Running a Thousand Miles for Freedom details the escape of Ellen and William Craft from slavery in Georgia in the United States. Well publicized at the time, the married couple became celebrities in the abolitionist struggle. Their daring and risky plan meant passing the light-skinned Ellen off as a white male traveling with 'his' slave, William, as no woman would have traveled alone with a slave at the time. Running a Thousand Miles for Freedom gives a unique historical opportunity to witness a first hand account of notions of race, gender and class as they stood in a nineteenth century society which treated them as fixed and defining.

In Will They Escape?, Daniel Huiet reveals the teamwork lessons he has decoded from behind the scenes of his escape room business. Covering observations ranging from the classic differences such as age and gender, all the way down to the small words people use that create a big impact. But it is not only how the teams functioned as a whole, but how the individual affected the group with their attitude: the superstars who went unnoticed, know-

it-alls, an interesting first date, and even a ghost! Huiet analyzed thousands of people and the methods they used to work through his escape rooms and noticed the behaviors of teams that succeeded and the patterns of teams that collapsed. How people used words or what actions they took could either uplift a group to success or tear the group down. Under pressure, even the most trained among us can burst like a frozen pipe and the people you least expect can rise to the occasion and win in record-breaking fashion. Light-hearted tales interspersed with lessons, this unique perspective on human interaction and cooperation is an insight into how each individual action leads to escape...or failure. The Escape from the Room series, captures the thrills of a live escape room experience in book form. Murder in the Village finds Bernie Angel, an amateur private investigator, conspiracy theorist blogger and professional game show contestant, locked inside a police station trying to uncover the mystery behind a seemingly unsolvable murder. You, as the reader and player, must search the room, finding items to help overcome problems, decrypt codes and solve puzzles all while the story of Bernie Angels' adventure unfolds. With the room depicted over several illustrated pages, you may revisit any part of the room to look for clues that may help you solve puzzles as you navigate your way through the book. The book shares similarities with a 'choose your own adventure' in that you do not read front to back, the solution to each puzzle gives the page number to visit next. With included hints, reaching the conclusion to the book is achievable for all, giving everybody the chance to solve the murder and escape from the room. This book mimics the key elements of a live escape room in a portable format available for

**A debut thriller that offers a fresh, modern twist on the classic "locked room" mystery novel, for readers of Noah Hawley and Jeffery Deaver At eleven years old, Morgan Sheppard solved the murder of a teacher when everyone else believed it to be a suicide. The publicity surrounding the case laid the foundation for his reputation as a modern-day Sherlock Holmes. He parlayed that fame into a gig as TV's "resident detective," solving the more typical tawdry daytime talk show mysteries like "Who is the father?" and "Is he cheating?" Until, that is, Sheppard wakes up handcuffed to a bed in an unfamiliar hotel room. Around him, five strangers are slowly waking up, as well. Soon they discover a corpse in the bath. And Sheppard is challenged to put his deductive skills to the test. One of the people in the room is the killer. He has three hours to solve the murder. If he doesn't find the killer, they all die. owners, Clara and the Judge, are welcoming and helpful, if oddly preoccupied by the perpetually baffling jigsaw puzzle in the living room. With little more than a hand-drawn map and vague memories of her troubled past, the narrator ventures out in search of a job, an apartment, and a fresh start in life. Accompanied by an unusually assertive digital assistant named Cylvia, the narrator is drawn deeper into an increasingly strange, surreal, and threatening world, which reveals itself to her through a series of darkly comic encounters reminiscent of Gulliver's Travels. A lovelorn truck driver . . . a mysterious child . . . a watchful crow. A cryptic birthday party. A baffling physics experiment in a defunct office tower where some calamity once happened. Through it all, the narrator is tempted and manipulated by the bakemono, a shape-shifting demon who poses a distinctly terrifying danger. Harrowing, meticulous, and deranged, *Subdivision* is a brilliant maze of a novel from the writer Kelly Link has called "a master of the dark arts." With the narrative intensity and mordant humor familiar to readers of *Broken River*, J. Robert Lennon continues his exploration of the mysteries of perception and memory. There's no getting away from this unputdownable thriller about teens being held captive in an escape room where the stakes are all too real. Perfect for spooky season! All they need to do is get out. A devious corporation attacks a farm commune in former Vermont where one scientist just might be able to save the planet. Arcadia's defense corps is mobilized to fend off what first appears to be a routine assault, one of the many that the community must repulse from paramilitary forces every year. But as sensors report a breach in the perimeter wall, even eighty-year-old Rachel Leopold shoulders a weapon and reports for duty. The attack, it turns out, has been orchestrated by one of the world's largest corporations, CRISPR International, and it is interested in stopping Rachel's research into stopping global warming. As Arcadia prepares to defend itself against the next CRISPR attack, Rachel contacts Emmanuel Puig, the foremost scholar of her ex-husband's work, to get information that she can use to stop CRISPR. Arcadia intersperses the action with short reports from Emmanuel on his interactions with Rachel as they meet, via virtual reality, in different parts of the world—Brussels, Ningxia, and finally Darwin. The novel concludes with an explosive, unexpected twist that forces a re-evaluation of all that has come before. Praise for Frostlands "A worthy sequel to the thought-

Devotees of near-future science fiction adventures will root for resolute and energetic Rachel on her quest to save Earth.”
