If photography is generally considered the art of light, then Petri Juntunen's photographs (*1975 in Gothenburg) are the virtuoso counter-thesis to this idea. Because his medium is not lightness, but all-encompassing darkness. His motif is not pictorial genesis, but its deterioration. In his series 'At the Heart of It All', time-worn objects, overgrown landscapes, wrecks, and ruins peel themselves out of a canvasfilling night in order to simultaneously testify to their own existence and their dissolution. In doing so, the artist renders what he describes as the fundamental existential conflict of life visible and palpable: How one looks at his own existence, at the same time seeing the beginning and sensing the inevitable end.? It is this human condition to which Juntunen lends photographic expression for the purpose of sharing with us its uncanniness, its elegy, and above all its sublimity.

Find your route to a more sustainable lifestyle with Dick Strawbridge, of Channel 4's Escape to the Chateau, and his son James. We can all take steps to reduce our carbon footprint and be more self-sufficient. For some, that might mean upping sticks and living off the land. For the rest of us, the reality might involve smaller, but no less important, lifestyle changes: cutting back on plastic or food waste, growing vegetables, preserving meat and fish, preparing jams and chutneys, baking sourdough bread, making your own plant-based milks, or keeping a chicken or two. Dick and James Strawbridge know what it's like to make these changes. Between them, they've lived on a smallholding, in a terraced house, and even a chateau. In this updated edition of Practical Self-sufficiency they share everything they've learned, and give you the tools you need for a more rewarding and environmentally conscious life.

The building physics and comfort-relevant properties of gypsum drywall construction make it a particularly sustainable and versatile construction method. The book links the great architectural and sculptural potential of this building method with its construction requirements. Its focus is on the diversity of the system, its specific prerequisites, and its systematic implementation in design ideas. The space concept and elements in existing and new buildings are analyzed, and their implementation illustrated in detail. In addition, numerous examples of details and building components explain the effect of light, color, material, surface, and construction. Drawings at different scales illustrate the tectonic relationships in space.

Alice lives in a house by the sea. Snakes and spiders don't scare her, but she's very afraid of the deep ocean water. Her swimming, splashing, diving family urge her to come out and play with them, but no matter how hard she tries, Alice still can't leave the green shallows for the deep. This moving story about a girl besting her fears is matched with warm, light-splashed illustrations.

With Keto For One, get 100 delicious dishes for every meal of the day—perfectly proportioned and macro-balanced. Single-serve cooking is one of the biggest challenges when trying to adhere to an eating plan. Most recipes are portioned for 4-6 servings, which means you'll be eating the same thing for a week or trying to adjust recipes and struggling to figure out proper cooking times and fractions of measurements. With keto, you also have the additional challenge of balancing your macronutrients—a few too many carbs or not enough fat and your recipe is no longer in the ketogenic zone. No more fussing with recipes. No more eating leftovers. No more wasted food (or money!). No more cobbling together snacks and calling it a meal. No more temptation to give into carb-laden, nutrient-void, single-serving convenience foods. Just delicious recipes from "low-carb queen" and best-selling author Dana Carpender. Enjoy delicious keto burgers and smoothies, as well as quick skillet stir-fries and plenty of tasty meals that can be pulled together quickly or ahead of time.

New things can be scary -- but as one endearing little girl discovers, it's perfectly fine to take your time. Swimming lessons are on Saturdays, and every Saturday one little girl has a stomachache. When she gets to the pool it's loud, the floor is wet and slippery, and her swim cap is too tight. Her swimming instructor, Mary, says it's OK to sit by the edge if she doesn't want to get in the water this week. The next Saturday the girl has a stomachache again, but with Mary's gentle encouragement, she eventually manages to make it into the pool to practice her kicks. Little by little, the girl's confidence grows -- until one Saturday comes around when she has no stomachache at all! In a charming and relatable story about trying something new, author-illustrator Hyewon Yum shows that sometimes a little bravery and a lot of patience are all you need to face your fear.

The Bible is moving, inspirational and endlessly fascinating - but is it true? Starting with Genesis and the implicit background to the birth of Christ, Robin Lane Fox sets out to discover how far biblical descriptions of people, places and events are confirmed or contradicted by external written and archaeological evidence. He turns a sharp historian's eye on when and where the individual books were composed, whether the texts as originally written exist, how the canon was assembled, and why the Gospels give varying accounts even of the trial and condemnation of Jesus.

When the SARS virus broke out in China in January 2003, Karl Taro Greenfeld was the editor of Time Asia in Hong Kong, 10,000 miles from the epicenter of the outbreak. After vague, initial reports of terrified Chinese boiling vinegar to "purify" their food, he and his staff soon found themselves immersed in the story of a lifetime. Deftly tracking a mysterious viral killer from one of the first victims to China's overwhelmed hospital wards—from cutting-edge labs where researchers struggle to identify the virus to the war rooms at the World Health Organization headquarters in Geneva—China Syndrome takes readers on a journey that blows through the Chinese government's effort to cover up the disease . . . and sounds a clarion call warning of what is to come: a great viral storm potentially more deadly than any respiratory disease since the influenza of 1918.

This short book provides a comprehensive and unified treatment of time-varying vector fields under a variety of regularity hypotheses, namely finitely differentiable, Lipschitz, smooth, holomorphic, and real analytic. The presentation of this theory in a real analytic setting is new, as is the manner in which the various hypotheses are unified using functional analysis. The main contribution of the book is the coherent development of locally convex topologies for the space of real analytic sections of a vector bundle, and the development of this in a manner that relates easily to classically known topologies in, for example, the smooth and differentiable cases. The tools used in this development will be of use to researchers in the area of geometric analysis.
