Postcolonial novelists such as Salman Rushdie and V.S. Naipaul are widely celebrated, yet the achievements of these poets have been strangely neglected. This work argues that these poets have dramatically expanded the atlas of English literature.

This IBM Redpaper™ publication focuses on the integration between IBM® SPSS® Modeler and R. The paper is aimed at people who know IBM SPSS Modeler and have only a very limited knowledge of R. Chapters 2, 3, and 4 provide you with a high level understanding of R

integration within SPSS Modeler enabling you to create or recreate some very basic R models within SPSS Modeler, even if you have only a basic knowledge of R. Chapter 5 provides more detailed tips and tricks. This chapter is for the experienced user and consists of items that might help you get up to speed with more detailed functions of the integration and understand some pitfalls. There is clearly an urgent need worldwide to increase the share of renewable energy in the overall energy supply as rapidly as possible. With a well-developed and proven feasible technology, offshore wind power has come to

the fore as the most promising means of achieving this goal. However, fragmented authorities and procedures may pose tremendous challenges to the development of an integrated legal framework for offshore wind and the complex installation and grid interconnections it requires. This book surveys and analyses the features essential for the development of such a framework, drawing on the experience of ten countries that have such schemes in place – France, Germany, the United Kingdom, Italy, Norway, the United States, Australia, China, Korea, and Taiwan. Discussing the impact of

technological, economic, spatial, and market issues on the legal framework, eleven key policymakers in their respective countries contribute chapters that together reveal the contours of a strong and sound legal framework that serves to enable and facilitate the efficient application of policy initiatives and subsidies. Topics and issues raised and examined include the ways a sound legal framework addresses the following aspects of offshore wind power development: - license schemes; - construction of turbines; - infrastructure of grid, construction harbor, and vessels; - environmental health

and safety regulations; and - loan and finance risk. The contributors show that a carefully planned mix of incentives and supplementary schemes is indispensable. The essays are drawn on the presentations and papers offered at the International Conference on a Comprehensive Legal Framework for the Development of Offshore Wind Power Around the World held in Taiwan in August 2016. As a major new contribution to the debate on the importance of a legal framework for offshore wind power and grid interconnections, this book will prove indispensable to lawyers, policymakers,

officials, and academics concerned with the management of sea space to include the wind power necessary to achieve and sustain renewable energy goals.

Pioneering manifesto by founder of "International School." Technical and aesthetic theories, views of industry, economics, relation of form to function, "mass-production split," and much more. Profusely illustrated.

Multiple sites are given for each resource cited whenever possible.

If you design electronics for a living, you need Robust Electronic Design Reference Book. Written by a working engineer, who has put over 115 electronic products into production at Sycor, IBM, and Lexmark, Robust Electronic Design Reference covers all the various aspects of designing and developing electronic devices and systems that:

- Work.*
- Are safe and reliable.*
- Can be manufactured, tested, repaired, and serviced.*
- May be sold and used worldwide.*
- Can be adapted or enhanced to meet new and changing*

requirements.

Compact Key for Schools is a focused, 50 - 60 hour course for the Cambridge English: Key (KET) for Schools exam. This Student's Book features twelve topic-based units with focused exam preparation to maximise the performance of school-age learners. Units contain pages on Reading, Writing, Listening, Speaking, Grammar and Vocabulary. A Grammar reference covers key areas in the syllabus and unit-based wordlists include target vocabulary with definitions. A Speaking Guide provides extra support for this paper. The accompanying CD-ROM provides interactive

grammar, vocabulary and exam skills tasks including listening. The Student's Book includes a full practice test. A further practice test with audio is available online. Class Audio CD containing the listening material for this course is available separately.

In 1945 Japan had to adjust very rapidly to sudden defeat, to the arrival of the American Occupation and to the encounter with the English language, together with a different outlook on many aspects of society and government. This scholarly book is based on in-depth interviews with people, now aged,

who were school students at the time of the Occupation and who experienced first-hand this immense cultural change. The book considers the nature of the changing outlook, including democratization, the new role for the Japanese Emperor and all this represented for the place of tradition in Japanese life and the growing emphasis on individualism away from collectivism. It discusses the changing system of education itself, including new structures and new textbooks, and relates the feelings of the participants as they came to terms with defeat and the language and culture of the former enemy.

Overall, the book provides a fascinating insight into a key period of Japanese history.

The passing of the Corporate Manslaughter

and Corporate Homicide Bill in the UK and increasing public and investor pressure for good Corporate Governance and Corporate Social Responsibility, means organizations now, more than ever, need to ensure they do all they can to prevent major accidents. However, past experience shows that just implementing safety management systems is not enough and this book makes the case for a more holistic and ethical approach to improving corporate systems as a whole. Preventing Corporate Accidents shows how major accidents can result from human

error and defects in corporate systems. The book describes accident prevention strategies, from safety culture, safety management systems, foresight and planning to safety regulations, corporate ethics, corporate social responsibility and the learning organization. Barry Whittingham illustrates with international case studies from various industries how and why these defences have failed in the past, and more importantly, how to strengthen corporate systems to prevent future major accidents. The case studies

include: The loss of the space shuttle Columbia Infant heart surgery at Bristol Royal Infirmary The Davis-Besse nuclear power plant incident The fire and explosion at the Conoco-Phillips Humber oil refinery Herald of Free Enterprise and Southall rail accident manslaughter prosecutions This book is essential reading for all those with a professional interest in health and safety management, the control of major risk and accident prevention, in particular for directors, senior managers and health & safety professionals in high-hazard

industries and public operations, such as nuclear, chemicals, construction, oil and gas, energy, manufacturing and transportation. Barry Whittingham has worked as a senior manager, design engineer and consultant for the chemical, nuclear, offshore, oil and gas, railway and aviation sectors. He developed a career as a safety consultant specializing in the human factors aspects of accident causation. Barry is a Fellow of the Safety and Reliability Society.

Los Angeles magazine is a regional

magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern

Californian.

This book advocates a new approach to pronunciation teaching, in which the goal is mutual intelligibility among non-native speakers, rather than imitating native speakers. It will be of interest to all teachers of English as an International Language, especially Business English. It proposes a basic core of phonological teaching, with controversial suggestions for what should be included.

This book discusses the effects of Neo-Liberal policies on the transformations of

architectural and urban practices and education in the transition from the era of “professionalism” to “post-professionalism.” Building on previous literature in the field of contemporary theory of architecture, it provides the necessary resources for the study of contemporary architecture and urban politics, urban sociology, local administration and urban geography. Further, it develops a political and critical perspective on contemporary practices of architecture and urbanism, their implementation, legal background, political

effects and social results. The book will interest readers from a wide range of academic disciplines, from political science to architecture, and from urban studies to sociology.

The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language:

knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. Advisory board: Guy Cook, Diane Larsen-Freeman, Amy Tsui, and Steve Walsh

reasons—the Basic Mandarin Chinese approach of having two separate but integrated "tracks" helps you to learn the language more efficiently and more successfully. Key features of this Chinese textbook and discs include: Clear and detailed pronunciation, grammar and cultural explanations Exercises and activities based on real-life experiences in China Hours of video recordings filmed on location featuring dozens of native speakers in various parts of China and beyond Six hours of native-speaker audio recordings for all the book's dialogues and exercises Special software allowing you to interact with the recordings. This Mandarin textbook is designed to be used with its separately available

workbook, Basic Mandarin Chinese—Speaking & Listening Practice Book which provides a range of drills and exercises designed to dramatically enhance your spoken proficiency and improve your Chinese language skills.

This book provides educators with an accessible guide to best practices concerning content-based instruction (CBI) models and their use in English learner inclusive classrooms. The author effectively bridges the gap between theory and practice with a critical analysis of practical examples and diverse strategies for the inclusion of English learners into K-12 general education courses. The book also raises controversial questions regarding who is qualified to

teach English learners and who is responsible for doing so, looking at the difficulties faced by both general educators and ESL teachers in Inclusive Classrooms. By providing a lens through which both ESL teachers and general educators are able to analyze, compare and contrast a range of widely-employed CBI methods, this book allows teachers to make informed decisions in their EL program development and work with English learners in K-12 schools.

Due to the competitive edge it confers on students, educational institutions, and non-English speaking nations in a globalized economy, English as a medium of instruction (EMI) has been gaining

popularity in tertiary education in non-native English-speaking (NNES) countries. Institute-wide EMI implementation has often been imposed by top-down decisions, in combination with the optimistic view that the horse should always be placed before the cart. However, emerging evidence suggests that the delivery of such programs to NNES students has led to new pedagogical challenges and learning problems that go beyond the scope of language learning and teaching and deserve immediate attention. For example, how would an instructor respond to situations in which students' learning of content is compromised by their limited language proficiency? This book draws on the current practice

of EMI in diverse disciplines and university settings and examines how these new pedagogical and learning issues can be addressed. The discussion also involves a reflection on the essence of EMI in relation to the use of the first language (L1) as the medium of instruction in tertiary education. In addition, the book includes discussion about how to ensure and maintain the quality of EMI programs and assess the readiness of stakeholders for such programs, which include administrators, teachers, and students. The discussion is led by exemplars in Hong Kong and Taiwan, where the majority of students are native Chinese speakers, in the hope of developing critical perspectives and practical guidelines as references

for EMI in other NNES settings. “The Open Access version of this book, available at <http://www.taylorfrancis.com/books/e/ISBN>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

As a defining characteristic of what it means to be human, the of language plays a central role in almost all human activity. Language functions as a cornerstone in the construction of our identity and in the relationships we build. It takes a central role facilitating every enterprise we undertake, creates the thread w forms our own biographies, and enables us to play a part in the transmission and maintenance of our culture. This pervasive nat of language means that it may form the starting point for an

investigation into virtually any aspect of social life. In recent years this has led to a stretching of the boundaries of language studies prompted by an intense cross-fertilisation of ideas with a wide range of disciplines. It is this cross-fertilisation which forms the focus of the present collection. Taken together, the thirteen papers contained provide an absorbing, rich array of subjects touched by the centrality of language. Encompassing themes from social psychology, translation theory, computer science, forensics, educational policy, language change, archaeology, and literature, the collection demonstrates that the study of language offers limitless possibilities to aid an understanding of the world in which we live. International in scope, the collection includes contributions from scholars well-established in their fields, at work in Europe, USA, the Middle East and Asia. As such, the collection offers a

As climate change continues to dominate the international environmental agenda, phenology – the study of the timing of recurring biological events – has received increasing research attention, leading to an emerging consensus that phenology can be viewed as an ‘early warning system’ for climate change impact. A multidisciplinary science involving many branches of ecology, geography and remote sensing,

phenology to date has lacked a coherent methodological text. This new synthesis, including contributions from many of the world's leading phenologists, therefore fills a critical gap in the current biological literature. Providing critiques of current methods, as well as detailing novel and emerging methodologies, the book, with its extensive suite of references, provides readers with an understanding of both the theoretical basis and the potential applications required to adopt and adapt new analytical

and design methods. An invaluable source book for researchers and students in ecology and climate change science, the book also provides a useful reference for practitioners in a range of sectors, including human health, fisheries, forestry, agriculture and natural resource management.

a priori, and what is more, to a rejection based ultimately on a posteriori findings; in other words, the "pure" science of nature in Kant's sense of the term had proved to be, not only not pure, but even

false. As for logic and mathematics, the decisive works of Frege, Russell, and White head suggested two conclusions: first, that it was possible to construct mathematics on the basis of logic (logicism), and secondly, that logical propositions had an irrevocably analytic status. But within the frame work of logicism, the status of logical propositions is passed on to mathematical ones, and mathematical propositions are therefore also conceived of as analytic. All this creates a situation where the

existential presupposition contained in the Kantian question about the possibility of judgements that are both synthetic and a priori must, it seems, be rejected as false. But to drop this presupposition is, at the same time, to strike at the very core of Kant's programme of putting the natural sciences on a philosophical foundation. The failure of the modern attempt to do so suggests at the same time a reversal of the relationship between philosophy and the individual sciences: it is not the task of philosophy to meddle

with the foundations of the individual sciences; being the less successful discipline, its task is rather to seek guidance from the principles of rationality operative in the individual sciences.

Perhaps the best Quran English translation. It is clear, easy to read, and very faithful to the Arabic original. It closely follows the Arabic text, and often reminds the reader of the Arabic original. It uses today's English language, and today's English vocabulary, thus it is easy to read and understand. The flow is smooth, the sentence structure is simple, the meaning is clear. This Quran translation has no interpretations, no footnotes, and no explanations. It is a pure translation of the Quran, from Arabic to English, and it does not try to emphasize any school of thought. The text purely and accurately translates the Holy Quran, from Arabic, into

contemporary English. It was translated by a Muslim, who saw firsthand the miracles inside the Quran. His native language is Arabic; his everyday language is American English. For 15 years, he studied the Quran. For many years, he translated speech between his mother and his wife. For a living, he develops quality software. This Quran translation is available in two editions. This edition (A) uses the word "Allah" to refer to the Creator. Edition (B) uses the word "God". Quran Sura 91. The Sun. ash-Shams. In the name of Allah, the Gracious, the Merciful. 1. By the sun and its radiance. 2. And the moon as it follows it. 3. And the day as it reveals

it. 4. And the night as it conceals it. 5. And the sky and He who built it. 6. And the earth and He who spread it. 7. And the soul and He who proportioned it. 8. And inspired it with its wickedness and its righteousness. 9. Successful is he who purifies it. 10. Failing is he who corrupts it. 11. Thamood denied in its pride. 12. When it followed its most wicked. 13. The messenger of Allah said to them, "This is the she-camel of Allah, so let her drink." 14. But they called him a liar, and hamstrung her. So their Lord crushed them for their sin, and leveled it. 15. And He does not fear its sequel. The Quran is the last Book from the Creator. It contains

guidance, mercy, and healing. The Quran is a blessing, within reach.

Philosophy, Psychology Read Online in Browser Here

This book has grown out of an attempt to harmonize two different tendencies, one in psychology, the other in

physics, with both of which I find myself in sympathy, although at first sight they might seem inconsistent. On the one hand, many psychologists, especially those of the behaviourist school, tend to adopt what is essentially a materialistic position, as a matter of method if not of metaphysics. They make psychology increasingly dependent on physiology and external observation, and tend to think of matter as something much more solid and indubitable than mind. Meanwhile the physicists, especially Einstein and other exponents of the theory of relativity, have been making "matter" less and less material. Their world consists of "events," from which

"matter" is derived by a logical construction. Whoever reads, for example, Professor Eddington's "Space, Time and Gravitation" (Cambridge University Press, 1920), will see that an old-fashioned materialism can receive no support from modern physics. I think that what has permanent value in the outlook of the behaviourists is the feeling that physics is the most fundamental science at present in existence. But this position cannot be called materialistic, if, as seems to be the case, physics does not assume the existence of matter.
