Script and writing were among the most important inventions in human history, and until the invention of printing, the handwritten book was the primary medium of literary and cultural transmission. Although the study of manuscripts is already quite advanced for many regions of the world, no unified discipline of 'manuscript studies' has yet evolved which is capable of treating handwritten books from East Asia, India and the Islamic world equally alongside the European manuscript tradition. This book, which aims to begin the interdisciplinary dialogue needed to arrive at a truly systematic and comparative approach to manuscript cultures worldwide, brings together papers by leading researchers concerned with material, philological and cultural aspects of different manuscript traditions.

Manuscript Cultures: Mapping the Field

Design is One

Elise Gravel wants to write a totally drab book; her characters want to let loos. Who's gonna win? Don't take the title as a metaphor: it really is the worst book ever. Governor General Literary Award winning children's book author and illustrator Elise Gravel takes readers on an unexpected journey through the world's most boring book. The story's characters and omniscient readers alike quickly become annoyed by the author's bland imagination and rebel against her tired tropes and stale character choices, spouting sass in an attempt to get her attention and steer the narrative in a more interesting direction. After all, you don't even have to buy the book, but the characters? They're stuck in there for an eternity, and they're going to do their best to make the most of it, or at least have a little fun where they can. As the charming and bizarre true nature of the characters overpowers the dry attributes given to them by the author, this once blasé story quickly picks up speed, transforming the story into something much more unique than originally promised. With Gravel's signature goofy characters behind the wheel, no silly twist or rude body function is off the table! The last volume of this magnificent collection, which includes the final three books of the main saga, bringing to a close the adventures of Valerian, Laureline and the vanished Earth in style. This translation of Amatus's L'Ystoire de li Normant identifies the events of the Norman conquest of southern Italy and Sicily as recorded in one of the earliest chronicles.

Emissaries from planet N ä k ä n are heavily invested in an altruistic mission: saving a dying Earth and its inhabitants from a tragic end. Humans around the world, mesmerized by the extraterrestrial technology and the hope it brings to their planet, have so far shown little resistance to the mostly pacific invasion of their homelands. But other aliens involved in the undertaking appear to have less noble intentions for the blue planet...

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Although it seemed in the mid-1970s that the study of the troubadours and of Occitan literature had reached a sort of zenith, it has since become apparent that this moment was merely a plateau from which an intensive renewal was being launched. In this new bibliographic guide to Occitan and troubadour literature, Robert Taylor provides a definitive survey of the field of Occitan literary studies - from the earliest enigmatic texts to the fifteenth-century works of Occitano-Catalan poet Jordi de Sant Jordi - and treats over two thousand recent books and articles with full annotations. Taylor includes articles on related topics such as practical approaches to the language of the troubadours and the musicology of select troubadour songs, as well as articles situated within sociology, religious history, critical methodology, and psychoanalytical analysis. Each listing offers descriptive comments on the scholarly contribution of each source to Occitan literature, with remarks on striking or controversial content, and numerous cross-references that identify complementary studies and differing opinions. Taylor's painstaking attention to detail and broad knowledge of the field ensure that this guide will become the essential source for Occitan literary studies worldwide.

Archives are considered to be collections of administrative, legal, commercial and other records or the actual place where they are located. They have become ubiquitous in the modern world, but emerged not much later than the invention of writing. Following Foucault, who first used the word archive in a metaphorical sense as "the general system of the formation and transformation of statements" in his "Archaeology of Knowledge" (1969), postmodern theorists have tried to exploit the potential of this concept and initiated the "archival turn". In recent years, however, archives have attracted the attention of anthropologists and historians of different denominations regarding them as historical objects and "grounding" them again in real institutions. The papers in this volume explore the complex topic of the archive in a historical, systematic and comparative context and view it in the broader context of manuscript cultures by addressing questions like how, by whom and for which purpose were archival records produced, and if they differ from literary manuscripts regarding materials, formats, and producers (scribes).

The articles in this collection, written by medievalists and Renaissance scholars, are part of the recent "cultural turn" in translation studies, which approaches translation as an activity that is powerfully affected by its socio-political context and the demands of the translating culture. The links made between culture, politics, and translation in these texts highlight the impact of ideological and political forces on cultural transfer in early European thought. While the personalities of powerful thinkers and translators such as Erasmus, Etienne Dolet, Montaigne, and Leo Africanus play into these texts, historical events and intellectual fashions are equally important: moments such as the Hundred Years War, whose events were partially recorded in translation by Jean Froissart; the Political tussles around the issues of lay readers and rewriters of biblical texts; the theological and philosophical shift from scholasticism to Renaissance relativism; or European relations with the Muslim world add to the interest of these articles. Throughout this volume, translation is treated as a form of writing, as the production of text and meaning, carried out in a certain cultural and political ambiance, and for identifiable - though not always stated - reasons. No translation, this collection argues, is an innocent, transparent rendering of the original.
