Featuring a fresh layout, revised maps, and more detail than ever before, the seventh edition of Parker's Wine Buyer's Guide offers collectors and amateurs alike the ultimate resource to the world's best wines. Understanding that buyers on every level appreciate a good deal, Parker separates overvalued bottles from undervalued, with wine prices instantly shifting according to his evaluations. Indifferent to the wine's pedigree, Parker's eminent 100-point rating system allows for independent, consumer-oriented, inside information. The latest edition of Parker's Wine Buyer's Guide includes expanded information on Spain, Portugal, Germany, Australia, Argentina, and Chile, as well as new sections on Israel and Central Europe. As in his previous editions, Parker provides the reassurance of a simple number rating, predictions for future buying potential, and practical overviews of regions and grapes. Altogether, an indispensable resource from the man the Los Angeles Times calls "the most powerful critic of any kind."

International wine experts bring the wine cellar of the world to your home Follow the story of wine, from ancient to modern times and learn the process of making it today. You'll explore the flavours and characteristics of grape varieties and styles and discover all about wine making. From Alsace and Western Australia to the Valle d'Aosta and Stellenbosch, hop on a round-the-world tour of major wine-growing regions and explore the top thirty-five. You'll visit famous vineyards and wine producers, learn about the great wines of each region and take six tours from Burgundy to the Napa Valley. Packed with information on local foods, festivals and interesting places to visit as well as practical tips on buying, storing and serving wine, reading labels and making sense of jargon.

The sedimentary record on Earth stretches back more than 4.3 billion years and is present in more abbreviated forms on companion planets of the Solar System, like Mars and Venus, and doubtless elsewhere. Reading such planetary archives correctly requires intimate knowledge of modern sedimentary processes acting within the framework provided by tectonics, climate and sea or lake level variations. The subject of sedimentology thus encompasses the origins, transport and deposition of mineral sediment on planetary surfaces. The author addresses the principles of the subject from the viewpoint of modern processes, emphasising a general science narrative approach in the main text, with quantitative background derived in enabling 'cookie' appendices. The book ends with an innovative chapter dealing with how sedimentology is currently informing a variety of cognate disciplines, from the timing and extent tectonic uplift to variations in palaeoclimate. Each chapter concludes with a detailed guide to key further reading leading to a large bibliography of over 2500 entries. The book is designed to reach an audience of senior undergraduate and graduate students and interested academic and industry professionals.

This volume explores the current issues and recent international developments in reservoir planning and operation, design and construction, monitoring and maintenance. In the light of the recent climatic changes which have seen a reduction in rainfall and resulted in water shortages, a number of pertinent subjects are examined in detail, for example the provision of new resources, evaluation of optimal operating policies, review of water supply options, sedimentation effects, the environmental aspects and the economic viability of reservoirs.

This volume is the first appearance of Vini d'Italia in an English language edition, but in its Italian version the guide has a long history. Since its first edition in 1988, the guide has played a major role in Italy's fine wine market; both professionals and wine enthusiasts have learned to trust its evaluations. Italian Wines 1998 surveys the panorama of quality wine production in Italy. This 600 page volume reviews and evaluates about 8,500 wines and 1,400 wineries. During 1997, after months of blind tastings, 117 prize-winning wines were selected and indicated with a symbol that has become synonymous with quality: three glasses, tre bicchieri. This year, the Tuscany and Piedmont regions garnered the largest number of three glasses rewards, with 29 and 26 labels respectively.

This work brings together a variety of specialists from neurology, immunology, virology and the veterinary sciences, in an attempt to answer the questions raised. The relationship between infection and immunology in the nervous system is discussed fully. The work will appeal to clinicians and laboratory workers who wish to know more of this rapidly developing area, and will be of use to both established investigators and newcomers to the field.
