The Danube is Europe's Amazon. It flows through more countries than any other river on Earth - from the Black Forest in Germany to Europe's farthest fringes, where it joins the Black Sea in Romania. Andrew Eames' journey along its length brings us face to face with the Continent's bloodiest history and its most pressing issues of race and identity. As he travels - by bicycle, horse, boat and on foot - Eames finds himself seeking a bed for the night with minor royalty, hitching a ride on a Serbian barge captained by a man called Attila and getting up close and personal with a bull in rural Romania. He meets would-be kings and walks with gypsies, and finally rows his way beyond the borders of Europe entirely...

The Danube is the longest river in western and central Europe. Rising amidst the beautiful wooded hills of Germany's Black Forest, it touches or winds its way through ten countries and four capital cities before emptying into the Black Sea through a vast delta whose silt-filled channels spread across eastern Romania. From earliest times, the river has provided a route from Europe to Asia that was followed by armies and traders, while empires, from the Macedonian to the Habsburg, rose and fell along its length. Then, in the middle of the twentieth century, the Danube took on the role of a watery thread that unified a continent divided by the Iron Curtain. In the late 1980s the Iron Curtain lifted but the Danube valley soon became an arena for conflict during the violent break-up of the former Yugoslavia.

Now, passing as it does through some of the world's youngest nations, including Slovakia, Croatia, Serbia, Moldova, and Ukraine, the river is a tangible symbol of a new, peaceful, and united Europe as well as a vital artery for commercial and leisure shipping. Andrew Beattie explores the turbulent past and vibrant present of the landscape through which the Danube flows, where the enduring legacies of historical regimes from the Romans to the Nazis have all left their mark.
