Giving a child a coloring book to work on will help a child develop fine motor skills because what its eyes see will transfer to the brain and the brain will give instructions back to the eyes on how it should hold and move the crayon. The child will learn the relationship between what it sees and how it can color between the lines of the picture in front of it. As the child practices, its coloring skills will increase due to the hand/eye coordination.

This 50 Unique coloring Design book is the perfect gift for everyone. Christmas for kids is one of the most special times of the year, and we know it!
