Taking as a starting point the ground-breaking work of the Trans4m Centre for Integral Development this book applies such an 'integral' notion to the realms of business, economics and enterprise. environmental challenges of this century. Author Fairs demonstrates key developments in sustainable design as seen in lighting, houseware, furniture, textiles, products, interiors, architecture, and transportation, including the innovative use of fuel-cell technologies and ultra-lightweight materials. The book shows how the introduction of eco-friendly materials is changing the products around us and charts the rise of low-energy lighting sources and their impact on lighting design. Emerging trends in green design are also covered, from recycling (reusing existing objects to create new products) to ethical sourcing (ensuring products come from sustainable sources). By presenting existing green innovations as well as visionary projects, Green Design paints a bright future in which technology and ethics merge for the benefit of people and the planet.

I would like to say to the diligent reader of my writings and to others who are interested in them that I am not at all concerned with appearing to be consistent. In my search after Truth I have discarded many ideas and learnt many new things. Old as I am in age, I have no feeling that I have ceased to grow inwardly or that my growth will stop at the dissolution of the flesh. What I am concerned with is my readiness to obey the call of Truth, my God, from moment to moment, and, therefore, when anybody finds any inconsistency between any two writings of mine, if he has still faith in my sanity, he would do well to choose the later of the two on the same subject.

Is infrastructure but the plumbing and wiring of the human environment, or is it the true lifeblood of the spaces we inhabit? Infrastructural systems facilitate the flow of anything from people and goods to resources and information. While engineered to perform specific tasks,

such networks also determine the structure of buildings, cities, and metropolitan regions, if not of entire nations and the planet itself. Taking this critical leverage in consideration, this book calls for expanding and renegotiating the roles of infrastructure not only as a technical, but also as a political, economic, social, and even aesthetic matter of concern for all, claimed not only as the means for achieving more resilient forms of development, but moreover as a right to a sustainable way of life.
