 The Northern Logger and Timber Processor

The success of a piece of communication has always been dependent on the connection between content, form, audience and context - what the message is, who it's aimed at, what it looks like, and how and where it's communicated. In recent years the balance between these elements has shifted. This book bridges the gap between education and emerging practices to provide students and practitioners with the information they need to understand the new skillsets required to succeed in this changing communication environment. Organized into themes of brand, experience, conversation, participation, navigation, advocacy and critique, it explores the core ideas shaping contemporary practice. Alongside case studies of game changing projects, it uses analysis of historical context and interviews with key thinkers and practitioners to provide a relevant and contemporary guide to the creative employment landscape.

 Optimize the performance of your mobile websites and webapps to the extreme. With this hands-on book, veteran mobile and web developer Maximiliano Firtman demonstrates which aspects of your site or app slow down the user's experience, and what you can do to achieve lightning-fast performance. There's much at stake: if you want to boost your app's conversion rate, then tackling performance issues is the best way to start. Learn tools and techniques for working with responsive web design, images, the network layer, and many other ingredients—plus the metrics to check your progress. Ideal for web developers and web designers with HTML, CSS, JavaScript, and HTTP experience, this is your guide to superior mobile web performance. You'll dive into: Emulators, simulators, and other tools for measuring performance Basic web performance concepts, including metrics, charts, and goals How to get real data from mobile browsers on your real networks APIs and specs for measuring, tracking and improving web performance Insights and tricks for optimizing the first view experience Ways to optimize post-loading experiences and future visits Responsive web design and its performance challenges Tips for extreme performance to achieve best conversion rates How to work with web views inside native apps
