Meet Morris Feldstein, a pharmaceutical salesman living and working in western Long Island who loves the Mets, loves his wife Rona, and loves things just the way they are. He doesn't enjoy the news; he doesn't like to argue. Rona may want to change the world; Morris wants the world to leave him alone. Morris does not make waves. But one day Morris is seduced by a lonely, lovesick receptionist at one of the doctors' offices along his sales route, and in a moment of weakness charges a non-business expense to his company credit card. No big deal, you might think. Easy mistake. But the government's top-secret surveillance program, anchored by a giant, complex supercomputer known as NICK, thinks differently. Eventually NICK begins to thread together the largely disparate and tenuously connected strands of Morris's life.

Medical literature for health care practitioners on the evaluation and treatment of breastfeeding issues has been disjointed, conflicting, and difficult to find. The field of breastfeeding medicine itself is nonexistent—there are no "breastfeeding doctors" who are specifically trained to understand this complex and interactive process. While much of the literature about breastfeeding describes how it "should" work, there is currently nothing available to explain why it often fails and how to treat it. Clinician's Guide to Breastfeeding: Evidence-based Evaluation and Management is written for health care practitioners who work with breastfeeding mothers; physicians, nurses, nurse practitioners, and lactation consultants. It provides clear information and clinically tested strategies to help professionals guide new mothers to breastfeed successfully. The first of its kind to consider the entirety of the breastfeeding experience, Clinician's Guide to Breastfeeding is written by Dr. Linda D. Dahl, a leading expert on the subject. It is a comprehensive review of breastfeeding, covering objective analyses of ideal or "normal" nursing, as well as the evaluation and treatment of abnormal nursing, including case studies to illustrate the treatment decision-making process.
