An extraordinary and surreal art book, this edition has been redesigned by the author and includes new illustrations. Ever since the Codex Seraphinianus was first published in 1981, the book has been recognized as one of the strangest and most beautiful art books ever made. This visual encyclopedia of an unknown world written in an unknown language has fueled much debate over its meaning. Written for the information age and addressing the import of coding and decoding in genetics, literary criticism, and computer science, the Codex confused, fascinated, and enchanted a generation. While its message may be unclear, its appeal is obvious: it is a most exquisite artifact. Blurring the distinction between art book and art object, this anniversary edition-redesigned by the author and featuring new illustrations-presents this unique work in a new, unparalleled light. With the advent of new media and forms of communication and continuous streams of information, the Codex is now more relevant and timely than ever. A special limited and numbered deluxe edition that includes a signed print is also available. Come along for another fresh take on the animal

kingdom from bestselling author and illustrator, Sami Bayly. Discover 60 of the most peculiar pairs in nature and learn how plant and animal species rely on each other for their survival. Whether it be a rare tick living in the fur of a pygmy possum, a stick insect feasting and hiding out amongst the Melaleuca or a handfish laying its eggs on a sea squirt, incredible natural relationships deserve to be explored and celebrated. Investigating all types of relationships, from symbiotic to parasitic, this is an eye-opening guide to the natural world. Many species steer clear of those who are different, but the animals and plants in this book have evolved to form relationships with some of the most unlikely partners, and they couldn't live without them. This gorgeous hardcover book is illustrated in exquisite detail by award-winning author and illustrator, Sami Bayly. The perfect companion to *The Illustrated Encyclopaedia of Ugly Animals* and *The Illustrated Encyclopaedia of Dangerous Animals*.

The incomparable Rebecca Solnit, author of more than a dozen acclaimed, prizewinning books of nonfiction, brings the same dazzling writing to the essays in *Encyclopedia of Trouble and Spaciousness*. As the title suggests, the territory of Solnit's concerns is vast, and in her signature alchemical style she combines commentary on history, justice, war and peace, and explorations of place, art, and community, all while writing with the lyricism of a poet to achieve incandescence and wisdom. Gathered here are celebrated iconic essays along with little-known pieces that create a powerful survey of the world we live in, from the jungles of the Zapatistas in Mexico to the splendors of the Arctic. This rich collection tours places as diverse as Haiti and Iceland; movements like Occupy Wall Street and the Arab Spring; an original take on the question of who did Henry David Thoreau's laundry; and a searching

look at what the hatred of country music really means. Solnit moves nimbly from Orwell to Elvis, to contemporary urban gardening to 1970s California macramé and punk rock, and on to searing questions about the environment, freedom, family, class, work, and friendship. It's no wonder she's been compared in Bookforum to Susan Sontag and Annie Dillard and in the San Francisco Chronicle to Joan Didion. The Encyclopedia of Trouble and Spaciousness proves Rebecca Solnit worthy of the accolades and honors she's received. Rarely can a reader find such penetrating critiques of our time and its failures leavened with such generous heapings of hope. Solnit looks back to history and the progress of political movements to find an antidote to despair in what many feel as lost causes. In its encyclopedic reach and its generous compassion, Solnit's collection charts a way through the thickets of our complex social and political worlds. Her essays are a beacon for readers looking for alternative ideas in these imperiled times.

Encyclopedia of the Exquisite is a lifestyle guide for the Francophile and the Anglomaniac, the gourmet and the style maven, the armchair traveler and the art lover. It's an homage to the esoteric world of glamour that doesn't require much spending but makes us feel rich. Taking a cue from the exotic encyclopedias of the sixteenth century, which brimmed with mysterious artifacts, Jessica Kerwin Jenkins's Encyclopedia of the Exquisite focuses on the elegant, the rare, the commonplace, and the delightful. A compendium of style, it merges whimsy and practicality, traipsing through the fine arts and the worlds of fashion, food, travel, home, garden, and beauty. Each entry features several engaging anecdotes, illuminating the curious past of each enduring source of beauty. Subjects covered include the explosive history of champagne; the art of lounging on a divan; the emergence of "frillies," the first lacy, racy lingerie; the ancient uses of sweet-smelling saffron; the wild riot incited by the appearance of London's first top hat; Julia Child's tip for cooking the perfect omelet; the polarizing practice of wearing red lipstick during World War II; Louis XIV's fondness for the luscious Bartlett pear; the Indian origin of badminton;

Parliament's 1650 attempt to suppress Europe's beauty mark fad; the evolution of the Japanese kimono; the pilgrimage of Central Park's Egyptian obelisk; and the fanciful thrill of dining alfresco. Cleverly illustrated, Encyclopedia of the Exquisite is an ode to life's plenty, from the extravagant to the eccentric. It is a celebration of luxury that doesn't necessarily require money. BONUS MATERIAL: This ebook edition includes an excerpt from Jessica Kerwin Jenkins's All the Time in the World.

The Encyclopedia of Vaudeville provides a unique record of what was once America's preeminent form of popular entertainment from the late 1800s through the early 1930s. It includes entries not only on the entertainers themselves, but also on those who worked behind the scenes, the theatres, genres, and historical terms. Entries on individual vaudevillians include biographical information, samplings of routines and, often, commentary by the performers. Many former vaudevillians were interviewed for the book, including Milton Berle, Block and Sully, Kitty Doner, Fifi D'Orsay, Nick Lucas, Ken Murray, Fayard Nicholas, Olga Petrova, Rose Marie, Arthur Tracy, and Rudy Vallee. Where appropriate, entries also include bibliographies. The volume concludes with a guide to vaudeville resources and a general bibliography. Aside from its reference value, with its more than five hundred entries, The Encyclopedia of Vaudeville

discusses the careers of the famous and the forgotten. Many of the vaudevillians here, including Jack Benny, George Burns and Gracie Allen, Jimmy Durante, W. C. Fields, Bert Lahr, and Mae West, are familiar names today, thanks to their continuing careers on screen. At the same time, and given equal coverage, are forgotten acts: legendary female impersonators Bert Savoy and Jay Brennan, the vulgar Eva Tanguay with her billing as "The I Don't Care Girl," male impersonator Kitty Doner, and a host of "freak" acts.

The Encyclopedia is a complete and authoritative reference work for this rapidly evolving field. Over 200 international scientists, each experts in their specialties, have written over 330 separate topics on different aspects of geochemistry including geochemical thermodynamics and kinetics, isotope and organic geochemistry, meteorites and cosmochemistry, the carbon cycle and climate, trace elements, geochemistry of high and low temperature processes, and ore deposition, to name just a few. The geochemical behavior of the

elements is described as is the state of the art in analytical geochemistry. Each topic incorporates cross-referencing to related articles, and also has its own reference list to lead the reader to the essential articles within the published literature. The entries are arranged alphabetically, for easy access, and the subject and citation indices are comprehensive and extensive.

Geochemistry applies chemical techniques and approaches to understanding the Earth and how it works. It touches upon almost every aspect of earth science, ranging from applied topics such as the search for energy and mineral resources, environmental pollution, and climate change to more basic questions such as the Earth's origin and composition, the origin and evolution of life, rock weathering and metamorphism, and the pattern of ocean and mantle circulation. Geochemistry allows us to assign absolute ages to events in Earth's history, to trace the flow of ocean water both now and in the past, trace sediments into subduction zones and arc volcanoes, and trace petroleum to its source rock and ultimately the environment in which it formed. The earliest of evidence of life is chemical and isotopic traces, not fossils, preserved in rocks. Geochemistry has allowed us to unravel the history of the ice ages and thereby deduce

their cause. Geochemistry allows us to determine the swings in Earth's surface temperatures during the ice ages, determine the temperatures and pressures at which rocks have been metamorphosed, and the rates at which ancient magma chambers cooled and crystallized. The field has grown rapidly more sophisticated, in both analytical techniques that can determine elemental concentrations or isotope ratios with exquisite precision and in computational modeling on scales ranging from atomic to planetary. Dangerous animals get a bad rap, but this beautifully illustrated encyclopaedia helps us appreciate the incredible features of some of our more hair-raising animal species. With more than sixty of the most deadly and dangerous animals from across the world to explore, every page of this beautifully illustrated volume is more eye-opening than the last. You will learn interesting facts about these fascinating species, (many of which you won't have even known were deadly) such as how they have adapted to survive and whether we should be threatened by these animals or appreciate them for their incredible features. Children and adults alike will pore over the breathtaking scientific illustrations of unusual animals from the geography

From the author of *Lost Souls*, *Drawing Blood*, and *Wormwood* comes a thrilling and chilling novel that bestselling author Peter Straub says serves as a "guidebook to hell." To serial slayer Andrew Compton, murder is an art, the most intimate art. After feigning his own death to escape from prison, Compton makes his way to the United States with the sole ambition of bringing his "art" to new heights. Tortured by his own perverse desires, and drawn to possess and destroy young boys, Compton inadvertently joins forces with Jay Byrne, a dissolute playboy who has pushed his "art" to limits even Compton hadn't previously imagined. Together, Compton and Byrne set their sights on an exquisite young Vietnamese-American runaway, Tran, whom they deem to be the perfect victim. Swiftly moving from the grimy streets of London's Piccadilly Circus to the decadence of the New Orleans French Quarter, *Poppy Z. Brite* dissects the landscape of torture and invites us into the mind of a killer. *Exquisite Corpse* confirms Brite as a writer who defies categorization. It is a novel for those who dare trespass where the sacred and profane become one.

takes its cue from an iconic component of medieval life, the book of hours, which prescribed certain readings and contemplations for certain parts of the day throughout the year. Divided into more than seventy-five entries, *All the Time in the World* is brimming with witty *bons mots*, interesting etymologies, and arresting anecdotes encompassing an array of cultures and eras. Subjects covered include the daylong ceremony of laying a royal Elizabethan tablecloth; the radicalization of sartorial chic in 1890s Paris; Nostradamus's belief in the aphrodisiac power of jam; the sensuous practice of sniffing incense in fifteenth-century Japan; the American fascination with flaming desserts; the short-lived artistic discipline of "lumia," or visual music; the evolution of coffee from a religious ritual to a forbidden delight in the Middle East; Henriette d'Angeville's fearless and wine-fueled ascent of Mont Blanc; the elaborate treasure hunts concocted by London's Bright Young Things; and the musical revolution known as bebop. An antidote to the contemporary cult of "getting things done," *All the Time in the World* revives forgotten treasures of the past while inspiring a passion for good living in the present.
