The stimulus for the joint venture of which the present book is the visible result was provided by the discovery of a Malay manuscript of the long lost Hikayat Patani by one of the authors, and the publication, quite independently, of a Thai version of the same text by the other. The authors, who were not acquainted with one another before this, "found" each other at the suggestion of Professor O. W. Wolters, to whom they are grateful for the idea. The preparation of the book took place on both sides of the Atlantic, with a frequent exchange of letters containing the results of the work of each author. In August, 1969, Teeuw was given the opportunity to visit Cornell University, where in a fortnight's most intensive contact and concentrated research all the drafts were checked, supplemented, rewritten and improved, and the definitive arrangement of the book decided on. The work on the manuscript was completed in the following four months, again in geographically separated spheres. The actual manuscript was rounded off at the beginning of 1970.

This book offers a history of international public health spanning the colonial and post-colonial eras. The volume focuses on India and the transnational networks connecting developments in India with Southeast Asia, and the wider world and contributes to debates on nationalism, internationalism and science in an age of decolonization.

"Alif had never set foot outside of West Sumatra. He passed his childhood days searching for fallen durian fruit in the jungle, playing soccer on rice paddies, and swimming in the blue waters of Lake Maninjau. His mother wants him to attend an Islamic boarding school, a pesantren, while he dreams of public high school. Halfheartedly, he follows his mother's wishes. He finds himself on a grueling three-day bus ride from Sumatra to Madani Pesantren (MP) in a remote village on Java. On his first day at MP, Alif is captivated by the powerful phrase *man jadda wajada*. He who gives his all will surely succeed. United by punishment, he quickly becomes friends with five boys from across the archipelago, and together they become known as the Fellowship of the Manara. Beneath the mosque's minaret, the boys gaze at the clouds on the horizon, seeing in them their individual dreams of far-away lands, like America and Europe. Where would these dreams take them? They didn't know. What they did know was: never underestimate dreams, no matter how high they may be. God truly is The Listener. The Land of Five Towers is the first book in a trilogy written by A. Fuadi—a former TEMPO & VOA reporter,

photography buff, and a social entrepreneur. He went to George Washington University and Royal Holloway, University of London for his masters. A portion of the royalties from the trilogy are intended to build Komunitas Menara, a volunteer-based social organization which aims to provide free schools, libraries, clinics and soup kitchens for the less fortunate. Indonesia is the home of the largest single Muslim community of the world. Its Christian community, about 10% of the population, has until now received no overall description in English. Through cooperation of 26 Indonesian and European scholars, Protestants and Catholics, a broad and balanced picture is given of its 24 million Christians. This book sketches the growth of Christianity during the Portuguese period (1511-1605), it presents a fair account of developments under the Dutch colonial administration (1605-1942) and is more elaborate for the period of the Indonesian Republic (since 1945). It emphasizes the regional differences in this huge country, because most Christians live outside the main island of Java. Muslim-Christian relations, as well as the tensions between foreign missionaries and local theology, receive special attention.

exceedingly ordinary life—steady boyfriend, close family—who has barely been farther afield than their tiny village. She takes a badly needed job working for ex–Master of the Universe Will Traynor, who is wheelchair bound after an accident. Will has always lived a huge life—big deals, extreme sports, worldwide travel—and now he’s pretty sure he cannot live the way he is. Will is acerbic, moody, bossy—but Lou refuses to treat him with kid gloves, and soon his happiness means more to her than she expected. When she learns that Will has shocking plans of his own, she sets out to show him that life is still worth living. A Love Story for this generation and perfect for fans of John Green’s *The Fault in Our Stars*, *Me Before You* brings to life two people who couldn’t have less in common—a heartbreakingly romantic novel that asks, What do you do when making the person you love happy also means breaking your own heart?

Despite its reputation for religious intolerance, the Middle East has long sheltered many distinctive and strange faiths: one regards the Greek prophets as incarnations of God, another reveres Lucifer in the form of a peacock, and yet another believes that their followers are reincarnated beings who have existed in various forms for thousands of years. These religions represent the last vestiges of the magnificent civilizations in ancient history: Persia, Babylon, Egypt in the time of the Pharaohs. Their followers have learned how to survive foreign attacks and the perils of assimilation. But today, with the Middle East in turmoil, they face greater challenges than ever before. In *Heirs to Forgotten Kingdoms*, former diplomat Gerard Russell ventures to the distant, nearly impassable regions where these mysterious religions still cling to survival. He lives alongside the Mandaeans and Ezidis of Iraq, the Zoroastrians of Iran, the Copts of Egypt, and others. He learns their histories, participates in their rituals, and comes to understand the threats to their communities. Historically a tolerant faith, Islam has, since the early 20th century, witnessed the rise of militant, extremist sects. This development, along with the rippling effects of Western invasion, now pose existential threats to these minority faiths. And as more and more of their youth flee to the West in search of greater freedoms and job prospects, these religions face the dire possibility of extinction. Drawing on his extensive travels and archival research, Russell provides an essential record of the past, present, and perilous future of these remarkable religions.

A colour-drenched epic, filled with vivid sex and violence, from Indonesia's most exciting young author The epic novel *Beauty Is a Wound* combines history, satire, family tragedy, legend, humour, and romance in a sweeping polyphony. The beautiful Indo prostitute Dewi Ayu and her four daughters are beset by incest, murder, bestiality, rape, insanity, monstrosity, and the often vengeful undead. Kurniawan's gleefully grotesque hyperbole functions as a scathing critique of his young nation's troubled past: the rapacious offhand greed of colonialism; the chaotic struggle for independence; the 1965 mass murders of perhaps a million Communists, followed by three decades of Suharto's despotic rule. *Beauty Is a Wound* astonishes from its opening line: 'One afternoon on a weekend in May, Dewi Ayu rose from her grave after being dead for

twenty-one years...' Drawing on local sources folk tales and the all-night shadow puppet plays, with their bawdy wit and epic scope and inspired by Melville and Gogol, Kurniawan's distinctive voice brings something luscious yet astringent to contemporary literature. Eka Kurniawan was born in Tasikmalaya, Indonesia in 1975. He studied philosophy at Gadjah Mada University, Yogyakarta and has since published several novels and short stories. The rights to Beauty is a Wound have now been sold in 27 territories. Love and Vengeance will be published by Pushkin Press in 2017.

*Drawing on a decade of research into the community that proposed the so-called "Ground Zero Mosque," this book refutes the idea that current demands for Muslim moderation have primarily arisen in response to the events of 9/11, or to the violence often depicted in the media as unique to Muslims. Instead, it looks at a century of pressures on religious minorities to conform to dominant American frameworks for race, gender, and political economy. These include the encouraging of community groups to provide social services to the dispossessed in compensation for the government's lack of welfare provisions in an aggressively capitalist environment. Calls for Muslim moderation in particular are also colored by racist and orientalist stereotypes about the inherent pacifism of Sufis with respect to other groups. The first investigation of the assumptions behind moderate Islam in our country, Making Moderate Islam is also the first to look closely at the history, lives, and ambitions of the those involved in Manhattan's contested project for an Islamic community center.*

*A riveting blend of family history and original reportage that explores—and reimagines—Asian American identity in a Black and white world “A smart, vulnerable, and incisive exploration of what it means for this brilliant and honest writer—a child of Korean immigrants—to assimilate and aspire while being critical of his membership in his community of origin, in his political tribe, and in America.”—Min Jin Lee, author of Pachinko In 1965, a new immigration law lifted a century of restrictions against Asian immigrants to the United States. Nobody, including the lawmakers who passed the bill, expected it to transform the country’s demographics. But over the next four decades, millions arrived, including Jay Caspian Kang’s parents, grandparents, aunts, and uncles. They came with almost no understanding of their new home, much less the history of “Asian America” that was supposed to define them. The Loneliest Americans is the unforgettable story of Kang and his family as they move from a housing project in Cambridge to an*

*idyllic college town in the South and eventually to the West Coast. Their story unfolds against the backdrop of a rapidly expanding Asian America, as millions more immigrants, many of them working-class or undocumented, stream into the country. At the same time, upwardly mobile urban professionals have struggled to reconcile their parents' assimilationist goals with membership in a multicultural elite—all while trying to carve out a new kind of belonging for their own children, who are neither white nor truly "people of color." Kang recognizes this existential loneliness in himself and in other Asian Americans who try to locate themselves in the country's racial binary. There are the businessmen turning Flushing into a center of immigrant wealth; the casualties of the Los Angeles riots; the impoverished parents in New York City who believe that admission to the city's exam schools is the only way out; the men's right's activists on Reddit ranting about intermarriage; and the handful of protesters who show up at Black Lives Matter rallies holding "Yellow Peril Supports Black Power" signs. Kang's exquisitely crafted book brings these lonely parallel climbers together amid a wave of anti-Asian violence. In response, he calls for a new form of immigrant solidarity—one rooted not in bubble tea and elite college admissions but in the struggles of refugees and the working class.*

A riveting, revealing and news-making account of the CIA's interrogation of Saddam, written by the CIA agent who conducted the questioning. In December 2003, after one of the largest, most aggressive manhunts in history, US military forces captured Iraqi president Saddam Hussein near his hometown of Tikrit. Beset by body-double rumors and false alarms during a nine-month search, the Bush administration needed positive identification of the prisoner before it could make the announcement that would rocket around the world. At the time, John Nixon was a senior CIA leadership analyst who had spent years studying the Iraqi dictator. Called upon to make the official ID, Nixon looked for telltale scars and tribal tattoos and asked Hussein a list of questions only he could answer. The man was indeed Saddam Hussein, but as Nixon learned in the ensuing weeks, both he and America had greatly misunderstood just who Saddam Hussein really was. Debriefing the President presents an astounding, candid portrait of one of our era's most notorious strongmen. Nixon, the first man to conduct a prolonged interrogation of Hussein after his capture, offers expert insight into the history and mind of America's most enigmatic enemy. After years of parsing Hussein's leadership from afar, Nixon faithfully recounts his debriefing sessions and subsequently strips away the mythology surrounding an equally brutal and complex man. His account is not an apology, but a sobering examination of how preconceived ideas led Washington policymakers—and Tony Blair's government —astray. Unflinching and unprecedented, Debriefing the President exposes a fundamental misreading of one of the modern world's most central figures and presents a

new narrative that boldly counters the received account.

The Loneliest Americans

Hikayat Patani the Story of Patani

(delusion of the Devil)

India and Southeast Asia, 1930–65

During the 1950s and 1960s True Detective magazine developed a new way of narrating and understanding murder. It was more sensitive to context, gave more psychologically sophisticated accounts, and was more willing to make conjectures about the unknown thoughts and motivations of killers than others had been before. This turned out to be the start of a revolution, and, after a century of escalating accounts, we have now become a nation of experts, with many ordinary people able to speak intelligently about blood-spatter patterns and organized vs. disorganized serial killers. The Rise of True Crime examines the various genres of true crime using the most popular and well-known examples. And despite its examination of some of the potentially negative effects of the genre, it is written for people who read and enjoy true crime, and wish to learn more about it. With skyrocketing crime rates and the appearance of a frightening trend toward social chaos in the 1970s, books, documentaries, and fiction films in the true crime genre tried to make sense of the Charles Manson crimes and the Gary Gilmore execution events. And in the 1980s and

1990s, true crime taught pop culture consumers about forensics, profiling, and highly technical aspects of criminology. We have thus now become a nation of experts, with many ordinary people able to speak intelligently about blood-spatter patterns and organized vs. disorganized serial killers. Through the suggestion that certain kinds of killers are monstrous or outside the realm of human morality, and through the perpetuation of the stranger-danger idea, the true crime aesthetic has both responded to and fostered our culture's fears. True crime is also the site of a dramatic confrontation with the concept of evil, and one of the few places in American public discourse where moral terms are used without any irony, and notions and definitions of evil are presented without ambiguity. When seen within its historical context, true crime emerges as a vibrant and meaningful strand of popular culture, one that is unfortunately devalued as lurid and meaningless pulp.

This book analyses the exponential growth of independent news portal (INPs) in Malaysia and discusses the extent of impacts generated from these portals in Malaysian electoral conduct especially during Malaysia's 12th and 13th general elections. The mainstream media in Malaysia has for decades been controlled by strict laws such as the Printing Presses and Publications Act (PPPA) and the Sedition Act, as well as self-censorship by print and broadcast journalists and editors. The rise of INP in Malaysia has challenged this government stranglehold, as well as making information available much faster than the mainstream media. The undeniable speed of the news posted on INP which often come with interactive contents are seen to have caused a remarkable increment on public's options with regards to expressing their political views. Some of the INPs have also impressively taken up a notch by providing live streaming videos or interesting online visual news which indirectly unifies various sectors of pressure groups in providing options of circulating and disseminating information to the public. The interviews conducted for this book provide deeper insights from those producing news and at the same time provide a specific and thorough observation on political events including representatives of the Malaysian middle class, Opposition parties, youth and university students, NGOs and civil society movements. Chinnasamy investigates key questions relating to this shift in relation to media preference concerning on the mainstream and political landscape in Malaysia. Did the INP evolve new democratic movement in the country or induce a change in the way the government retains its power by increasing people's active engagement in political participation? Did any revolution in government-managed media landscape occur drastically? If so, how did they accomplish these changes? This book will fill the gap of existing research on how far have the INP empowered themselves to be the third force in fighting democratic movement in the country and how the ruling government continues seeing it as a contention, as foreseen by many experts in the industry.

Emphasizing the understanding of images and their influences on how they affect our attitudes, beliefs, and actions, this fully updated sixth edition offers consequential ways of looking at images from the perspectives of photographers, critics, theoreticians, historians, curators, and editors. It invites informed conversations about meanings and implications of images, providing multiple and sometimes conflicting answers to questions such as: What are photographs? Should they be called art? Are they ethical? What are their implications for self, society, and the world? From showing how critics verbalize what they see in images and how they persuade us to see similarly, to dealing with what different photographs might mean, the book posits that some interpretations are better than others and explains how to deliberate among competing interpretations. It looks at how the worth of photographs is judged aesthetically and socially, offering samples and practical considerations for both studio critiques for artists and professional criticism for public audiences. This book is a clear and accessible guide for students of art history, photography and criticism, as well as anyone interested in carefully looking at and talking about photographs and their effects on the world in which we live.

*The Gay Archipelago is the first book-length exploration of the lives of gay men in Indonesia, the world's fourth most populous nation and home to more Muslims than any other country. Based on a range of field methods, it explores how Indonesian gay and lesbian identities are shaped by nationalism and globalization. Yet the case of gay and lesbian Indonesians also compels us to ask more fundamental questions about how we decide when two things are "the same" or "different." The book thus examines the possibilities of an "archipelagic" perspective on sameness and difference. Tom Boellstorff examines the history of homosexuality in Indonesia, and then turns to how gay and lesbian identities are lived in everyday Indonesian life, from questions of love, desire, and romance to the places where gay men and lesbian women meet. He also explores the roles of mass media, the state, and marriage in gay and lesbian identities. The Gay Archipelago is unusual in taking the whole nation-state of Indonesia as its subject, rather than the ethnic groups usually studied by anthropologists. It is by looking at the nation in cultural terms, not just political terms, that identities like those of gay and lesbian Indonesians become visible and understandable. In doing so, this book addresses questions of sexuality, mass media, nationalism, and modernity with implications throughout Southeast Asia and beyond.*
