Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life. A rash of bizarre murders swept the country ... Senseless. Brutal. Seemingly unconnected. A cop walked into a nursing home and unloaded his weapons on elderly and staff alike. A mass of school shootings. Prison riots of unprecedented brutality. Mind-boggling acts of violence in every state.

This collection of essays explores the history of Russian imperialism, an especially pertinent topic in light of the newly democratic country's entrance into the geopolitical forum-the country's tenuous relationship with Europe was anticipated by Russian historian Nicholas Danilevskii. Some may argue conflicts such as Chechnya are remnants of the imperial thirst for dominance, and that the ever-evolving nation is still fighting old wars over her image as an empire. The works contained in this book trace some of these encounters, and in turn, provide a backdrop for those of today.

Naina Kashyap's to-do List: Change career. Next time the guy at McDonald's acts stupid--be polite. Don't get him arrested again. Stupidity is not a crime. Unfortunately. Change society's notion towards child labour. Dad wants me to get married. What the___? Also remember to change family. Some people always take the right decisions and some people take decisions and then make them right. Naina Kashyap was so sure that she fell in the second category. A sharp-tongued, career-oriented girl of today, she had an opinion about everything--from the local underprivileged children forced to work as labourers to her parents' if-I-am-Jesus-Christ-then-you-are-Paris-Hilton marriage. So when her father ordered her to find a decent groom for herself, she responded in the only way she knew how--rebellion. From crazy accidents in Delhi's streets to near drowning in kiddie pools, she rained her wrath on every man she came across. She thought that things could never get worse. Little did she know that the drama had only just begun.

Indispensable for students of modern physics, this text provides the necessary background in mathematics to study the concepts of electromagnetic theory and quantum mechanics.

It is said that if the smell of the Himalayas creeps into a man's blood, he will return to the hills again and again, and will strive to live amongst them always. Ruskin Bond, master storyteller and connoisseur of the mysterious and macabre, shows how this love may persist to death and beyond. The stories in this collection are set amidst the mists and mellow magic of Bond's beloved mountains. The agents of the supernatural may be gentle like the fairy folk in 'On Fairy Hill', or malevolent like the well-dressed diners of 'The Prize'; humorous like the very proper witch, Miss Bellows, in 'The Black Cat', or tragic like the haunting Gulabi in 'Wilson's Bridge'. 'The Rakshasas' harks back to traditional hill spirits, while 'The Night of the Millennium' poises us tantalizingly on the brink of the future. Bond aficionados will meet familiar faces in 'Reunion at the Regal'. Rounding off this

collection is a gripping mystery, 'Who Killed the Rani?', which is evocative of life in hill stations some twenty years ago. And over all the stories looms the benevolent or brooding presence of the Himalayas, described with Bond's inimitable lyricism.

The Cisco CCNA is one of the most widely recognised and respected qualifications in the IT industry. Every year, tens of thousands of people embark towards taking the exam via private study, Cisco Academy courses, or online training. The sad truth is most students quit along the way, and for those few who actually do attempt it, only 50% pass. All that time, effort, and money wasted! If there are so many manuals, CBT courses, lab simulators, exam engines, and study resources out there, then what goes wrong? This is the question Cisco trainer Paul Browning wanted to get to the bottom of. After interviewing thousands of students, he discovered that most people quit because they are simply overwhelmed with the sheer volume of material they need to digest and, of course, the large number of hands-on skills they need to be able to demonstrate in the exam. Add to that the day-to-day stresses of commuting to work, bringing up a family, and the distraction of everyday problems and challenges; it's no wonder people quit. This is where Cisco CCNA in 60 Days can help. Devised by two industry experts and countless Cisco students just like you, the 60-day programme breaks down every exam requirement into a daily study task. All you need to do is open the book at the relevant day (from 1 to 60), read the theory, and complete the lab. Every lesson is reviewed several times in the form of exam questions, review sessions, a handy exam cram guide, and, of course, hands-on labs for you to follow. You can choose to take the CCENT after the first 30 days and the ICND2 after the next 30 days, or you can take the CCNA after 60 days of study. Here is what is included in your study guide: 60 daily study tasks Full explanations of theory Real-world tips and advice Over 47 hands-on labs, plus 15 bonus CCENT and ICND2 labs CCENT and ICND2 cram guides Bonus VLSM guide Motivational goal-setting guide Downloadable videos Free support via www.in60days.com Author Paul Browning is a former police officer who used his CCNA qualification to help him make a career change to IT. He worked for Cisco in the UK for a while, and then went on to start his own Cisco training company, which he ran for 8 years before moving into online Cisco training. He is the author of several Cisco study guides. He has also created the online Cisco certification training sites, including www.howtonetwork.net and www.in60days.com Technical author Farai Tafa used to work in a shoe shop but decided he wanted more out of life, so he began to study for his Cisco exams. He is now a dual CCIE and one of the leading Cisco consultants in the US. He currently designs, installs, and troubleshoots networks for large companies. Author Daniel Gheorghe is a CCIE in Routing and Switching. He is currently preparing for his second CCIE certification (in Security) and he is developing his skills in system penetration testing. He also holds numerous certifications in networking and security, from Cisco and other vendors, including CCNA, CCDA, CCNA Security, CCNP, CCDP, CCIP, FCNSA, FCNSP, and CEH. He took an interest in IT at an early age and soon developed a passion for computer networking, which made him study hard in order to reach an expert level. Technical author Dario Barinic is a network expert (dual CCIE #25071 - Routing and Switching, and Service Provider) with a Master of Engineering degree and eight years of experience in the networking field. He also holds other certifications, such as Cisco CCNA and CCNP, HP AIS, ASE, MASE, and various Cisco specialisations. Dario is specialised in the area of routing and switching (designing, implementing, troubleshooting, and operating service provider and large enterprise WAN and LAN networks).

'The school where I first met Cora Ravenwing was called Okington School, and I was just beginning to have real ideas and opinions of my own when I first went there...' With Cora Ravenwing (1980) Gina Wilson began her acclaimed career as a novelist for young adults. As she describes in a new preface to this reissue, the idea for the novel 'took a grip' on her such that she wrote without 'planning', inspired by the theme of a child's growing sense of intuition. 'A sensitive, mystery-tinged portrayal of social tensions... Cora Ravenwing, village scapegoat, is the first child whom narrator Becky Stokes meets when her family moves outside London in the mid-1950s; and her reflections deftly pick up the undercurrents of gossip, hostility, and social pretension that power the story of their year's troubled friendship.' Then, when he and Dominic both fall in love with Minuette, romantic obsession looms over a new generation of Tudors. A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
