

General Pharmacology Bakersfield College

Here's a comprehensive and clinically-specific reference on toxicology. The 3rd Edition includes chapters on overdose during rapid-sequence intubation and conscious sedation, management of complications of thrombolytic agents, and the application of hyperbaric medicine in toxicology. Provides the perfect balance of basic pharmacokinetics and clinical management. Contributions are by experts in the field.

A compact version of this useful guide features approximately 2000 brand-name and 600 generic drugs. More than 450 charts and tables provide quick comparisons for drugs, classes, and dose forms. A new appendix lists drug names that sound similar. (Professional--Medicine)

Pharmacology for Nursing Practice

Over 400 colleges and universities have adopted this up-to-date user-friendly textbook addressing psychoactive drugs and compulsive behaviors. Wide-ranging research and extensive citations make this an excellent reference source. A companion Study Guide containing chapter outline, guided review, practice tests, a drug identification table, and an extended glossary is available to download with each copy. Key ideas and concepts are highlighted throughout the book. This technique along with the Study Guide aids readers in processing the materials. Instructor support materials are also available. The content relies on the most current data and studies as well as practical information and interviews drawn from treatment professionals and their clients. The material gives perceptive insights into the complex fields of drug abuse, compulsive behaviors, addiction, treatment, recovery, and prevention. QR (quick response) codes access short videos for each chapter, and hundreds of illustrations, photos, and graphics make this clearly, concisely, and simply written textbook valuable to instructors, students, and

professionals alike.

Written by experts in the field, this comprehensive resource offers valuable information on the practical uses of drugs in primary eye care. Discussions of the pharmacology of ocular drugs such as anti-infective agents, anti-glaucoma drugs, and anti-allergy drugs lead to more in-depth information on ocular drugs used to treat a variety of disorders, including diseases of the eyelids, corneal diseases, ocular infections, and glaucoma. The book also covers ocular toxicology, focusing on drug interactions, ocular effects of systemic drugs, and life-threatening systemic emergencies.

Redesigning America's Community Colleges

Directory of Corporate Counsel, Fall 2020 Edition (2 vols)

Revised by the American Medical Association (AMA), Graduate Medical Education Directory, 2012–2013 (Green Book) contains comprehensive information on 9,000 Accreditation Council for Graduate Medical Education–accredited programs (GME) in the United States, including Residency, Fellowship, and Combined programs, plus residency application and career–planning resources. Revisions and updates: specialty/subspecialty information, Match data, 215 new programs, and 3,000 teaching institutions.

In the last decade neuroscience has matured at a remarkable pace, shedding a far more exacting light on mechanisms of neurophysiology, pathophysiology of injury, neuroendocrinology, neuro-immunology, neuroplasticity, neuropharmacology and neurodegenerative processes.

Individuals with acquired brain injury are treated earlier and now achieve far better recovery than in the past. The fourth edition of this text constitutes a continuation of 20 years of coverage of traumatic brain injury, and broadens the discussion of acquired brain injury. Within TBI, the paradigm shift from an injury occurring at a point in time to a disease entity of a chronic nature is changing the discussion of diagnosis, management, treatment and outcome assessment. Disease specification that differentiates TBIs by the mechanism of injury, the exact nature of the injury, the extent of injury, presence of co-morbidities and their exact nature, gender, age, race, and genome are emerging as crucial. There was a time when cancer was an undifferentiated disease. Disease differentiation has consequently impacted diagnosis, treatment and outcome. This text is intended to serve as a ready reference tool,

contributing to the professional growth of each reader, and stimulating innovation and research. It also promotes the continued refinement in the management of diseases of acquired brain injury.

Ethics in Public and Community Health

Lists over 3,700 graduate programs in 37 disciplines in the biological sciences

The purpose of public and community health is to improve the health of populations or groups rather than concentrating on individuals. This book examines the ethical issues associated with public and community health. The contributors analyse the major ethical issues in public health - prioritisation, public participation, health promotion and screening - all of which reflect current practice in the UK. They examine what health services should be available, who should have access to which health services, what are the best strategies for preventing disease, how can professional and public views be reconciled and when can an individual's health needs override the choice of a community. The contributors apply up-to-date ethical theory to practical examples in public health practice to provide a comprehensive and accessible introduction to the key issues in public health ethics.

Barbiturate Abuse--1971-1972

The President's Review

Physical and Mental Effects of Psychoactive Drugs

Barbiturate Abuse--1971-1972

Drug Facts and Comparisons 1997

Community colleges enroll half of the nation's undergraduates.

Yet only 40 percent of entrants complete an undergraduate degree in six years. Redesigning America's Community Colleges explains how two-year colleges can increase their students' success rate quickly and at less cost, through a program of guided pathways

to completion.

This is the pocket version of 'Drugs fact and comparisons' (DFC), a loose-leaf drug information service published in the USA. This version is designed to provide an easy to use, concise, portable tool for daily practice at the point of care. Aimed at professionals, it gives information on over 600 generic drugs, with 2000 plus representative trade names. It is organised in twelve therapeutic categories to enable identification and comparison of similar agents. The categories are nutritionals, blood modifiers, hormones, cardiovasculars, respiratories, CNS drugs, gastrointestinal, anti-infectives, biologicals, topicals, antieoplastics and miscellaneous. Product tables which list trade names, methods of dosage, strengths and manufacturers are given at the beginning of each drug description. Actions, indications, contraindications, warnings, drug interactions and significant adverse reactions are also included.

Clinical Ocular Pharmacology

Pharmacology Essentials for Allied Health

Drug Facts and Comparisons 1999

Higher education

Resources in Education

Pharmacology Essentials for Allied Health covers the full range of pharmacology concepts at the need-to-know level. Content is organized by major body system to help students understand the connections between particular body systems and drug therapy. Features and Benefits Provides essential content for students in a variety of allied health programs, including medical assisting courses. Teaches students about the major diseases and illnesses that originate in or affect body systems, along with the specific drug therapies used in their treatments. Features colorful, accurate photos, illustrations, and tables to enhance students' understanding of body systems, anatomic structures, medical disorders, medications, and auxiliary drug labels. Enhances students' ability to enter the workforce and advance in their jobs through integrated tips and information on career preparation, professionalism, and soft skills. Offers objective-based and performance-based assessments to gauge students' knowledge.

Halfway between history and philosophy, this book deals with the historical forms that have permitted the understanding of human suffering from the Renaissance to the present. Representation, sympathy, imitation, coherence and narrativity are but a few of the rhetorical recourses that men and women have employed in order to feel our pain.
