Unequal distribution of wealth, poverty, pollution, and gender inequality are just a few of the problems we face and struggle to eliminate. Sustainable development offers a long-term holistic solution to these problems through meeting the needs of the current generation without endangering the capability of future generations in meeting their own needs.

Sustainable education or education for sustainability is a transformative learning paradigm that prepares learners and provides them with knowledge, ethical awareness, skills, values, and attitudes to achieve sustainable goals. Global Approaches to Sustainability Through Learning and Education is a comprehensive academic publication that facilitates a greater understanding of sustainable development

and fosters a culture of sustainability through learning and education. Highlighting a range of topics such as ethics, game-based learning, and knowledge management, this book is ideal for teachers, environmentalists, higher education faculty, activists, curriculum developers, academicians, researchers, professionals, administrators, and policymakers.

Guide Strasbourg France is an easy to use small pocket book filled with all you need for your stay in the big city. Top 50 city attractions, top 50 city restaurants, top 50 hotels, and more than a dozen monthly weather statistics. This travel guide is up to date with the latest developments of the city as of 2017. We hope you let this pocket book be part of yet another fun Strasbourg adventure :) The seemingly vitalizing impact of religiosity on

civil society is a research topic that has been extensively looked into, not only in the USA, but increasingly also in a European context. What is missing is an evaluation of the role of institutionalized religious communities, and of circumstances that facilitate or impede their status as civil society organisations. This anthology in two volumes aims at closing this gap by providing case

studies regarding political, legal and historical aspects in various European countries. Vol. I provides an introduction and looks at cases in Greece, Italy, the Netherlands, Sweden, and Bosnia and Herzegovina, as well as chapters on legal issues and data, and comprehensive bibliography.

Marine Design XIII collects the contributions to the 13th International Marine Design Conference (IMDC 2018, Espoo, Finland, 10-14 June 2018). The aim of this IMDC series of conferences is to promote all aspects of

marine design as an engineering discipline. The focus is on key design challenges and opportunities in the area of current maritime technologies and markets, with special emphasis on:

- Challenges in merging ship design and marine applications of experience-based industrial design*
- Digitalisation as technological enabler for stronger link between efficient design, operations and maintenance in future*
- Emerging technologies and their impact on future designs*
- Cruise ship and*

icebreaker designs including fleet compositions to meet new market demands To reflect on the conference focus, Marine Design XIII covers the following research topic series:

- State of art ship design principles - education, design methodology, structural design, hydrodynamic design;*
- Cutting edge ship designs and operations - ship concept design, risk and safety, arctic design, autonomous ships;*
- Energy efficiency and propulsions - energy efficiency, hull form design, propulsion*

equipment design; •Wider marine designs and practices - navy ships, offshore and wind farms and production. Marine Design XIII contains 2 state-of-the-art reports on design methodologies and cruise ships design, and 4 keynote papers on new directions for vessel design practices and tools, digital maritime traffic, naval ship designs, and new tanker design for arctic. Marine Design XIII will be of interest to academics and professionals in maritime technologies and marine design.

complete coverage and identical format for nonferrous metals and alloys. completely updated and expanded from the previous edition, it's an absolute must if you're involved with materials specifying in any way. This comprehensive volume is well-indexed with easy to use cross references that make short work of looking up equivalents for a material specification or designation. It provides valuable

composition tables and allows you to compare similar alloys. Tensile properties and product forms are provided when available. If you work in the international marketplace, it's especially ideal for identifying foreign specifications, finding similar alloys and verifying compositional limits. This book is organized by material group or class such as aluminum, copper, lead, magnesium, nickel, tin, titanium, and zinc. Each

is further subdivided into groups, then finally into individual alloys. It's a must for metallurgists in design and manufacturing, materials producing companies, distributors and purchasing agents for metallic alloys, design and environmental engineers, academic and institutional libraries and information centres. You can count on Rick Steves to tell you what you "really" need to know when traveling in France. With this guide, you'll explore sleepy villages, romantic hill towns, and cosmopolitan cities, including Paris, Avignon, and Nice. Climb the Eiffel Tower, wander world-renowned museums, and dine at sidewalk

cafes. Then escape to the sunny countryside, where you can explore castles of all shapes and sizes or pedal your way from village to vineyard. With its Swiss-like Alps, Italian-style Riviera, and Germanic Alsace, France offers Europe's greatest variety. A good "vin rouge" is never more than a stroll away. Rick's candid, humorous advice will guide you to good-value hotels and restaurants. He'll help you plan where to go and what to see, depending on the length of your trip. You'll get up-to-date recommendations about what is worth your time and money. More than just reviews and directions, a Rick Steves guidebook is a tour guide in your pocket. "
