Chinese face-reading, or Mian Xiang, is a form of physiognomy, or the observation of appearances. This ancient technique reveals not only a person's true character, but also his or her fortune, luck, and talents. Joey Yap's Art of Face-Reading is a brilliant introduction to this powerfully accurate art. In this illuminating guide, bestselling author and master trainer Joey Yap explains how the face is essentially a map of our destiny and luck. With detailed illustrations, he presents the "100-year map" of the face, or the 100 points that govern a person's fortune and luck from the age of 1 to 100. He also unlocks the areas of the face known as Officers and Palaces, which tell us about a person's character, future challenges, obstacles, and talents in life--along with other facial features such as moles, which Joey explains how to identify and interpret. With this guide, you will learn to use face-reading to examine your own life stages and destiny, and those of others, at a glance. \*Includes the "100-year map," which relates every year of your life to a point on your face. \*Discover face-reading for relationships: what to look out for in an ideal partner. \*Joey Yap is an internationally renowned feng shui expert and has addressed multinational companies including Microsoft, HSBC, Volvo, and Samsung. James Bamford has been the preeminent expert on the National Security Agency since his reporting revealed the agency's existence in the 1980s. Now Bamford describes the transformation of the NSA since 9/11, as the agency increasingly turns its high-tech ears on the American public. The Shadow Factory reconstructs how the NSA missed a chance to thwart the 9/11 hijackers and details how this mistake has led to a heightening of domestic surveillance. In disturbing detail, Bamford describes exactly how every American's data is being mined and what is being done with it. Any reader who thinks America's liberties are being protected by Congress will be shocked and appalled at what is revealed here.

The early twenty-first century has seen an explosion of animation. Cartoon characters are everywhere—in cinema, television, and video games and as brand logos. There are new technological objects that seem to have lives of their own—from Facebook algorithms that suggest products for us to buy to robots that respond to human facial expressions. The ubiquity of animation is not a trivial side-effect of the development of digital technologies and the globalization of media markets. Rather, it points to a paradigm shift. In the last century, performance became a key term in academic and popular discourse: The idea that we construct identities through our gestures and speech proved extremely useful for thinking about many aspects of social life. The present volume proposes an anthropological concept of animation as a contrast and complement to performance: The idea that we construct social others by projecting parts of ourselves out into the world might prove useful for thinking about such topics as climate crisis, corporate branding, and social media. Like performance, animation can serve as a platform for comparisons of different cultures and historical eras. Teri Silvio presents an anthropology of animation through a detailed ethnographic account of how characters, objects, and abstract concepts are invested with lives, personalities, and powers—and how people interact with them—in contemporary Taiwan. The practices analyzed include the worship of wooden statues of Buddhist and Daoist deities and the recent craze for cute vinyl versions of these deities, as well as a wildly popular video fantasy series performed by puppets. She reveals that animation is, like performance, a concept that works differently in different contexts, and that animation practices are deeply informed by local traditions of thinking about the relationships between body and soul, spiritual power and the material world. The case of Taiwan, where Chinese traditions merge with Japanese and American popular culture, uncovers alternatives to seeing animation as either an expression of animism or as “playing God.” Looking at the contemporary world through the lens of animation will help us rethink relationships between global and local, identity and otherness, human and non-human.

*Glenda Gilmore recovers the rich nuances of southern political history by placing black women at its center. She explores the pivotal and interconnected roles played by gender and race in North Carolina politics from the period immediately preceding the disfranchisement of black men in 1900 to the time black and white women gained the vote in 1920. Gender and Jim Crow argues that the ideology of white supremacy embodied in the Jim Crow laws of the turn of the century profoundly reordered society and that within this environment, black women crafted an enduring tradition of political activism. According to Gilmore, a generation of educated African American women emerged in the 1890s to become, in effect, diplomats to the white community after the disfranchisement of their husbands, brothers, and fathers. Using the lives of African American women to tell the larger story, Gilmore chronicles black women's political strategies, their feminism, and their efforts to forge political ties with white women. Her analysis highlights the active role played by women of both races in the political process and in the emergence of southern progressivism. In addition, Gilmore illuminates the manipulation of concepts of gender by white supremacists and shows how this rhetoric changed once women, black and white, gained the vote.*

"Reality does not comply with our narrations of it. And that is most certainly the case with the narrations produced in academia. An anthropologist in Bahia, Brazil, fears to become possessed by the spirits he had come to study; falls madly in love with an 'informant'; finds himself baffled by the sayings of a clairvoyant; and has to come to grips with the murder of one of his best friends. Unsettling events that do not belong to the orderly world of scientific research, yet leave their imprint on the way the anthropologist comes to understand the world. Reflecting on his long research experience with the spirit possession cult Candomblê, the author shows, in a probing manner, how definitions of reality always require the exclusion of certain perceptions, experiences and insights. And yet, this 'rest-of-what-is' turns out to be an inexhaustible source of amazement, seduction and renewal." --P [4] of cover.

This "abounding, ebullient, effervescent emotion" manifests itself everywhere from child's play to scientific breakthrough and is crucially important to learning, risk-taking, social cohesiveness, and survival itself. Exuberance: The Passion for Life introduces us to such notably irrepressible types as Teddy Roosevelt, John Muir, and Richard Feynman, as well as Peter Pan, dancing porcupines, and Charles Schulz's Snoopy.
