Bibliophiles in Europe at the end of the nineteenth century began to take a serious interest in the manuscripts of the Middle East and the paper on which they were written. Perhaps the most important of these men were C.-M. Briquet working in Geneva, and J. Wiesner and J. von Karabacek working in Vienna. All three were concerned with the burning topic of the moment: Was oriental paper made of cotton? Within the space of two years these three writers published seminal articles for the European study of Arab paper. *Das Arabische Papier* is one of those articles. The late Don Baker's inspiration to set about the translation and interpretation of this work was 'simply the desire to know the contents of this much quoted article'. Students, historians, curators, collectors, conservators and all those interested in the historical development and spread of papermaking will realise why Don Baker wished to make this important text available to English readers. This Archetype edition is a revised edition of the volume, which Don Baker produced in 1991.

A mommy blogger gone bad... Jess McAdams dotes on her four children and gives advice and suggestions to parents all around the world. No one would ever question her love and devotion to her children, let alone suspect her of murdering one. But Alex Mercer does. Alex has plenty of experience investigating crimes involving missing kids. So when he senses something is wrong, he trusts his instincts. The only problem is, he's a newly deputized officer of the law. If he's wrong about Jess, he'll destroy his career before it gets off the ground. He receives a tip that Jess has suddenly stopped posting about one of her children. It's almost as if he never existed, except her old blog posts show otherwise. The deeper Alex digs, the more twisted and sinister things begin to look. His precinct's resources would be invaluable to his investigation, but his commanding officer isn't convinced the case is local and turns him down. And Alex doesn't have the evidence to sway his captain—yet. His only chance at finding the proof he needs is by using the resources he's been denied. But Alex will stop at nothing until he finds the mommy blogger and saves the children he knows are in danger—even at the risk of losing his dream job—because he knows he's right. And with young lives on the line, there's a lot more at stake than his career.

“Superb. [A] first-rate narrative” (The Wall Street Journal) about the controversial construction of New York’s beloved original Penn Station and its tunnels, from the author of Eiffel’s Tower and Urban Forests
As bestselling books like Ron Chernow’s Titan and David McCullough’s The Great Bridge affirm, readers are fascinated with the grand personalities and schemes that populated New York at the close of the nineteenth century. Conquering Gotham re-creates the riveting struggle waged by the great Pennsylvania Railroad to build Penn Station and the monumental system of tunnels that would connect water-bound Manhattan to the rest of the continent by rail. Historian Jill Jonnes tells a ravishing tale of snarling plutocrats, engineering feats, and backroom politicking packed with the most colorful figures of Gilded Age New York. Conquering Gotham will be featured in an upcoming episode of PBS’s American Experience.

“An instant classic...highly recommended!” —New York Times and USA TODAY bestselling author

Jennifer Probst USA TODAY bestselling indie author Alice Clayton delights readers with the sexy, laugh-out-loud romance of Caroline and Simon in Wallbanger, the first book in the Cocktail series! The first night after Caroline moves into her fantastic new San Francisco apartment, she realizes she's gaining an—um—intimate knowledge of her new neighbor's nocturnal adventures. Thanks to paper-thin walls and the guy's athletic prowess, she can hear not just his bed banging against the wall but the ecstatic response of what seems (as loud night after loud night goes by) like an endless parade of women. And since Caroline is currently on a self-imposed "dating hiatus," and her neighbor is clearly lethally attractive to women, she finds her fantasies keep her awake even longer than the noise. So when the wallbanging threatens to literally bounce her out of bed, Caroline, clad in sexual frustration and a pink baby-doll nightie, confronts Simon Parker, her heard-but-never-seen neighbor. The tension between them is as thick as the walls are thin, and the results just as mixed. Suddenly, Caroline is finding she may have discovered a whole new definition of neighborly... In a delicious mix of silly and steamy, Alice Clayton dishes out a hot and hilarious tale of exasperation at first sight.

As the Proceedings of the 1984 Canadian Mathematical Society's Summer Seminar, this book focuses on some advances in the theory of semisimple Lie algebras and some direct outgrowths of that theory. The following papers are of particular interest: an important survey article by R. Block and R. Wilson on restricted simple Lie algebras, a survey of universal enveloping algebras of semisimple Lie algebras by W. Borho, a course on Kac-Moody Lie algebras by I. G. Macdonald with an extensive bibliography of this field by Georgia Benkart, and a course on formal groups by M. Hazewinkel. Because of the expository surveys and courses, the book will be especially useful to graduate students in Lie theory, as well as to researchers in the field.

Mathieu Sapin has made a career as a nonfiction cartoon chronicler. In a blend of witty, insightful diary and documentary vérité, he has tackled topics from moviemaking to the making of a presidential campaign, and provided behind-the-scenes looks at the presidential Palais d'Élysée. But the French government is no match for his latest subject: larger-than-life film star Gérard Depardieu, the most famous Frenchman in the world! From Azerbaijan to Bavaria, passing through Moscow and Portugal, Sapin tags along on a wild ride, creating a faithful portrait of a man full of contradictions.

"Slavery throughout the capitalist world-economy expands. The old zones in one way or another reach their limits and the new zones break through: to become part of the new division of labor (in the 19th century). In

that sense The Second Slavery would encompass both decline and renewal of slaveries. I never intended the idea to apply just to Cuba, Brazil, and the cotton South as some people seem to take it. For me it is a concept of world economy and Cuba, Brazil, and the South are the obvious examples of those zones that break through. They permit us to think about slavery in a more dynamic way, but there is much more work to be done. From this perspective I would be more inclined to include Reunion, Mauritius and some parts of India, Ceylon and Java as well as British Guiana, than the older French and British Caribbean islands." -- contributor Dale Tomich, Binghamton U., New York *** The Second Slavery includes the following essays: African Slaves and the Atlantic: A Cultural Overview * The End of the British Atlantic Slave Trade or the Beginning of the Big Slave Robbery, 1808-1850 * Peasant or Proletarian: Emancipation and the Struggle for Freedom in British Guiana in the Shadow of the Second Slavery * The End of the "Second Slavery" in the Confederate South and the "Great Brigandage" in Southern Italy: A Comparative Study * Puerto Rico: "Atlantizacion" and Culture during the "Segunda Esclavitud" * The Second Slavery: Modernity, Mobility, and Identity of Captives in Nineteenth-Century Cuba and the Atlantic World * Commodity Frontiers, Conjuncture and Crisis: The Remaking of the Caribbean Sugar Industry, 1783-1866 * The Aftermath of Abolition:

*This book traces the development of popular cinema
from its inception to the present day to understand why
humankind has expanded its viewing of popular movies
over the last century. Drawing from his extensive work as
a psychologist studying artistic canons, James E.*

*Cutting presents hundreds of films across a wide range
of genres and eras, considers the structure of frame
content, shots, scenes, and larger narrational elements
defined by color, brightness, motion, clutter, and range
of other variables. He examines the effects of camera
lenses, image layout, transitions, and historical functions
to classify different kinds of shots. He explains the arcs
of scenes, the larger structure of sequences, and the
scene- and sequence-like units that have become
increasingly prevalent in recent years. The book then*

breaks movies into larger, roughly half-hour parts and espouses the psychological evidence behind each device's intended effect, ultimately exploring the rhythms of whole movies, the flow of physical changes, and the cinematic polyrhythms that have come to match aspects those in the human body. Along the way, the book considers cultural and technological evolutions that have contributed to shifts in viewers' engagement by sustaining attention, promoting understanding of the narrative, heightening emotional commitment, and fostering felt presence in the story. Movies on Our Minds asks critical questions about how our emotional processes and the way our experiences of movies have changed over the course of cinematic history, for a cutting-edge look at what makes popular movies enjoyable.

Kim's mission to the other Antares planet – the one from which came the mysterious beam that took her daughter – is underway, and the young woman desperately wants to believe she will find her missing child. The massive, multilayered city of Neopolis, built shortly after World War II, was designed as a home for the expanding population of science-heroes, heroines and villains that had ballooned into existence in the previous decade. In 1985 the city accepted jurisdiction by a police force covering many alternate Earths, headquartered on the world known as Grand Central. Our own outpost of this network, Precinct Ten (known affectionately as Top 10), recruits its members from Neopolis and its environs, working much like Earth's other police precincts, with one major exception: Like the citizens of the city, the officers of Top 10 have the abilities needed to deal with Neopolis's exotic denizens. Rookie cop Robyn Slinger, alter ego "Toybox," hits the streets for the first time along with a colorful crew of fellow officers, each having the required training to deal with science-villains and super-crimes, as well as the common misdemeanors of city life. You'll never look at powers, or police work, the same way again! From Alan Moore, the writer of WATCHMEN and V FOR VENDETTA, and artists Gene Ha (JUSTICE LEAGUE) and Zander Cannon (Transformers), the Eisner award-winning series TOP 10 is collected here in its entirety!

ABC's, First Words, Numbers and Shapes, Colors and Opposites including a special note to parents. Children will enjoy hours of learning fun in each 32-page bi-lingual book.
