The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. The MNH Counselling Handbook is chiefly designed to be used by groups of SAs with the help of a facilitator. It can also be used by individual SAs who can get together with colleagues for discussions and activities where needed. It relies on a drawing on their past counselling experience. The way it is used will be determined by each country’s context, and the SAs preference. The MNH Counselling Handbook is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labour; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

A comprehensive work that brings together and explores state-of-the-art research on the link between stress and health outcomes. Offers the most authoritative resource available, discussing a range of stress theories as well as theories on preventative stress management and how to enhance well-being. Timely given that stress is linked to seven of the ten leading causes of death in developed nations, yet paradoxically successful adaptation to stress can enable individuals to flourish. Contributors are an international panel of authoritative researchers and practitioners.

The Senior Stenographer (Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. Geography does not mean description of the earth’s surface. Many changes have occurred due to external and internal forces. Out of these forces many types, micro-organisms and macro-organisms play an important role of all biological elements on this earth, man is the most important creature, and he is the most intelligent of all the living beings. Man has used natural resources for his needs and welfare. All the necessities for the living things are satisfied from natural environment. He has used natural resources according to his needs, sometimes, adapted his

living according to natural laws of the earth while at times he has used it by his own will, thus without submitting to the nature.

ABOUT THE BOOKThat’s Just Not It is a contemporary fiction novella narrated by a young Filipina named Jesse Danielle or JD for short, who recalls her youth and her memories as a child before her mother and her sister migrated abroad while she decided to live with her father in her home country.A decade after, her sister comes back home to introduce her boyfriend and the past catches up to JD as she reflects on the paths she and her sister have taken. As JD reflects on the life she has so far lived, she comprehends what the real meaning of life is and what makes a person successful. Along the way, she makes realizations about issues of racial discrimination, xenocentrism, and prejudice.Rather than exploring the ideas of what life is, the existentialist topic of the novella is exploring what life isn’t. Rather than describing what happiness looks like, the novella describes what it doesn’t look like.

‘Nicely observed, with deft writing that makes it look easy. I think we all know someone like Germaine’ GRAEME SIMSON, bestselling author of The Rosie Project. Office life can be a minefield. . . Germaine Johnson likes Sudoku, biscuits and maths. She is great with numbers and not so great with people. But after an incident at work leaves her jobless, she’s forced to accept a position she’s entirely wrong for: answering the phones of the Senior Citizen’s Helpline. However, it turns out that the role involves a more interesting secret project: to shut down the local community centre and stop the elderly ‘troublemakers’ in their tracks. Germaine initially believes she is the non-nonsense woman for the job - until she gets to know the very people she’s trying to evict. As the rebellious senior citizens begin to open Germaine’s eyes to a life outside boxes and numbers, she realises that she may be the only one capable of pulling their feuding community together. . . Witty, big-hearted and hugely enjoyable, The Helpline is what you might get if you crossed The Rosie Project with Eleanor Oliphant is Completely Fine.

Ophthalmic Nursing provides an overview for those just setting out in a role within ophthalmic nursing. It includes basic and comprehensible anatomy and physiology – the foundations for understanding how the eye functions and why and how problems occur – and relates them to the care and needs of the patient. This accessible text includes evidence-based procedure guidelines and the inclusion of reflective activities in most chapters allows readers to apply their knowledge to the realities of the care setting. Also covered are the most recent National Institute for Health and Care Excellence (NICE) guidelines for glaucoma and age-related macular degeneration. Since the publication of the fourth edition, there have been many advances in the care and management of the ophthalmic patient. The authors have updated the chapters accordingly and included new colour images and diagrams. References, further reading and websites have also been updated to reflect current trends. A valuable resource for nurses in practice and training, this book continues to be the ‘go-to’ source for those caring for the ophthalmic patient.
