There is a cosmic energy that is all creative in the universe. We are using this energy everyday whether we know it or not. Linda reveals the ways God and science use energy. What was once seen as metaphysical is now being proven in laboratories on a subatomic level. Most of us are operating on auto pilot and reacting to every circumstance that

comes into our life. We are miss- using our energy to support our fears and limitations. We keep repeating the same painful and destructive patterns. Using positive thinking and affirmations isn't working. We think we need more will power and we blame ourselves. The reason that this isn't making lasting changes in our life is because we are using the wrong part of our mind. What we discover is that it is our beliefs that are controlling our life. Our

beliefs are buried in our subconscious mind. Until now we have been unaware of what was hidden there. Using PSYCH-K® we can bring our traumas and limiting beliefs to light. When we see what has been holding us back and making us sick, we are able to replace those beliefs with new beliefs that create health, wealth and joy. When we harness this energy we can live in peace, love and joy. We can rise to our highest vibration. We are all

This filmography covers more than 300 horror films released from 1990 through 1999. The horror genre's trends and clichés are connected to social and cultural phenomena, such as Y2K fears and the Los Angeles riots. Popular films were about serial killers, aliens, conspiracies, and sinister “interlopers,” new monsters who shambled their way into havoc. Each of the films is discussed at length with detailed credits and critical commentary.

aesthetic elements, sometimes not consciously noticed, that help to unnerve, frighten, shock or entertain an audience. The first two chapters define the genre and describe the use of pragmatic aesthetics (when filmmakers put technical and budgetary compromises to artistic effect). Subsequent chapters cover mise-en-scène, framing, photography, lighting, editing and sound, and a final chapter is devoted to the aesthetic appeals of horror cinema.
