in support of key National priorities while reducing deficits. OMB looks forward to working closely with you in the coming months to develop a budget request that supports the President's vision. Most of the changes in this update are technical revisions and clarifications, and the policy requirements are largely unchanged. The summary of changes to the Circular highlights the changes made since last year. This Circular supersedes all previous versions. VOLUME I Part 1-General

If Iraq and the United States are to win the war in any meaningful and lasting sense, they must translate the Strategic Agreement they*

signed in November 2008 into a lasting and functional strategic partnership. In the process, the United States must put Iraq firmly in the lead, but sustain the kind of aid and advice that will help Iraq make further progress in political accommodation, the quality of governance, economic development, and security. The CSIS Burke Chair in Strategy conducted a detailed analysis of the current situation in Iraq, the challenges Iraq faces, and the actions the United States needs to take to help Iraq meet

those challenges. Its report provides a detailed risk assessment of current and potential levels of violence in Iraq. It addresses the levels of political accommodation and stability and the problems Iraq still faces in the aftermath of the national election. It also addresses the opportunities and problems in developing Iraq's petroleum sector; investment and development issues in other sectors, the problems in the Iraqi budget forecasts, and progress in Iraqi reconstruction. It evaluates

the need for continued economic aid and advice and describes U.S. options for extending such assistance. The concluding section examines progress in creating Iraqi military and police forces. It examines the role the United States can play in helping Iraq further develop such forces and analyzes what a strategic partnership, based on the Strategic Agreement, should mean.

In the early morning hours of June 19, 1815, more than 50,000 men and 7,000 horses lay dead and wounded on a battlefield just south of Brussels. In the hours, days, weeks and months that followed, news of the battle would begin to shape the consciousness of an age; the battlegrounds would be looted and cleared, its dead buried or burned, its ground and ruins overrun by voyeuristic tourists; the victorious British and

Prussian armies would invade France and occupy Paris. And as his enemies within and without France closed in, Napoleon saw no avenue ahead but surrender, exile and captivity. In this dramatic account of the aftermath of the battle of Waterloo, Paul O'Keeffe employs a multiplicity of contemporary sources and viewpoints to create a reading experience that brings into focus as never before the sights, sounds, and smells of the battlefield, of conquest and defeat, of celebration and riot.

in the sand, the fifty Marines of 3rd Platoon fought in Sangin, the most dangerous district in all of Afghanistan. So heavy were the casualties that the Secretary of Defense offered to pull the Marines out. Instead, they pushed forward. Each Marine in 3rd Platoon patrolled two and a half miles a day for six months—a total of one million steps—in search of a ghostlike enemy that struck without warning. Why did the Marines attack and attack, day after day? Every day brought a new skirmish. Each footfall might trigger an IED. Half the Marines in 3rd Platoon didn't make it intact to the end of the tour. One Million Steps is the story of the fifty brave men who faced these grim odds and refused to back down. eye view of life on the front lines of America ' s longest war. Writing with a combat veteran ' s compassion for the fallen, West also offers a damning critique of the higher-ups who expected our warriors to act as nation-builders—and whose failed strategy put American lives at unnecessary risk. Each time a leader was struck down, another rose up to take his place. How does one man instill courage in another? What welded these men together as firmly as steel plates? This remarkable book is the story of warriors caught between a maddening, unrealistic strategy and their unswerving commitment to the fight. Fearsome, inspiring, and poignant in its telling, *One Million Steps* is sure to become a classic, a unique and enduring testament to the American warrior spirit. This book describes how future Army forces, as part of joint, interorganizational, and multinational efforts, operate to accomplish campaign objectives and protect U.S. national interests. It describes the Army's contribution to globally integrated operations, and addresses the need for Army forces to provide foundational capabilities for the Joint Force and to project power onto land and from land across the air,

While focused on serving children and families, the adoption industry must also generate sufficient revenue to cover an agency ' s operating costs. With its fee-for-service model, Elizabeth Raleigh

asks, How does private adoption operate as a marketplace? Her eye-opening book, *Selling Transracial Adoption*, provides a fine-grained analysis of the business decisions in the adoption industry and what it teaches us about notions of kinship and race. Adoption providers, Raleigh declares, are often tasked with pitching the idea of transracial adoption to their mostly white clientele. But not all children are equally “desirable,” and transracial adoption—a market calculation—is hardly colorblind. *Selling Transracial Adoption* explicitly focuses on adoption providers and employs candid interviews with adoption workers, social workers, attorneys, and counselors, as well as observations from adoption conferences and information sessions, to illustrate how agencies institute a racial hierarchy—especially when the supply of young and healthy infants is on the decline. Ultimately, Raleigh discovers that the racialized

In March 1993, Secretary of Defense Aspin initiated a comprehensive review of the nation's defense strategy, force structure, modernization, infrastructure, and foundations. He felt that a department-wide review needed to be conducted "from the bottom up" because of the dramatic changes that have occurred in the world as a result of the end of the Cold War and the dissolution of the Soviet Union. These changes in the international security environment have fundamentally altered America's security needs. Thus, the underlying premise of the Bottom-Up

Review was that we needed to reassess all of our defense concepts, plans, and programs from the ground up. This final report on the Bottom-Up Review provides the results of that unprecedented and collaborative effort. It represents the product of hundreds of individuals' labor and dedication. It describes the extensive analysis that went into the review and the recommendations and decisions that emerged.

Airline Operations and Management: A Management Textbook is a survey of the airline industry, mostly from a managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly economics, operations, marketing and finance, in developing the overview of the industry. The focus is on tactical, rather

than strategic, management that is specialized or unique to the airline industry. The primary audiences for this textbook are both senior and graduate students of airline management, but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their own functional area. Innovative strategies for building and managing the supply chain using Lean and the Theory of Constraints (TOC) With an emphasis on systems thinking, Building Lean Supply Chains with the Theory of Constraints uniquely integrates TOC with Lean, illustrating how these two philosophies complement and reinforce each other to create the smooth flow of goods and services through the supply chain. The majority of the chapters draw on the tools and techniques of

TOC, including throughput accounting, drum-buffer-rope, TOC in distribution and replenishment, the thinking process, and critical chain project management. All of these topics are presented in the context of building and managing a lean supply chain to achieve true bottom line results. Coverage includes: The lean supply chain roadmap Envisioning the lean supply chain: systems thinking Adopting a throughput world perspective Designing products and processes to fulfill customer needs Building a competitive operations strategy Partnering in the lean supply chain Streamlining the value stream Creating flow through the supply chain Managing projects the TOC way: critical chain project management Demonstrated Energy Neutrality Leadership Selling Transracial Adoption

At the age of twelve, American William R. Dunn decided to become a fighter pilot. In 1939 he joined the Canadian Army and was soon transferred to the Royal Air Force. He was the first pilot in the famous Eagle Squadron of American volunteers to shoot down an enemy aircraft and later became the first American ace of the war. After joining the U.S. Army Air Corps in 1943, he saw action in the Normandy invasion

and in Patton's sweep across France. Twenty years later he fought again in Vietnam. Dunn keenly conveys the fighter pilot's experience of war -- the tension of combat, the harsh grip of fear, the love of aircraft, the elation of victory, the boisterous comradeship and competition of the pilot brotherhood. *Fighter Pilot* is both a gripping story and a unique historical document.
