and legends come to life. When Andrés Ruzo was just a small boy in Peru, his grandfather told him the story of a mysterious legend: There is a river, deep in the Amazon, which boils as if a fire burns below it. Twelve years later, Ruzo—now a geoscientist—hears his aunt mention that she herself had visited this strange river. Determined to discover if the boiling river is real, Ruzo sets out on a journey deep into the Amazon. What he finds astounds him: In this long, wide, and winding river, the waters run so hot that locals brew tea in them; small animals that fall in are instantly cooked. As he studies the river, Ruzo faces challenges more complex than he had ever imaged. The Boiling River follows this young explorer as he navigates a tangle of competing interests—local shamans, illegal cattle farmers and loggers, and oil companies. This true account reads like a modern-day adventure, complete with extraordinary characters, captivating plot twists, and jaw-dropping details—including stunning photographs and a never-before-published account about this incredible natural wonder. Ultimately, though, *The Boiling River* is about a man trying to understand the moral obligation that comes with scientific

discovery —to protect a sacred site from misuse, neglect, and even from his own discovery.

National Geographic's political map of Russia and the independent states of the former Soviet Union is one of the most authoritative maps of region. This "Classic" style wall map features a bright color palette with blue oceans and the country's terrain detailed in stunning shaded relief that has been a hallmark of National Geographic maps for over 75 years. Thousands of place names, accurate political boundaries, bodies of water, and major infrastructure networks such as roadways, airports, canals, oil pipelines, and railroads are detailed. Coastal bathymetry is shown with depth curves and soundings, and the boundaries of Northern Sea shipping routes are marked as well. Coverage also includes Norway, Sweden, Finland, Denmark, Latvia, Lithuania, Estonia, Ukraine, Belarus, Georgia, Armenia, Azerbaijan, Turkmenistan, Uzbekistan, Kazakhstan, Kyrgyzstan, Tajikistan, Afghanistan, Mongolia, North Korea, South Korea, and Japan, as well as portions of Germany, Poland, Iran, Pakistan, and China. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more

durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. "Map Scale = 1:12,617,000 Sheet Size = 30.25" x 23.5"'"

A beautifully illustrated journey through the history of travel--and traveling in style--from one of the world's preeminent fashion brands The mid-19th and early 20th centuries heralded new means of transport and equipment and, with them, new and original ways of exploring the world. Transatlantic liners, automobiles, long-haul airplanes, zeppelins, and express trains unfurled new horizons and changed travel itself into an adventure. Distant lands were no longer solely accessible to aristocrats, explorers, and adventurers. Instead, the world opened up to new groups of people eager to circumvent the globe. And for many of these new globetrotters, traveling was synonymous with Louis Vuitton, the French label whose iconic and functional luggage trunks could be found on nearly every boat, plane, car, and train around the world. In this beautiful book, author Francisca Mattéoli recounts 50 tales of thrilling travel undertaken in every possible mode of transit, from the hot air balloon to the space shuttle, each lavishly illustrated with more than 300 historical photographs and ephemera from Louis Vuitton's official archives. *Louis Vuitton: Extraordinary Voyages* is a journey all its own--an evocative and transporting account of the most surprising and transformative trips taken since the 19th century.

How a Massive Oil Spill Triggered an Environmental Catastrophe

The biggest oil spill in U.S. history that polluted the pristine waters of Alaska decades ago and killed thousands of birds, mammals, and fish, still haunts the people who are living with its aftermath. On Good Friday 1989, the huge oil tanker, Exxon Valdez, ran aground in Prince William Sound, spilling millions of gallons of crude oil into the water-oil that would eventually cover more than 1,000 miles of shoreline. Cleanup began immediately but there is still oil in the sound and Alaskans say life will never be the same.

In October 1972, Nando Parrado and his rugby club teammates were on a flight from Uruguay to Chile when their plane crashed into a mountain. Miraculously, many of the passengers survived but Nando's mother and sister died and he was unconscious for three days. Stranded more than 11,000 feet up in the wilderness of the Andes, the survivors soon heard that the search for them had been called off - and realise the only food for miles around was the bodies of their dead friends ... In a last desperate bid for safety, Nando and a teammate set off in search of help. They climbed 17,000-foot-high mountains, facing death at every step, but inspired by his love for his family Nando drove them on until, finally, 72 days after the crash, they found rescue.

Shine a light into the unknown There are still dark corners of our planet that are yet to be explored. In this remarkable book, Steve Backshall offers an unflinching account of his adventures into these uncharted territories around the globe, in search of world firsts. But all of them represent new tests of the limits of human endeavour. Accompanying a major 10-part series on BBC and Dave, Expedition is a breathtaking journey into the unknown, and a brilliantly written celebration of the pleasures of genuine discovery.

Steve Hely, writer for *The Office* and *American Dad!*, and recipient of the Thurber Prize for American Humor, presents a travel book about his journey through Central and South America. Part travel book, part pop history, part comic memoir, Hely's writing will make readers want to reach for their backpack and hiking boots. *The Wonder Trail* is the story of a trip from Los Angeles to the bottom of South America, presented in 102 short chapters. From Mexico City to Oaxaca; into ancient Mayan ruins; the jungles, coffee plantations, and remote beaches of Central America; across the Panama Canal; by sea to Colombia; to the wild Easter celebration of Popayán; to the Amazon rainforest; the Inca sites of Cuzco and Machu Picchu; to the Galápagos Islands; the Atacama Desert of Chile; and down to wind-worn Patagonia at the bottom of the Western Hemisphere; Steve traveled collecting stories, adventures, oddities, marvels, bits of history and biography, tales of weirdos, fun facts, and anything else interesting or illuminating. Steve's plan was to discover the unusual, wonderful, and absurd in Central and South America, to seek and find the incredible, delightful people and experiences that came his way. And the book that resulted is just as fun. A blend of travel writing, history, and comic memoir, *The Wonder Trail* will inspire, inform, and delight.
