*A global movement to take back our food is growing. The future of farming is in our hands—and in our cities. This book examines alternative food systems in cities around the globe that are shortening their food chains, growing food within their city limits, and taking their "food security" into their own hands. The author, an award-winning food journalist, sought out leaders in the urban-agriculture movement and visited cities successfully dealing with "food deserts." What she found was not just a niche concern of activists but a global movement that cuts across the private and public spheres, economic classes, and cultures. She describes a global movement happening from London and Paris to Vancouver and New York to establish alternatives to the monolithic globally integrated supermarket model. A cadre of forward-looking, innovative people has created growing spaces in cities: on rooftops, backyards, vacant lots, along roadways, and even in "vertical farms." Whether it's a community public orchard supplying the needs of local residents or an urban farm that has reclaimed a derelict inner city lot to grow and sell premium market veggies to restaurant chefs, the urban food revolution is clearly underway and working. This book is an exciting, fascinating chronicle of a game-changing movement, a rebellion against the industrial food behemoth, and a reclaiming of communities to grow, distribute, and eat locally.*

*Since 1985, Radio Martí, a Radio Free Europe-type station, has broadcast American news and propaganda in Cuba. Its sister station, TV Martí, debuted in 1990. Respected operations at the start, Radio and TV Marti fell under the influence of the Cuban American National Foundation—a group of hard-line Cuban exiles—who intensified the anti-Castro rhetoric the stations sent to the island and promoted its leaders as the heirs to a post-Castro Cuba. Though the initial goal of the two stations was to increase*

*pro-American sentiment among the island nation's citizens, the stations have succeeded only in driving the two nations further apart. This history of American propaganda broadcasting in Cuba describes how Castro used radio to obtain power; explores the impact of Radio and TV Martí on U.S.-Cuba relations, including the phenomenon of Cuban rafters; and chronicles the domestic political struggles to keep the stations on the air.*

When Timothy Sprigge's *The Vindication of Absolute Idealism* appeared in 1983 it ran very much against the grain of the dominant linguistic and analytic traditions of philosophy in Britain. The very title of this work was a challenge to those who believed that Absolute Idealism fell with the critiques of Bertrand Russell and G. E. Moore at the beginning of the 20th century. Sprigge, however, saw himself as providing an underrepresented position in the philosophical spectrum rather than as advocating an abandoned view. For him, idealism did not fall at any determinate point in the history of philosophy. The truth of any philosophical thesis cannot depend on what happens to be currently fashionable, but rather must stand on the soundness of philosophical argument. To this end, *The Vindication of Absolute Idealism* is a bold statement of his conclusions, a synthesis of panpsychism and absolute idealism, which he contends is the most satisfactory solution to the question of the nature of consciousness and the mind-body problem. Sprigge's view of consciousness remains a challenge to mainstream physicalism and a viable option that addresses pressing contemporary concerns not only in metaphysics and philosophy of mind but also in environmental ethics and animal rights.

In *The Feminine Mystique*, Jewish-raised Betty Friedan struck out against a postwar American culture that pressured women to play the role of subservient housewives. However, Friedan never acknowledged that many American women refused to retreat from public life during these years. Now, *A Jewish Feminine Mystique?* examines how Jewish women sought opportunities and created images that defied the stereotypes and prescriptive ideology of the "feminine mystique." As workers with or without pay, social justice activists, community builders, entertainers, and businesswomen, most Jewish women championed responsibilities outside their homes. Jewishness played a role in shaping their choices, shattering Friedan's assumptions about how

middle-class women lived in the postwar years. Focusing on ordinary Jewish women as well as prominent figures such as Judy Holliday, Jennie Grossinger, and Herman Wouk's fictional Marjorie Morningstar, leading scholars explore the wide canvas upon which American Jewish women made their mark after the Second World War. *Existentialism, as a philosophy, gained prominence after World War II. Instead of focusing upon a particular aspect of human existence, existentialists argued that our focus must be upon the whole being as he/she exists in the world. Rebelling against the rationalism of such philosophers as Descartes and Hegel, existentialists reject the emphasis placed on man as primarily a thinking being. Freedom is central to human existence, and human relations and encounters cannot be reduced simply to "thinking." This Dictionary provides--through alphabetically arranged entries--overviews of the various tenets, philosophers, and writers of existentialism, and of those writers/philosophers who, in retrospect, seem to existentialists to espouse their philosophy: Nietzsche, Kierkegaard, Dostoyevski, et al.*

*In the international bestseller Roma, Steven Saylor told the story of the first thousand years of Rome by following the descendants of a single bloodline. Now, in Empire, Saylor charts the destinies of five more generations of the Pinarius family, from the reign of the first emperor, Augustus, to the glorious height of Rome's empire under Hadrian. Through the eyes of the Pinarii, we witness the machinations of Tiberius, the madness of Caligula, the cruel escapades of Nero, and the chaos of the Year of Four Emperors in 69 A.D. The deadly paranoia of Domitian is followed by the Golden Age of Trajan and Hadrian-but even the most enlightened emperors wield the power to inflict death and destruction on a whim. Empire is strewn with spectacular scenes, including the Great Fire of 64 A.D. that ravaged the city, Nero's terrifying persecution of the Christians, and the mind-*

*blowing opening games of the Colosseum. But at the novel's heart are the wrenching choices and seductive temptations faced by each new generation of the Pinarii. One unwittingly becomes the sexual plaything of the notorious Messalina. One enters into a clandestine affair with a Vestal virgin. One falls under the charismatic spell of Nero, while another is drawn into the strange new cult of those who deny the gods and call themselves Christians. However diverse their destinies and desires, all the Pinarii are united by one thing: the mysterious golden talisman called the fascinum handed down from a time before Rome existed. As it passes from generation to generation, the fascinum seems to exercise a power not only over those who wear it, but over the very fate of the empire. Praise for Steven Saylor: 'Saylor expertly weaves the true history of Rome with the lives and loves of its fictional citizens.' Daily Express 'Saylor's scholarship is breathtaking and his writing enthrals' Ruth Rendell 'With the scalpel-like deftness of a Hollywood director, Saylor puts his finger on the very essence of Roman history.' Times Literary Supplement 'Readers will find his work wonderfully (and gracefully) researched... this is entertainment of the first order.' Washington Post*

Time surrounds us. It defines our experience of the world; it echoes through our every waking hour. Time is the very foundation of conscious experience. Yet as familiar as it is, time is also deeply mysterious. We cannot see, hear, smell, taste, or touch it. Yet we do feel it—or at least we think we do. No wonder poets, writers, philosophers, and scientists have grappled with time for centuries. In his latest book, award-winning science writer Dan Falk chronicles the story of how humans have come to understand time over the millennia, and by drawing from the latest research in physics, psychology, and other fields, Falk shows how that understanding continues to evolve. In *Search of Time* begins with our earliest ancestral perception of time and the discoveries that led—with much effort—to the Gregorian calendar, atomic clocks, and "leap seconds." Falk examines the workings of memory, the brain's remarkable "bridge across time," and asks whether humans are unique in their ability to recall the past and imagine the future. He explores the possibility of time travel, and the paradoxes it seems to entail. Falk looks at the quest to comprehend the beginning of time and how time—and the universe—may end. Finally, he examines the puzzle of time's "flow," and the remarkable possibility that the passage of time may be an illusion. Entertaining, illuminating, and ultimately thought provoking, *In Search of Time* reveals what some of our most insightful thinkers have had to say about time, from Aristotle to Kant, from Newton to Einstein, and continuing with the brightest minds of today.
