*As a doctoral candidate, business consultant, and business plan writer, I am often asked by aspiring and seasoned entrepreneurs alike, "What is the first step for starting a business (or expanding a current operation)?" When I first started out as a business consultant, I would explain to my client their place in the entrepreneurial process. I then support this analysis with proven academic and practicing business theory, along with recommending specific steps to take to start or expand their operations. After going through this process time and time again with entrepreneurs, it dawned on me that the first step I ALWAYS recommend is writing a business plan. Unfortunately, most entrepreneurs do not know how to write a professionally polished and structured business plan. Hell, most owners don't know how to write any type of business plan at all. From this issue, I decided to write this book focused on a ten-step process for writing a well-structured business plan. The business plan writing steps include all aspects of the business plan writing process, beginning with developing the executive summary to constructing a professional and polished funding request. In each step, I introduce you to a different business plan section. I then explain in layman's terms what the section means, offer a "real world" business plan sample, and analyze the sample to help you understand the component. The objective of this detailed process is to ensure a full understanding of each section and segment, with the goal of you being able to write a professional business plan for yourself by yourself! IF you still need help writing your business plan, at the end of the book, I ALSO supply you with professionally written samples to use. Samples include a restaurant business plan, retail business plan, coffee shop business plan, AND a Food Truck business plan for you to use. On a final note, to put the cherry on top, I have conducted and included preliminary market research for each one of the industries noted above for you to use in your personalized plans! In the end, I am supremely confident that this book, with the numerous tools and tips for business plan writing, will help you develop your coveted business plan in a timely fashion.*

Seminar paper from the year 2017 in the subject Business economics - Company formation, Business Plans, grade: 2.0, University of Applied Sciences München, language: English, abstract: This paper proposes a business plan for the Fitness Restaurant "Eat Fit" in Stuttgart. In the concept of Eat-fit The USP (unique selling proposition) clearly refers to the offer for the primary target group, sportsmen and nutritionally conscious people. Their loyalty to our restaurant as repeat customers is the top priority. Through this approach, the restaurant has a clear competitive advantage that is reflected in this unique service and offer for those affected. The restaurant is run in the legal form of a GBR. Low form requirements and the corresponding design friendliness are the main advantages of this legal form, which make it possible to make adjustments and changes afterwards. With the provision of 30,000 euros in equity in the company, in the first year 2018 a further demand of 60,000 euros is left, which is to be covered by a loan. When searching for a suitable location, the city of Stuttgart is a choice that fully meets the requirements for such a restaurant. It has the highest population density in the region and is one of the major cities of Germany and is popular with tourists. The restaurant should be close to at least one gym, and also centrally located in the city centre. The first fitness restaurant in Stuttgart can be expected to be an emerging competition. The marketing strategies for the Eat-fit are derived from results of competitive analyses. Due to the high competition in the gastronomy sector and the initial unfamiliarity, the market penetration in the introductory phase is to be carried out on the basis of the strategy of fast market exhaustion. One of the main tasks of the company is the formation of a trust relationship with the targeted customer base. The fitness industry has enjoyed a strong reputation by many people for quite some time, and because of this the interest in healthy eating has grown. However nowadays, many health-conscious people are unable to visit certain restaurants due to their food preparation not being focused on the nutritional content of the food. "Eat- fit" is the concept to of building a restaurant that is established as a service quality leader of high-quality and nutrient-rich food especially for sportsmen, gym goers and nutritionally conscious people in gastronomy.

**Book & CD-ROM. Restaurants are one of the most frequently started small businesses, yet have one of the highest failure rates. A business plan precisely defines your business, identifies your goals, and serves as your firm's resume. The basic components include a current and proforma balance sheet, an income statement, and a cash flow analysis. It helps you allocate resources properly, handle unforeseen complications, and make good business decisions. Because it provides specific and organised information about your company and how you will repay borrowed money, a good business plan is a crucial part of any loan application. Additionally, it informs personnel, suppliers, and others about your operations and goals. Despite the critical importance of a business plan, many entrepreneurs drag their feet when it comes to preparing a written document. They argue that their marketplace changes too fast for a business plan to be useful or that they just don't have enough time. But just as a builder won't begin construction without a blueprint, eager business owners shouldn't rush into new ventures without a business plan. The CD-ROM will cover the following subjects: Elements of a Business Plan, Cover sheet, Statement of purpose, The Business, Description of The Restaurant, Marketing, Competition, Operating procedures, Personnel, Business insurance, Financial Data, Loan applications, Capital equipment and supply list, Balance sheet, Breakeven analysis, Pro-forma income projections (profit & loss statements), Three-year summary, Detail by month, first year, Detail by quarters, second and third years, Assumptions upon which projections were based, Pro-forma cash flow, Supporting Documents, For franchised**

businesses, a copy of franchise contract and all, supporting documents provided by the franchisor, Copy of proposed lease or purchase agreement for building space, Copy of licenses and other legal documents, Copy of resumes of all principals, Copies of letters of intent from suppliers, etc. A new study from The Ohio State University has found the restaurant industry failure rate between 1996 and 1999 to be between 57-61 percent over three years. Don't be a statistic on the wrong side, plan now for success with this new book and CD-Rom package.

The explosive growth of the pizza and sub shops across the country has been phenomenal. Take a look at these stats: Americans eat approximately 100 acres of pizza each day, or about 350 slices per second. Pizza is a \$32+ billion per year industry. Pizza restaurant growth continues to outpace overall restaurant growth. Pizzerias represent 17 percent of all restaurants. Pizza accounts for more that 10 percent of all food service sales. Here is the manual you need to cash in on this highly profitable segment of the food service industry. This new book is a comprehensive and detailed study of the business side of the restaurant. This superb manual should be studied by anyone investigating the opportunities of opening a pizza or sub restaurant. It will arm you with everything you need including sample business forms, leases, and contracts; worksheets and checklists for planning, opening, and running day-to-day operations; sample menus; inventory lists; plans and layouts; and dozens of other valuable, time-saving tools of the trade that no restaurant entrepreneur should be without. While providing detailed instruction and examples, the author leads you through finding a location that will bring success, learn how to draw up a winning business plan (The companion CD-ROM has the actual pizza restaurant business plan that you can use in MS Word), basic cost-control systems, profitable menu planning, successful kitchen management, equipment layout and planning, food safety and HACCP, successful beverage management, legal concerns, sales and marketing techniques, pricing formulas, learn how to set up computer systems to save time and money, learn how to hire and keep a qualified professional staff, new IRS tip-reporting requirements, managing and training employees, generate high-profile public relations and publicity, learn low-cost internal marketing ideas, low and no-cost ways to satisfy customers and build sales, and learn how to keep bringing customers back, accounting & bookkeeping procedures, auditing, successful budgeting and profit planning development, as well as thousands of great tips and useful guidelines.
