Praise for Everyone Leads
”If America is going to continue to thrive in the twenty-first century, we must strengthen our sense of community. In Everyone Leads, Schmitz lays out the challenges for those of us who have a passion to make a difference and, more important, the strategies to spark lasting change from the grassroots up. His unique perspective and experience make this a must-read for community activists.”
”Geoffrey Canada, president and CEO, Harlem Children’s Zone
”This moment in history demands that we stop waiting for others!especially others living in Washington, D.C.to solve the problems and right the wrongs of our times. Now, more than ever, we must mine the most underutilized resource available to us: We the People. Everyone Leads shows us how.”
”Arianna Huffington, president and executive editor, Huffington Post Media Group
”Social change has always come from the leadership of the many, not the few. Everyone Leads shows us how we can all step up and contribute to social change.”
”Tavis Smiley, author, broadcaster, philanthropist
”Every nonprofit can learn from Public Allies’ example that the leadership we need to solve problems exists within our communities. Everyone Leads is a guide to inclusion, collaboration, and community building that will inspire readers to see leadership and opportunity in places we don’t usually look.”
”Sterling Speirn, CEO, W.K. Kellogg Foundation
”Schmitz has produced the road map we need for this ‘all hands on deck’ moment when we need a new spirit of collaborative leadership and action to face the problems of our day. Reading this book, we are not surprised that Michelle Obama learned from Public Allies how to build leaders and build communities.”
”Harris Wofford, former United States Senator, and CEO of the Corporation for National and Community Service under President Bill Clinton

This book describes how assistive technology can help handicapped, elderly and acutely sick people to manage their daily lives better and stay safe in the home. It discusses how safety is understood from an ethical, technical and social perspective, and offers examples of the problems that users, their helpers and professional carers have with assistive technology in everyday situations. The book provides insights from user-centred research and uses photographs to illustrate the main topic: how users and technology can work together to ensure safety. User-focused and combining experience with research, the book will interest users of these kinds of technology, health professionals who might introduce and/or prescribe them, engineers who develop and sell assistive technological gadgets, and architects who build safe homes – as well as researchers and students who work in these fields. It provides an overview of the existing technology, examines ways to test its effectiveness from the point of view of users, health professionals and researchers from different fields (architecture, education, engineering, facility management, medicine, nursing, occupational therapy, rehabilitative medicine, physiotherapy, social science and speech therapy), and lists useful addresses, websites and literature

The ultimate personalized baby book! 40 pages of writing prompts to record baby’s first year with spaces for pictures and beautiful designs to fit the modern mom style. Document everything from baby’s first ultrasound to their first foods and first time walking! Wonderful gift from Grandma, Grandparents, Aunt or Uncle. Customized name gives this baby book a very personal feel. Contains 40 colorful pages full of writing prompts and spots for photographs. Smooth soft gloss cover Check out Loveable Fringe shop page for more color options and personalized designs!

This book constitutes the refereed proceedings of the 7th Conference of the Workgroup Human-Computer Interaction and Usability Engineering of the Austrian Computer Society, USAB 2011, in Graz, Austria, in November 2011. The 18 revised full papers together with 29 revised short papers and 2 posters presented were carefully reviewed and selected from 103 submissions. The papers are organized in topical sections on cognitive approaches to clinical data management for decision support, human-computer interaction and knowledge discovery in databases (hci-kdd), information usability and clinical workflows, education and patient empowerment, patient empowerment and health services, information visualization, knowledge & analytics, information usability and accessibility, governmental health services & clinical routine, information retrieval and knowledge discovery, decision making support & technology acceptance, information retrieval, privacy & clinical routine, usability and accessibility methodologies, information usability and knowledge discovery, human-centred computing, and biomedical informatics in health professional education.

This volume constitutes the proceedings of the 11th International Conference on post-quantum cryptography, PQCrypto 2020, held in Paris, France in April 2020. The 29 full papers presented in this volume were carefully reviewed and selected from 86 submissions. They cover a broad spectrum of research within the conference’s scope, including code-, hash-, isogeny-, and lattice-based cryptography, multivariate cryptography, and quantum cryptanalysis. HOW TO SEPARATE THE NEWS FROM THE NOISE: WHAT EVERY INVESTOR NEEDS TO KNOW There is no shortage of financial advice these days. From cocky cable pundits to nattering news columnists to off-grid online bloggers, there are more so-called experts than ever before--and the noise can be downright deafening. This no-bull, bottom-line guide from "The Reformed Broker" Josh Brown and Yahoo Finance's Jeff Macke will help you cut through the cacophony and make the most of today's media news. It's an eye-opening crash course in separating financial facts from fiction—featuring interviews with some of the world ’s most influential investors, including: JIM CRAMER (Mad Money) takes you behind the scenes of his polarizing TV program--and talks about his clash with Jon Stewart on The Daily Show. HENRY BLODGET (Business Insider) shares anecdotes about tangling with Eliot Spitzer, covering the Martha Stewart trial, and launching his Business Insider site as a "marked man." BEN STEIN (Win Ben Stein's Money) reveals how he really feels about Bernanke, Bogle, Buffett, and bailouts. KAREN FINERMAN (CNBC's Fast Money) exposes the hype behind the headlines—and the "show biz" demands on television news pundits. HERB GREENBERG (TheStreet.com) explains why investors need to follow social media, where the "real" news is disseminated. BARRY RITHOLTZ (Bailout Nation) reveals his secret for "watching" financial TV. You'll also find invaluable insights from the original father of financial TV, Jim Rogers, and from James Altucher, the most shockingly honest commentator in the history of the medium. And you'll get a front-row seat for the processing and packaging of the news and learn everything you need to know about the talking heads who shape each day's narrative. Up-close. In-depth. All-true. All-true. Clash of the Financial Pundits is the one guide that will change the way you look at markets and investing forever. PRAISE FOR JOSH BROWN'S BACKSTAGE WALL STREET "Much like Michael Lewis's Liar's Poker captured the essence of 1980s institutional Wall Street, Brown's Backstage Wall Street re-creates the boiler room retail brokerage culture of the 1990s and early 2000s in vivid color." -- FORBES "Joshua Brown may be the funniest writer on finance today, but Backstage Wall Street could make you cry more than laugh. The buffoons, manipulators, and incompetents Brown parades before us are the stewards of our retirement accounts." -- BARRON'S "Run don't walk to read Brown's chronicles of deception [perpetrated by] those wonderful folks on Wall Street, who nearly bankrupted the world's financial system a few short years ago." -- DOUGLAS A. KASS, Seabreeze Partners Management, Inc.

This book is a collection of illustrated papers by British architects Jonathan Sergison and Stephen Bates written between 2002 and 2007. Writing, like drawing and talking together, supports their collaborative and creative work, providing as it does a tangible reference point for communication and in the search for shared objectives. Although each of the papers included in this volume was written by one of the architects, they acknowledge shared authorship of their content and objective. In the preparation of each paper, the observer acts as a friendly critic to the write, integral to the process and supportive of the exploration of personal and shared experience. Some of theses papers wrere written as a result of self-imposed discipline, others were prepared as lectures, to support their teaching practice, to highlight a particular theme or encourage a way of looking at something. Others were written as contributions towards symposia, conferences and publications, or in response to invitations to speak publicly about their work. In some cases, a lecture based on notes and images has been subsequently developed for publication. This results in a rich mix in terms of conet, lenght, structure and character. The twenty papers are organised thematically and chronologically within each section, addressing reflections on their own position within architectural discourse, on the process of making buildings, on some of the ideas that recur in their work and on aspects of place.

How to Build a Better Vocabulary

***This volume sets out the critical role and application of evaluation in identifying and developing good practice in a range of dementia care settings. It discusses the evaluation of care at different levels, covering evaluation methods, ethics, use of technology and the user's role in the evaluation process itself.***

***With the catalog This is modern, the German Werkbund Berlin presents the status of contemporary architecture in Germany: 22 renowned architecture firms show their designs for a German exhibition pavilion on the Biennale site in the Giardini in Venice. The existing pavilion, built in 1909 and modified in 1938, was hypothetically stated as needing renewal, reopening the question of a contemporary national exhibition building for the whole world to see.The fact that the Werkbund is questioning its status specifically in the year 2014 and in the context of this year’s Architecture Biennale – which is concerned with the Fundamentals of architecture and with 100 years of Absorbing Modernity – is of course linked to the emblematic event of the Werkbund exhibition of 1914 in Cologne. 100 years after this first large-scale exhibition, the German Werkbund Berlin also addresses the question of what insights have been gained by the experience of 100 years of modernity, in the search for an appropriate approach to architectural creation.***

***The puzzles and problems in Exceptional C++ not only entertain, they will help you hone your skills to become the sharpest C++ programmer you can be. Many of these problems are culled from the famous Guru of the Week feature of the Internet newsgroup comp.lang.c++, moderated, expanded and updated to conform to the official ISO/ANSI C++ Standard. Try your skills against the C++ masters and come away with the insight and experience to create more efficient, effective, robust, and portable C++ code.***

***Jonathan Sacker was born with Cystic Fibrosis, a genetic disease which most effects the respiratory and digestive systems. "Imperfect Perfection" is a journey through the difficult and tumultuous battles that have resulted from this disease. With a comical and "laugh-at-yourself" style, Jonathan shares his life in an uplifting and positive manner with hope that each reader will find perfection within their own imperfection.***

***Green Foods for Men***

This book presents multi-sector practical cases based on the author’s own research. It also includes the best practice, which could serve as a benchmark for the creation of smart cities. The global urbanisation index, i.e., the ratio of city dwellers to the total population, has been steadily increasing in recent years. It is highest in the Americas, followed by Europe, Asia and Africa. The city of the future will combine the intelligent use of IT systems with the potential of institutions, companies and committed, creative inhabitants. The administrative boundaries of today’s cities put certain constraints on their further growth, but in the future these boundaries will no longer be as relevant. Cities in Europe face the challenge of reconciling sustainable urban development and competitiveness – a challenge that will likely influence issues of urban quality such as the economy, culture, social and environmental conditions, changing a given city’s profile as well as urban quality in terms of its composition and characteristics.

Bearing Capacity of Roads, Railways and Airfields includes the contributions to the 10th International Conference on the Bearing Capacity of Roads, Railways and Airfields (BCRRA 2017, 28–30 June 2017, Athens, Greece). The papers cover aspects related to materials, laboratory testing, design, construction, maintenance and management systems of transport infrastructure, and focus on roads, railways and airfields. Additional aspects that concern new materials and characterization, alternative rehabilitation techniques, technological advances as well as pavement and railway track substructure sustainability are included. The contributions discuss new concepts and innovative solutions, and are concentrated but not limited on the following topics:
· Unbound aggregate materials and soil properties
· Bound materials characteristics, mechanical properties and testing
· Effect of traffic loading
· In-situ measurements techniques and monitoring
· Structural evaluation
· Pavement serviceability condition
· Rehabilitation and maintenance issues
· Geophysical assessment
· Stabilization and reinforcement
· Performance modeling
· Environmental challenges
· Life cycle assessment and sustainability
Bearing Capacity of Roads, Railways and Airfields is essential reading for academics and professionals involved or interested in transport infrastructure systems, in particular roads, railways and airfields.

Drawing on findings from a large EU-funded research project that took place over three years, this book analyses educational trajectories of young people in eight European countries: Finland, France, Germany, Italy, the Netherlands, Poland, Slovenia and the United Kingdom. Contributors explore interactions between structural and institutional contexts of educational trajectories, the individual meaning attached to education and the strategies adopted by young people to cope with its demands. The book also analyses the decision-making processes of individual students, placing them firmly within the social contexts of their families, local schools, national education systems and welfare states, as well as transnational policy contexts. In considering educational disadvantage, the book is based on primary, cross-national research with systematic analysis of the different themes addressed. As every chaptersis co-authored by two or three researchers, each based in a different country, the book goes beyond the usual country-based chapter design to provide an enriched insight into both comparative theory and research methods.

A thrilling, multi-layered World War II adventure following two men and an unforgettable woman, from Pearl Harbor through the most dramatic air and sea battles of the war Marsh, Mick, and Tommy were inseparable friends during their naval academy years, each man desperately in love with the beautiful, unattainable Glory Hawthorne. Graduation set them on separate paths into the military, but they were all forever changed during the Pearl Harbor attack on December 7, 1941. Glory, now Tommy's widow, is a tough Navy nurse still grieving her loss while trying to save lives. Marsh, a surface ship officer, finds himself in the thick of terrifying sea combat from Guadalcanal through Midway to a climactic showdown at Leyte Gulf. And Mick, a hotshot fighter pilot with a drinking problem and a chip on his shoulder, seeks redemption after a series of failures leaves him grounded. Filled with wide-screen action, romance, and heroism tinged with the brutal reality of war, Pacific Glory is a dynamic new direction for an acclaimed thriller writer. One of Library Journal's Best Historical Fiction Books of 2011

Clash of the Financial Pundits: How the Media Influences Your Investment Decisions for Better or Worse

Enjoy another witty, emotional book in New York Times and USA Today bestselling author Erica Ridley’s fan-favorite Dukes of War regency romance series! Captain Xavier Grey’s body is back amongst the beau monde, but his mind cannot break free from the horrors of war. His friends try to help him find peace. He knows he doesn’t deserve it. Just like he doesn't deserve the attentions of the sultry bluestocking intent on seducing him into bed... Spinster Jane Downing wants off the shelf and into the arms of a hot-blooded man. Specifically, the dark and dangerous Captain Grey. She may not be destined to be his wife, but nothing will stop her from being his mistress. She could quote classical Greek by the age of four. How hard can it be to learn the language of love? Grab the first book in the series FREE: The Viscount's Tempting Minx!

Research-based spin-off companies are a special subgroup of new technology-based ventures and play an important role for innovation and economic development. Executive teams of academic spin-offs face several challenges in building up sustainable and profitable ventures, because they often lack managerial and entrepreneurial skills. Based on a quantitative analysis of 193 German spin-offs RigoTietz examines the relationships between executive team characteristics, strategic decision making, and firm performance. The study contributes to the entrepreneurship and strategic management literature and has practical implications for entrepreneurs and managers, policymakers and practitioners of start-up initiatives and technology transfer organisations. Up to date definitions of over 9,000 terms used in banking and finance.

The purpose of geomathematics is firstly to offer an appropriate means of assimilating and assessing the ever-increasing flow of data from geoscientific and satellite sources, and secondly to provide an objective basis for the interpretation, classification and solution of problems. Sphere-oriented mathematics plays an important role in this study and is the focus of this text. The book presents new structures and methods by which sophisticated measurements andobservations can be handled efficiently, thus reducing time and costs.

This collection responds to the need to re-evaluate the very important concept of citizenship in light of recent feminist debates. In contrast to the dominant universalizing concepts of citizenship, the volume argues that citizenship should be theorized on many different levels and in reference to diverse public and private contexts and experiences. The book seeks to demonstrate that the concept of citizenship needs to be understood from a gendered intersectional perspective and argues that, though it is often constructed in a universal way, it is not possible to interpret and indeed understand citizenship without situating it within a specific political, legal, cultural, social, and historical context.

The Ad Hoc Committee to Oversee the Use of the Catechism, United States Conference of Catholic Bishops, has found this catechetical text, copyright 2008, to be in conformity with the Catechism of the Catholic Church.The Catholic Faith Handbook for Youth, Second Edition is an understandable and down-to-earth guide to all things Catholic. This book is an eye-opener and a page-turner, whether you are brushing up on specific Catholic terms and concepts or learning them for the first time. The second edition contains everything that people loved about the first edition, including structure of the book to parallel the Catechism of the Catholic Church. There are 37 content-rich chapters divided into 4 parts on creed, liturgy and sacraments, morality, and Christian prayer, full-color photos that illustrate the books content and range from saints photos, early and contemporary art, photos of modern day symbols of living the Catholic faith, Did You Know? sidebars, Live It! sidebars, Looking Back sidebars, Sainly Profiles sidebars, Glossary, Patron Saints List, summary of Catholic beliefs, timeline of Catholic historical events, index of key words and terms. New in the second edition! over 50 new "For Further Reflection" questions, an illustrated guide to Catholic signs and symbols, an index of questions frequently asked by teens that directs readers to the pages where they can explore answers, updated statistics, items helpful for the preparation of Confirmation, including an overview of the rite of Confirmation, the consecratory prayer used in the rite of Confirmation, the consecratory prayer used in the blessing of chrism, the timeline has been expanded from 4 to 6 pages to make it easier to read.

This book provides a perspective on knowledge management at Siemens - an internationally recognised benchmark - by presenting the reader with the best of the corporation's practical applications and experiences. Tom Davenport and Gilbert Probst bring together instructive case studies from different areas that reflect the rich insights gained from years of experience in practising knowledge management. Most of the cases have been updated for the second edition. New cases have been added. The Knowledge Management Case Book provides a comprehensive account of how organisational knowledge assets can be managed effectively. Specific emphasis is given to the development of generic lessons that can be learned from Siemens' experience. The book also offers a roadmap to building a "mature knowledge enterprise", thereby enhancing our understanding of the steps that need to be taken in order to sustain competitive dominance in the knowledge economy. Presenting applications from very different areas, this practice-orientated book is really outstanding in the broad field of KM literature. "Perhaps the most revealing - and interesting - part of the cases in this book is not the analysis of the various knowledge management tools and processes, but the description of their development, of how they come about, of how commitment was gained, of how implementation was led." Yves Doz, The Timken Chaired Professor of Global Technology and Innovation at INSEAD, Fontainebleau "This case book brings insights how our most valuable resource makes those tools happen. I found this book exciting reading, because it is, to my knowledge, the only book where a single company with a wide variety of knowledge management approaches accumulates years of experiences and lessons learned. Edited by two of the leading thinkers in the field of knowledge management, this book will show the way you practise knowledge management in your company." Heinz Fischer, Global Head of HR, Deutsche Bank AG "This book is a rare and valuable description of a single company's knowledge management journey. Siemens has made impressive advances in becoming a knowledge-driven firm, and this volume details many of its directions and waystations." Laurence Prusak, Executive Director, IBM Institute for Knowledge Management "Though there are many books on Knowledge Management, this is a unique one on a sense that it provides practical application of KM rather than the jargon." Sushil, Modi Foundation Chair Professor and Group Chair, Department of Management Studies, Indian Institute of Technology, New Delhi

One of the most intriguing problems in video processing is the removal of the redundancy or the compression of a video signal. There are a large number of applications which depend on video compression. Data compression represents the enabling technology behind the multimedia and digital television revolution. In motion compensated lossy video compression the original video sequence is first split into three new sources of information, segmentation, motion and residual error. These three information sources are then quantized, leading to a reduced rate for their representation but also to a distorted reconstructed video sequence. After the decomposition of the original source into segmentation, mo tion and residual error information is decided, the key remaining problem is the allocation of the available bits into these three sources of information. In this monograph a theory is developed which provides a solution to this fundamental bit allocation problem. It can be applied to all quad-tree-based motion com pensated video coders which use a first order differential pulse code modulation (DPCM) scheme for the encoding of the displacement vector field (DVF) and a block-based transform scheme for the encoding of the displaced frame differ ence (DFD). An optimal motion estimator which results in the smallest DFD energy for a given bit rate for the encoding of the DVF is also a result of this theory. Such a motion estimator is used to formulate a motion compensated interpolation scheme which incorporates a global smoothness constraint for the DVF.

**Care work, both paid and unpaid, contributes to well-being, social development and economic growth. But the costs of providing care are unequally borne across gender and social class. Feminist scholarship on the gendered construction of welfare provisioning and welfare regimes has produced a conceptually strong and empirically grounded analysis of care, reinforcing the necessity of rethinking the distinctions between "the public" and "the private" as well as the links between them. Yet this analysis, premised on post-industrial contexts, does not travel easily to other parts of the world. Many of its core assumptions - about family structures, labor markets, state capacities, and public social provisioning - do not hold for a wider range of countries. Drawing on original research on the care economy in three developing regions (Africa, Asia, Latin America), this volume addresses a major empirical lacuna while facilitating a conversation across the North-South divide.**

The publication 'A European Area of Lifelong Learning' consists of two parts : 1. The Commission Communication adopted on 21 November 2001 : 'Making a European Area of Lifelong Learning a Reality' (COM(2001) 678 final)(hereafter referred to as 'the Communication') ; 2. 'Lifelong Learning - Indicators and Practice', which is based on the Commission Staff Working Document (28 November 2001) entitled 'Lifelong Learning - Practice and Indicators' (SEC(2001) 1939). This part of the publication contains additional information on the Communication and consists of three parts. Section 1 provides further information on the development of indicators which can be used to follow the implementation of lifelong learning in Europe. Section 2 presents a selection of examples of lifelong learning practices in Europe in the same priority areas as those presented in the Communication. Lastly, section 3 comments on two important instruments in lifelong learning : learning organisations and local learning centres.

"In the research project presented in this PhD-thesis, an innovative type of fibre concrete is developed, with improved both the tensile strength and the ductility: the Hybrid-Fibre Concrete (HFC). The expression "Hybrid" refers to the "hybridisation" of fibres: short and long steel fibres were combined together in one concrete mixture. This is opposite to conventional steel fibre concretes, which contain only one type of fibre. The basic goal of combining short and long fibres is from one side to improve the tensile strength by the action of short fibres, and from the other side to improve the ductility by the action of long fibres." "In this research project, all important aspects needed for the development and application of Hybrid-Fibre Concrete have been considered. In total 15 mixtures, with different types and amounts of steel fibres were developed and tested in the fresh state (workability) as well as in the hardened state (uniaxial tensile tests, flexural tests, pullout tests of single fibres and compressive tests). A new analytical model for bridging of cracks by fibres was developed and successfully implemented for tensile softening response of HFC. At the end, the utilisation of HFC in the engineering practice was discussed, including a case-study on light prestressed long-span beams made of HFC."--BOOK JACKET.

This is the entrancingly entertaining yet amazingly effective guide that shows you how to know the meaning of words that you have never seen or heard before, learn the history of words so that they come alive for you, master an invaluable and permanent technique of word-viewing within 30 days. This is the one book that makes you love to learn.

Jean Kirkpatrick, founder of the pioneering international program Women for Sobriety, Inc., tells the powerful story of her recovery from alcoholism À her relapses, her hospital stays, and finally her spiritual awakening and the decision to found a program for women alcoholics. She takes women through the thirteen empowering Statements of Acceptance that will help them make a commitment to sobriety and overcome the self-image problems that often underlie alcoholism.

**ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase.
