TRB's National Cooperative Highway Research Program (NCHRP) Report 715: Highway Safety Manual Training Materials provides training materials to aid in implementing the American Association of State Highway and Transportation Officials' Highway Safety Manual (HSM). Learning professionals have a love-hate relationship with measurement and evaluation. On one hand, most people agree that evaluation and the evolving results can represent important information. On the other hand, the act of evaluation seems daunting and beyond their interest in learning and development. But there is no arguing that the call for accountability of resource expenditures is louder than ever. To support learning professionals as they answer this call, ASTD is launching a new handbook, Handbook of Measuring and Evaluating Training. This new book addresses the mechanics of evaluation from the perspective of a variety of contributors. It addresses content relevant to the four phases of measurement and evaluation: planning, data collection, data analysis, and reporting. In addition, chapters are included that support implementation of your measurement practice. Each chapter is written to achieve at least three learning objectives. A knowledge check is included at the end of each chapter to ensure readers gain at least one new

insight.

The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll

learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to: • Search for text in a file or across multiple files • Create, update, move, and rename files and folders • Search the Web and download online content • Update and format data in Excel spreadsheets of any size • Split, merge, watermark, and encrypt PDFs • Send email responses and text notifications • Fill out online forms Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. The third edition of Organizational Behaviour: Text and Cases offers a concise yet comprehensive coverage of the theories that determine behaviour in organizations. The relationship between effective organizational behaviour and the effective functioning of an organization is established through a clear and lucid style of presentation. With the help of necessary concepts, tools and techniques necessary for understanding behaviour in organizations, this book attempts to unfold human behaviour at four levels; starting from the individual processes and moving on to the interpersonal, organizational, and change processes. It encourages active learning through exercises, field projects and case studies, and develops competencies that are essential for becoming successful managers and effective employees in organizations. The three new chapters—Career, Planning and Management; Performance and Reward Management; and Gender Issues in Management—help readers understand organizational behaviour in the current Indian business scenario better. KEY FEATURES • Classroom-tested case studies pertaining to

actual incidents from the workplace • Several examples from BPCL, HCL Technologies, Wipro, Infosys and SAP highlighting the best practices in the industry • Caselets focusing on behavioural issues in organizations • Field projects involving students in data collection and analysis • Marginalia summarizing crucial points and serving as quick references • A companion website featuring multiple-choice questions, learning objectives, an instructor's manual, and PowerPoint lecture slides enabling effective presentation of concepts

While Excel remains ubiquitous in the business world, recent Microsoft feedback forums are full of requests to include Python as an Excel scripting language. In fact, it's the top feature requested. What makes this combination so compelling? In this hands-on guide, Felix Zumstein--creator of xlwings, a popular open source package for automating Excel with Python--shows experienced Excel users how to integrate these two worlds efficiently. Excel has added quite a few new capabilities over the past couple of years, but its automation language, VBA, stopped evolving a long time ago. Many Excel power users have already adopted Python for daily automation tasks. This guide gets you started. Use Python without

extensive programming knowledge Get started with modern tools, including Jupyter notebooks and Visual Studio code Use pandas to acquire, clean, and analyze data and replace typical Excel calculations Automate tedious tasks like consolidation of Excel workbooks and production of Excel reports Use xlwings to build interactive Excel tools that use Python as a calculation engine Connect Excel to databases and CSV files and fetch data from the internet using Python code Use Python as a single tool to replace VBA, Power Query, and Power Pivot Designed to provide non-developers with a hands-on guide to both Excel VBA and XML, this book gives users a wide range of VBA coverage including how to write subroutines and functions from scratch, manipulate files and folders with VBA statements, manage date with arrays and collections, and much more. Includes CD.

Do your children know how to grow potatoes, where to see a dragon-fly or how to fire a rocket? Are you one of the 82% of teachers who thinks their school isn't making as much use of their grounds as they should? Do you know how to make the most of your outdoor teaching and learning spaces? Learn and Play Out is an inspirational, accessible and pragmatic set of resources for making changes to Primary school playgrounds in order to provide high quality learning and play experiences. Drawing on Learning through Landscapes' experience in working with thousands of primary schools, it provides practical support to improve the use, design and management of your outdoor area. More schools are seeing the benefits of their pupils spending longer periods of their school day outside, with research showing that this improves

attainment, behaviour, motivation and self-esteem. For many schools however, the environment of their grounds does not meet the needs of their pupils. This toolkit helps them assess what they already have, work through what their needs are, and inspires them to take the next steps forward to make physical and practical improvements to their grounds. Featuring a CD ROM with a comprehensive and fully adaptable audit tool, plus activities and case study resources to support your work, the handy toolkit provides: An overview of what your school grounds can do for you; A step-by-step process to work through; Advice on how to involve the whole school community in planning changes; Guidance on managing your school grounds project; Practical activity ideas to involve children and adults. This illustrated resource which contains over 140 full colour photos will make it as easy as possible for teachers, parents and school governors to plan and manage a playground improvement project, involving children at the core of the work and linking the process and improved school grounds to curriculum learning objectives.

This book contains 20 cases and four tutorials, centered around Microsoft Excel and Access. The tutorials help users learn, or brush up on, the pertinent application-based skills they'll need for the cases; and the cases provide scenario-based practice in making business decisions and using tools. These cases require users not only to go through the motions of creating spreadsheets and databases, but also to think through the processes they're learning in order to solve business problems.
