The I-Series Applications textbooks strongly emphasize that students learn and master applications skills by being actively engaged- by doing. These texts have been written with clear, error-free, and unambiguous steps to accomplish tasks that lead to a finished document, worksheet or database table. The authors made the decision that teaching “how” to accomplish some task is not enough for complete understanding and mastery. Prior to introducing steps, the authors discuss why the steps students are about to experience are important and what role the steps play in the overall plan for creating a document, workbook or database. The best way to become a champion chess player is by playing over complete games. Manus's stories and poetry are meant to lift you up between each game. After all, only chess and chess only, makes a tired chess player. Many of the things that the characters in the chess stories do are gained from the experiences of Manus's childhood in the neighborhoods of Boston. So sit back, grab a board and the book and enjoy a tall tale, a poem and exciting games. Here's a word from a grand checker player, his late father, God bless him: He said, "Manus, sharpen your gippy to avoid a bad turn." So, he says the same to you. God bless and good chess.

Enter the world of Scottish folklore with this unique hardcover guide. Retellings of traditional tales, full-color photographs of knitted costumes inspired by the stories, plus patterns for simpler versions of the original designs.

This book provides a structured treatment of the key principles and techniques for enabling efficient processing of deep neural networks (DNNs). DNNs are currently widely used for many artificial intelligence (AI) applications, including computer vision, speech recognition, and robotics. While DNNs deliver state-of-the-art accuracy on many AI tasks, it comes at the cost of high computational complexity. Therefore, techniques that enable efficient processing of deep neural networks to improve metrics—such as energy-efficiency, throughput, and latency—without sacrificing accuracy or increasing hardware costs are critical to enabling the wide deployment of DNNs in AI systems. The book includes background on DNN processing; a

description and taxonomy of hardware architectural approaches for designing DNN accelerators; key metrics for evaluating and comparing different designs; features of the DNN processing that are amenable to hardware/algorithm co-design to improve energy efficiency and throughput; and opportunities for applying new technologies. Readers will find a structured introduction to the field as well as a formalization and organization of key concepts from contemporary works that provides insights that may spark new ideas.

Brands are defenseless. We wipe our feet on them, we throw them in the trash, and we don't have the patience to let them grow to be all they can be. That leads to us cheating on them and setting our businesses up for failure. Successful businesses know that brands need protection, love, and understanding. For smart businesses that want to succeed, it's about Finding Brand. The brand book is the quintessential guidebook that will help a business create alignment to reach its goals. A brand book should be more than just a marketing department tool. It should be the guiding internal document that guides employees and stakeholders in every action. It should be the culmination of all internal and external thinking; it should be a business's tangible representation of all that makes your business unique and special. In Finding Brand: The Brand Book Tutorial, Tisha Oehmen teaches you how

A guide to using the Ghidra software reverse engineering tool suite. The result of more than a decade of research and development within the NSA, the Ghidra platform was developed to address some of the agency's most challenging reverse-engineering problems. With the open-source release of this formerly restricted tool suite, one of the world's most capable disassemblers and intuitive decompilers is now in the hands of cybersecurity defenders everywhere -- and The Ghidra Book is the one and only guide you need to master it. In addition to discussing RE techniques useful in analyzing software and malware of all kinds, the book thoroughly introduces Ghidra's

components, features, and unique capacity for group collaboration. You'll learn how to:

- Navigate a disassembly
- Use Ghidra's built-in decompiler to expedite analysis
- Analyze obfuscated binaries
- Extend Ghidra to recognize new data types
- Build new Ghidra analyzers and loaders
- Add support for new processors and instruction sets
- Script Ghidra tasks to automate workflows
- Set up and use a collaborative reverse engineering environment

Designed for beginner and advanced users alike, *The Ghidra Book* will effectively prepare you to meet the needs and challenges of RE, so you can analyze files like a pro.

The year is 2022. The South China Sea is the busiest waterway in the world, and is on the verge of becoming a cauldron of violent naval destruction. With interviews, verified press reports, and the U.S. government's investigation transcripts, The Eagle in Autumn describes the criminal activity that transpires at the U.S. defense contractor Dayton-Anderson-activity that considerably affects the outcome of the conflict.

Espionage runs rampant as agents working for the People's Liberation Army Navy (PLAN) try to gain access to security intelligence from the Americans, specifically on the RU-35, a field upgrade to a Howitzer-type rocket-propelled artillery shell and also the Conqueror missile guidance system. Recruited by the PLAN to steal American secrets, Ian Manning befriends Anne Seybold, a beautiful scientist who is managing the RU-35 and Conqueror projects. Using Seybold, he blackmails the CEO of Dayton-Anderson, a company contracted by the US Government to develop both of the top secret programs. In the years leading up to the South China Sea War, the battle for secrets exacts a heavy price. But it is those secrets, combined with a misguided U.S. foreign policy, a crumbling U.S. infrastructure, and corrupt corporate officers, that end up contributing to the most significant U.S. naval conflict of the twenty-first century. Pacific Northwest by the ice flows are adopted by the Navajo Nation in New Mexico. A boy rescues and nurses to health a bald eagle, considered to be the guardian of his type of Indians, for which he earns the name, Eagle Claw. He distinguishes himself by protecting his eagle patient against the attempt of Cheatum, an unpopular Indian trader, to steal the bird for his feathers to make a valuable head dress. Healing Henry, the Medicine Man of these people tells the boy he has been selected by the Spirits to be his successor and urges him to go to school to learn all he can of scientific medicine to go with the accumulated medical wisdom of his race. In the mission school, he learns that their goal is to assimilate all Indians to make them Christians and imitation white people. His goal of becoming a medicine man is ridiculed but he wins their support by becoming a star basket ball player. He learns to compare Indian mythology and what his race considers Christian mythology and the power of his Indian Spirits with that of the Christian God. His brilliance causes the Headmaster to offer to help Harry (his non-Indian name) to get scholarships to study to become a medical doctor - provided he will join the church. At the school, Eagle Claw meets Dollie, also of the Mountain People, a cheer leader for the basket ball team. She teaches him the difference between Indian and white people's love to kiss. Believing in equality between men and women, as Mountain People do, she tells

him she will be his partner, but not his possession, that she will share equally in family decisions, and will walk beside him rather than behind him as most women of the world do. Bruce Brownwood, home from his first year at the University of New Mexico, volunteers to manage one of his father's Indian Trading Posts until a replacement can be found. In a year he learns the Navajo language, becomes interested in their culture and decides to devote his life to helping bring modern scientific medicine to help them. He establishes several run-ins with Cheetum who wants no competition in his Indian trading business. There Bruce meets Eagle Claw while helping to save the life of a Nacaho who has been given up for dead with acute Mastoiditis. Together they join efforts to combine scientific wisdom of medicine men. Bruce helps Eagle Claw to learn about the life of medical doctors so that he will know better whether he wants to understand the long journey to become the first Indian MD. When Bruce's wife, Laura is near death and her white doctors have given up on her, Eagle Claw holds a Sing to ask the Indian Spirits to save her. The response to Eagle Claw's, now the Indian Medicine Man, pleas in the form of a lightning and thunder storm. While Eagle Claw makes his pleas, Laura shows marked improvement. "Makes a believer out of one," Bruce tells her as they both give credit to the power of the Spirits along with that of their Christian God. Ultimately, Eagle Claw faces the choice, to study

to be an MD or to serve as the Medical Man for his tribe. The book highlights contrasts and similarities between white and Indian cultures, traditions and religious beliefs and treatments. It exposes the ways Christian white people as well as so-called pagan Indians have lived in ignorance for centuries. It will bring both tears and laughter to readers.

The Chaucer Review

Due to Enemy Action tells for the first time a World War II story that spans generations and straddles two centuries, a story that begins with the dramatic Battle of the Atlantic in the 1940s and doesn't conclude until an emotional Purple Heart ceremony in 2002. Based on previously classified government documents, military records, personal interviews, and letters between crew members and their families, this is the saga of the courageous survival of ordinary sailors when their ship was torpedoed and their shipmates were killed on April 23, 1945, and the memories that haunted them after the U.S. Navy buried the truth at war's end. It is the story of

a small subchaser, the Eagle 56, caught in the crosshairs of a German U-boat, the U-853, whose brazen commander doomed his own crew in a desperate, last-ditch attempt to record final kills before his country's imminent defeat. And it is the account of how one man, Paul M. Lawton, embarked on an unrelenting quest for the truth and changed naval history. Author Stephen Puleo draws from extensive personal interviews with all the major players, including the three living survivors (and a fourth who emerged as the book went to press); a senior U.S. naval archivist who worked with German historians after the war to catalog U-boat movements; and the son of the man who commanded America's sub-tracking "Secret Room" during the war. Due to Enemy Action also describes the final chapter in the Battle of the Atlantic, tracing the epic struggle that began with shocking U-boat attacks against hundreds of defenseless merchant ships off American shores in 1942 and ended with the sinking of the Eagle 56, the last American warship sunk by a German U-boat.

Using LANDCADD is a practical text designed to teach students how to get maximum benefit from LANDCADD landscape design software in the minimum amount of time. Students are lead through a series of landscape design tutorials and exercises which parallel the normal production of construction documents in landscape design practice. The book emphasizes how to use LANDCADD productively, creatively and

efficiently in the course of creating CADD landscape designs. It leads the reader through the creation of title block, base plan, construction and hardscape plan, planting plan, irrigation plan, 3D elevation and more. In addition, other tutorials and exercises show the reader how to produce customized symbols, macros and toolbars to make LANDCADD even more suitable for use in a landscape design practice. Its tutorial approach makes this a perfect book for the professional self-paced user. Keywords: AutoCAD for

The Eagle in Autumn

With a genius IQ, a past career as a circus acrobat, and a black belt in karate, criminology professor Dr. Robert Frederickson—better known as "Mongo the Magnificent"—has a decidedly unusual background for a private investigator. He also just so happens to be a dwarf.

Investigating illegal CIA activities in Haiti leads Mongo and his brother, former NYPD cop Garth Frederickson, to a grisly discovery: five victims of voodoo ritual sacrifice. But that's just the first surprise. Soon they uncover a wildly ambitious assassination plot that not only puts them in the cross hairs but also has the potential to change the fate of the United States forever .

In celebration of the 50th anniversary of the Apollo 11 landing, the endlessly-mysterious moon is explored in this reprint short science fiction anthology from award-winning editor and anthologist Neil Clarke (Clarkesworld, The Best Science Fiction of the Year). On July 20, 1969, mankind made what had only years earlier seemed like an impossible leap forward: when Apollo 11 became the first manned mission to land on the moon, and Neil Armstrong the first person to step foot on the lunar surface. While there have only been a handful of new missions since, the fascination with our planet's satellite continues, and generations of writers and artists have imagined the endless possibilities of lunar life. From adventures in the vast gulf of space between the earth and the moon, to journeys across the light face to the dark side, to the establishment of permanent residences on its surface, science fiction has for decades given readers bold and forward-thinking ideas about our nearest interstellar neighbor and what it might mean to humankind, both now and in our future. The Eagle Has Landed collects the best stories written in the fifty years since mankind first stepped foot on the lunar surface, serving as a shining reminder that the moon is and always has been our most visible and constant example of all the infinite possibility of the wider universe.
