This volume is intended for reference by the commercial sugar cane grower. Disciplines are covered for the successful production of a sugar cane crop. A number of good books exist on field practices related to the growing of sugar cane.

Two examples are R.P. Humbert's *The Growing of Sugar Cane* and Alex G. Alexander's *Sugarcane Physiology*.

Volumes of technical papers, produced regularly by the International Society of Sugar Cane Technologists, are also a source of reference. Perhaps foremost, local associations, such as the South African Sugar Technologists' Association, do excellent work in this regard. In my forty-five years of experience with the day-to-day problems of producing a satisfactory crop of sugar cane, deciding what should be done to produce such a crop was not straightforward.

Although the literature dealing with specific subjects is extensive, I tried to consolidate some of the material to provide the man in the field with information, or an overview of the subject matter.

Recognizing the potential of ICTs to make the classroom transaction of curriculum significantly more relevant and purposeful, principals and school administrators in India need to design appropriate IT strategies and oversee the entire implementation process in their schools. This book is guide to

the use of ICT in schools, covering issues of pedagogy, curriculum and learning. In brief, it deals with - Education uses of IT - Criteria for selection of hardware and software - Designing an IT-assisted curriculum - Teacher recruitment, training and desired competencies - Management and financial issues - Possible problem areas: plagiarism, privacy, hacking Lucidly written, with case studies highlighting successful strategies, this volume will be of immense importance to principals and administrators of schools as also students of education.

Any analysis of health financing issues has to begin with sound estimates of the level and flow of resources in a health system, including total levels of spending, the sources of health expenditures, the uses of funds in terms of services purchased, and in terms of who purchases them. The analysis should also aim at understanding how these resource flows are correlated with health system outcomes, including those of improving health, reducing health inequalities, and reducing the incidence of catastrophic health expenditure. National Health Accounts (NHA) provide a framework to collect, compi.
