Paper 2 8009 Mark
Scheme

the areas of theoretical, experimental and computational fluid and aero dynamics. The set of two volume contains panel discussions and research contribution with the following objectives: (1) expose the academic community to current technologically important issues of

instability and transitions in shear flows over the entire speed range, (2) acquaint the academic community with the unique combination of theoretical, computational and experimental capabilities at LaRC and foster interaction with these facilities. (3) review current state-of-

*the-art and propose
future directions for
instability and
transition research, (4)
accelerate progress in
elucidating basic
understanding of
transition phenomena
and in transferring this
knowledge into
improved design
methodologies through
improved transition
modeling, and (5)*
